

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

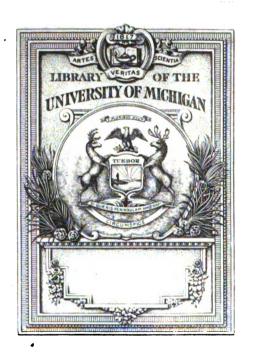

We also ask that you:

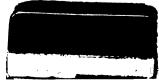

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. BIENNIAL MESSAGE

JOHN P. ST. JOHN,

GOVERNOR,

TO THE LEGISLATURE OF KANSAS.

1879.

TOPEKA, KANSAS:
GEO. W. MARTIN, KANSAS PUBLISHING HOUSE.
1879.

dung History

Digitized by Google

GOVERNOR'S MESSAGE.

To the Legislature:

Kansas, during the two years intervening since your last session, has enjoyed a degree of prosperity without a parallel during the same period in any of the States in the Union. The population of the State has increased at the rate of one hundred thousand per annum; the labor of the husbandman has been rewarded with abundant harvests: the facilities for transportation have been greatly increased; our manufacturing interests are in an encouraging condition; the mineral resources of the State have been rapidly developed; civilization has planted itself on the western frontier, where, but a few years ago, were found only the broad, fertile prairies, which are now populated by a class of citizens whose schoolhouses, churches, thriving towns, and well-cultivated farms furnish abundant evidence of their intelligence, industry, enterprise, and progressive spirit.

Business enterprises have revived and increased; and to-day, Kansas, young in years but strong in natural resources, with an industrious, intelligent population of nine hundred thousand people, located near the geographical, and in course of time to be the commercial, center of the United States, profiting by the lessons learned through past reverses and hardships necessarily incident to pioneer life, looks to the future full of hope

and promise for the prosperity and happiness of her people.

INDIAN RAID.

I regret that the existence of the fact that during the months of last September and October a band of Cheyenne Indians, variously estimated at from one hundred to two hundred in number, raided the western border of our State, makes it my duty to call your attention to this matter; and without stopping to discuss the causes, if any existed, that led to this raid, it is sufficient to be able to state, from a personal investigation of the facts, that no citizen of Kansas, nor any other person within our State, gave the slightest provocation for the brutal outrages committed by this roving band of murderers.

It is a fact, no less humiliating than true, that about twenty-five days elapsed from the time these Indians crossed the southern boundary of our State until they reached the county of Decatur, on its northern limit; moving in their line of march northward along the western border of the frontier settlements, making incursions into sparsely-settled districts, where the people were wholly unable to protect themselves, killing as they did about forty citizens, destroying and carrying away large amounts of property, and committing outrages upon defenseless women and children, so brutal, heinous, and revolting in their nature as to never be forgiven or for-In declining to discuss the question touching the effort made by our State and national authorities to protect the settlers against the outrages committed by this lawless band of savages, I do not wish to be understood as casting any unjust reflections upon any one.

The duty of the hour is not so much to deal with

the past, but to look to the future with a determination that a repetition of these outrages shall never again occur in our State. The doors of Kansas have been thrown open wide, and a cordial invitation extended to the industrious, law-abiding people of all portions of the civilized world to come among us and build for them-Many who have accepted this invitation selves homes. have chosen for their habitation our western frontier, and it becomes an imperative duty of our State to protect the lives and property of these citizens against every invasion by predatory bands of lawless savages who attempt or threaten to deprive them of either, and to administer to such bands within our borders prompt and merited punishment, and delay the settlement of all technical questions that may be interposed until after the safety of the citizen has been fully secured.

Section 11, of chapter 64, of the General Statutes of 1868, provides:

"That in case of insurrection, invasion, or threatened invasion, the commander-in-chief may order into active service any company, regiment or brigade, or any portion of either he may designate, in such forms of organization as he may direct," &c.

While section 15, of the same chapter, provides:

"That all expenses provided for by this act shall be sworn to by the officer making the same, and approved by the Major General, or Brigadier General, certifying that the same were incurred by his order and were necessary for the service, and the amount thereof reasonable and just; and the Auditor of State shall audit the same, and as soon as any moneys are appropriated for military purposes, the Auditor shall draw his warrant on the Treasurer, who shall pay the same."

Under section 11, the commander-in-chief has no power to act except in cases of insurrection, invasion, or threatened invasion. Experience has taught us that hostile Indians do not send advance couriers to notify the frontiersman either of their coming or intent, but the

first notice generally given, or received, is by their murderous attacks upon those who are unprotected and unable to successfully defend themselves. Under section 15, it matters not what the exigency of the case may require, not a dollar can be had for any purpose until the expenses have been incurred, and an appropriation made to pay the same. I therefore respectfully recommend that an appropriation be made as a military contingent fund sufficient in amount—should circumstances at any time require it—to uniform, mount, equip, and pay, a limited number of reliable, discreet men, under command of an efficient officer, whose duty it shall be, at such times and places as may be deemed advisable, to act as a patrol on the frontier, and promptly give warning of every approach of danger, and thus the citizen having due notice, and promptly aided in his defense by the State, could be made secure in the enjoyment of his life and property.

Such an appropriation should have thrown around it such stringent safeguards as would require strict accountability from every officer or person having charge of the disbursement of any portion of such fund.

And I further recommend, that a committee be appointed to ascertain the extent of the damage sustained by citizens from the raid by said Indians, to the end that necessary steps may be taken to secure the payment thereof.

STATE FINANCES, AND REPORTS OF OFFICERS.

I transmit herewith the biennial reports of the State officers. These reports furnish a very full, complete, and satisfactory exhibit of the business transactions of the respective departments from which they emanate, from De-

cember 1st, 1876, to June 30th, 1878, and of which I respectfully request a careful perusal.

The total receipts of the Treasury from November 30th, 1876, to June 30th, 1877, including balance in Treasury December 1st, 1876, amount to \$850,064.88; while the disbursements during the same period amount to \$471,849.08, leaving a balance in the Treasury, June 30th, 1877, of \$378,215.80. The total receipts, including balance in the Treasury June 30th, 1877, for the fiscal year ending June 30th, 1878, amount to \$1,584,891.10; while the total disbursements during the same period amount to \$1,272,910.92, leaving a balance in the Treasury, June 30th, 1878, of \$311,980.18; which sum is made up of the several funds, as follows:

General revenue	\$117,927	68
Sinking fund	5,871	72
Interest fund	48,810	45
Permanent school fund	30,214	.97
Annual school fund	101,442	49
University fund	353	00
Military fund	272	08
Railroad tax fund	2,780	67
Agricultural College fund	223	42
Normal School fund	4, C83	70
Total	\$311,980	18

It will be noticed by comparing the respective reports of the Auditor and Treasurer, that there is an apparent discrepancy between the balance reported as being in the Treasury at the close of the fiscal year ending June 30th, 1878, amounting to \$830.89. This is the amount of deficiency of ex-Treasurer Lappin, and is properly included in the balance as reported by the Auditor, he having no authority to omit it; but the amount so included by the

Auditor not being money in the Treasury, is properly excluded by the Treasurer in his reported cash balance.

The total bonded debt of the State, June 30th, 1878, was \$1,181,975, of which amount \$607,925 is held by the permanent school fund, \$94,275 by the sinking fund, \$9,800 by the State University, and \$1,600 by the State Normal School. The remainder, being \$468,375, is held by private individuals and corporations.

From this aggregate amount of bonded debt may be deducted bonds of our State, \$94,275; United States bonds, \$22,600; cash in the Treasury, June 30th, 1878, \$5,871.72, all belonging to the sinking fund—leaving the real balance of our bonded debt only \$1,059,228.28.

On January 1st, 1877, \$54,000 of the bonded debt of our State matured and was promptly paid; and it is a fact of which every Kansan may well be proud, that every class of matured indebtedness of the State which has been presented, and which the Treasurer is authorized to pay, has been paid with like promptness. And the financial condition and credit of the State to-day is such, that if sufficient funds were in the treasury to liquidate the entire bonded indebtedness of the State, it could only be done either by waiting until the bonds matured, or by purchasing the bonds at a premium on their face value, and paying interest to date.

The several State officers, in their respective reports, make a number of recommendations in relation to amendments of, and additions to, our present laws. These recommendations being based upon the actual experience of these officers, coupled with a thorough study and investigation of the matters to which they refer, entitles

them to, and I respectfully invite you to give them, an earnest and careful consideration.

PENITENTIARY.

The report of the Directors of the Penitentiary embraces the respective reports of the Warden, Chaplain, and Physician, and is transmitted herewith. It is very comprehensive, and furnishes complete information touching the condition of that institution. An examination of the report shows that the daily average number of prisoners confined in the Penitentiary from December 1, 1876, to June 30, 1877, was 415; while the daily average from June 30, 1877, to the close of the fiscal year, June 30, 1878, was 465; and that the number of prisoners confined at the latter date was 500. There have been discharged during the period covered by this report—

By expiration of sentence:

State prisoners	165
United States prisoners	
By pardons:	
State prisoners	43
United States prisoners	
By commutation of sentence:	
State prisoners	15

Five prisoners have been returned to counties for new trials, eleven transferred to the Asylum for the Insane, six have died, and two escaped, of which one has been recaptured and returned to the prison.

The aggregate earnings of this institution, according to the estimates, embracing a period from July 1, 1879, to June 30, 1881, inclusive, will be \$127,400; while the current expenses for the same period are estimated at \$203,365, leaving the amount of expenses over earnings, \$75,965.

In asking your attention to the several suggestions and

recommendations embraced in this report, I feel it my duty to especially impress upon you the importance of that portion recommending the establishment of a reform school for youthful criminals. This question has been agitated for years. It has been frequently urged, with much force and reason, not only in former reports from this institution, but also in the message of my predecessor. The dictates of humanity, the safety of society, and the welfare of the youth of our State, appeal to you for an earnest and prompt consideration of this question; and I trust that the necessary measures may be adopted without further delay for the organization of such an institution.

PRISON LABOR.

Many complaints have been made that the present policy of employing prisoners in the manufacture of such articles as are produced only by skilled labor, brings the labor of the convict in direct competition with the honest, industrious mechanics of our State.

These complaints are not without foundation. The Penitentiary derives its capital from the State; it pays no taxes, but is a necessary burden. While the mechanic derives his capital from his labor, he pays taxes, is expected to obey the laws, and, in obeying them, is required to contribute his quota toward sustaining a system of convict labor, directly in conflict with the means upon which he depends for a support. Yet duty to the State as well as to the prisoner requires that he should be employed, and that such employment should, as near as possible, be made to defray the expenses incurred by the State on his account.

I therefore suggest the appointment of a committee,

to take into consideration this whole question, relating to the present system of convict labor at this institution, with a view to the adoption, if practicable, of such measures as will in due time obviate this apparent injustice to the mechanics of our State.

ASYLUM FOR THE BLIND.

The report of this institution shows that forty-five pupils were in attendance at the close of the term ending June 7, 1878. The estimates for the current expenses for the fiscal years ending respectively June 30, 1880 and 1881, are \$13,513 and \$13,903. This is exclusive of the sum of \$3,000, which the Trustees and Superintendent allege is required to erect and furnish a hospital building, which the health of the students, as well as the success of the school, demands.

INSTITUTION FOR EDUCATION OF THE DEAF AND DUMB.

This institution seems to be well conducted, and is in an encouraging condition. The whole number of pupils enrolled from November 30, 1876, to June 30, 1878, is one hundred and nine.

The sanitary condition as shown by the report of Dr. C. G. McKinley, the attending physician, is remarkably good—not a death having occurred in the Institution during the past six years. The respective reports of the Trustees and Superintendent are well worthy of a careful perusal.

In addition to the necessary appropriation for current expenses, the sum of \$60,000 is asked for, to erect public buildings. The necessity for such an appropriation is very clearly and forcibly presented by the Superintendent in his report, to which I respectfully direct

your attention, and will only add that a personal inspection of the Institution will fully vindicate the Superintendent in his earnest appeals for additional room.

ASYLUMS FOR THE INSANE.

Of the three hundred and sixty inmates under treatment during the biennial period ending June 30, 1878, at the asylum located near Osawatomie, fifty-nine have been discharged, restored; twenty, improved; seventeen, unimproved; three escaped; one was not insane; thirty have died—leaving two hundred and thirty inmates in the Institution at the close of the fiscal year ending June 30, 1878.

I invite your attention to the report of the Trustees and officers of this institution. From this report it will be seen that the most pressing demand of this institution is for more room.

The fact that at the close of the fiscal year ending June 30, 1878, one hundred and sixty-four insane persons were, for want of room, excluded from the State Asylum, coupled with the dictates of humanity, the safety of society, and the welfare of this unfortunate and helpless class of our citizens, makes it an imperative duty to provide the necessary means to increase and utilize the capacity of the asylums to meet this demand.

There have already been appropriated various sums, amounting in the aggregate to \$108,999.25, for the purpose of erecting, near the city of Topeka, an additional asylum for the insane. This asylum, as will be seen by the report of the Trustees, is about completed; and it is only necessary, in order that it should be used

for the purposes for which it was erected, that the necessary funds be appropriated to enable the Trustees to furnish this asylum and defray its current expenses.

PUBLIC SCHOOLS.

The report of the Superintendent of Public Instruction is one of our most valuable and important documents. Of all the reports issued from this department, none has so completely covered all our educational interests, or will be so valuable to the State and its citizens, as the one just published for the school years ending July 31st, 1877, and July 31st, 1878. By this report it will be observed that the total number of school districts in the State is 5,136, being an increase since last report of 271. Number of school houses in the State, 4,520; increase since last report, 363. Value of school property, \$4,527,227; increase since last report, \$250,136. Whole number of persons between the ages of five and twenty-one years, 266,575; increase since last report, 33,701. Number of teachers employed, 6,359, of which 2,861 are males and 3,498 are females.

The permanent school fund, at the close of the fiscal year, June 30th, 1878, amounted to \$1,449,223.87. No State in the Union, in proportion to the age and population of Kansas, possesses a school fund so large; and it must be remembered that to this sum will be added, from time to time, the receipts from sales of the very large body of school lands yet undisposed of.

Our public schools are the pride of the State, and should, as I have no doubt they will be by you, sacredly guarded and maintained.

STATE NORMAL SCHOOL AT EMPORIA.

The biennial report of the Regents of the State Normal School, accompanied by a supplemental report, is transmitted herewith. It presents a full statement of the success, embarrassments, reverses, and misfortunes, that have attended this institution since their last report, and from it will be seen that on the night of the 26th of October, 1878, the Normal School buildings, with all their contents, were destroyed by fire. The practical question now to be determined is, What shall be done to retrieve this misfortune to the educational interests of the State?

By an act of the Legislature, approved March 3, 1863, this institution was established, and permanently located at the city of Emporia, upon condition that a tract of land, not less than twenty acres, adjacent to the town of Emporia, should be donated and secured to the State in fee simple.

To meet these conditions, the citizens of Emporia promptly donated to the State the tract of valuable land upon which the Normal School buildings were afterwards erected; and in addition to this, from time to time contributed liberally of their means to add to the success of this institution. But independent of these facts, which it seems to me should have some weight in determining this question, a thoroughly-organized and well-conducted normal school is absolutely necessary to insure the greatest success to our common-school system of education. The success of the common schools is measured by the qualifications of the teachers. Therefore it is important that those desiring to teach, should be provided by the State with the opportunity of attaining the highest grade of

qualification. Hence the necessity of a well-conducted institution of this class.

I therefore recommend that an appropriation be made to rebuild and restore to our educational system the Normal School at Emporia.

STATE UNIVERSITY.

This institution, as shown by the reports, is in a flourishing condition; and, to insure its continued success, its interests should be carefully guarded, and such aid and encouragement extended to it as will insure the maximum of efficiency in all its departments.

The total receipts of the University, from January 1, 1877, to June 30, 1878, as exhibited in the report, amount to \$46,851.64; while the expenditures during the same period amount to \$46,064.61; leaving balance on hand, June 30, 1878, of \$787.03. The estimated amount required for the fiscal year closing June 30, 1880, is \$43,550, and for the fiscal year closing June 30, 1881, \$27,200.

AGRICULTURAL COLLEGE.

Having received no report from the Agricultural College, I can only say that information derived from a recent visit to this institution leads me to believe that it is making satisfactory progress in its various departments, and is a credit to the State.

STATE BOARD OF AGRICULTURE.

This department continues to do a wonderful work for Kansas. Its reports, so full of valuable and reliable information relating to our State, are not only highly esteemed by our own citizens, but are eagerly sought after by citizens of other States and countries desiring to obtain correct information about Kansas. This department should be liberally sustained by the State, and every necessary provision should be made to increase its efficiency and usefulness. It is to the work of this department that we are indebted for the statistics showing that Kansas has sprung from twenty-fourth in rank among the States in the production of wheat, in 1866, to first in rank in 1878, producing, as she did, over 32,000,000 of bushels; while in the production of corn, Kansas rises from twenty-fifth in rank in 1868, to fourth in rank in 1878.

The rooms occupied by this department are wholly inadequate for the purposes for which they are used, and I respectfully suggest that measures be adopted to provide such additional room as the importance and necessities of the department seem to demand.

INSURANCE DEPARTMENT.

The report of the Superintendent of Insurance gives a very satisfactory exhibit of the transactions of that department. Several suggestions and recommendations are made by the Superintendent, to which your attention is invited. The total receipts of this department during the year 1877, as shown by the report, were \$13,246.42, which was disbursed as follows: To the school fund, \$3,800; and to the insurance fund, \$9,446.42.

COMMISSIONER OF FISHERIES.

The report of the Commissioner of Fisheries, to which I request your attention, shows, among other things, a total expenditure of \$330.55; the accidental loss or destruction of one hundred thousand salmon eggs; the deposit, without the authority of the Commissioner, of one hundred thousand young shad in the Kaw river, at

Topeka; and recommends the appropriation of \$6,000 to enable him to successfully prosecute his work as such Commissioner.

PUBLIC LANDS.

I am of the opinion that the interests of the State would be best subserved by concentrating the management and sale of all the school lands of the State, including the lands of the Agricultural College, Normal School and State University under one general head, to be known as the State Land Department, by which all contracts for the sale of land should be either made or approved, and that all payments of principal or interest on land contracts should be made to the head of such department, and covered into the State Treasury, to be placed to the credit of the particular fund to which it belongs, and by the Treasurer disbursed according to Such a system for the disposition of our public lands would be less expensive, insure greater safety to the purchaser as well as the State, and would be less complicated than our present system. There should also be a provision made for an appraisement of all of said lands by a commission duly created for that purpose, which should personally inspect every tract of such lands, and in their report give a full and complete description of each subdivision of forty acres, embracing quality of soil, stone, water, timber, location, value, &c. Such an appraisement, being entirely freed from local influences, (which make our present system objectionable,) would be uniform and reliable, and more likely to do equal justice to all concerned.

The commission who selected the 265,000 acres of land recently secured to the State from the United

States Government, having in their report given such a description from a personal inspection of each tract described, the value of such land might be fixed without revisiting the land. Such an appraisement of all the public lands, once completed, would never have to be repeated, as a board of revision could from time to time increase or lessen the valuation, as circumstances might indicate to be for the best interests of the State.

The policy of the State should be to dispose of its lands as rapidly as it can be done advantageously, and thus not only place the purchase money on interest, but bring the land sold in for taxation; and to this end, I suggest the rate of interest on deferred payments of purchase money be reduced to not exceeding seven per cent. per annum, payable annually, and that the principal be made payable at the option of the purchaser at any time within twenty years, with a strict provision for forfeiture upon failure to pay interest within a reasonable time after its maturity.

SCHOOL LANDS.

In pursuance of the provisions of section 1, chapter 176, of the Laws of Kansas of 1877, authorizing the Governor to appoint an agent for the State, whose duty it should be, among other things, to prosecute to final decision the claims of the State for school lands due the State from the United States on account of Indian reservations, my predecessor appointed as such agent Hon. Samuel J. Crawford, who, after being duly qualified, entered upon the performance of his duties, which have resulted in securing to the State about 265,000 acres of choice lands, in addition to the large body of school lands already owned by the State. No appropriation

having been made to defray the necessary expenses connected with the selection of the lands thus secured, and in view of the rapidity with which the Government lands in our State were being disposed of, our State officers, realizing that the best interests of the State required that these lands should be selected at as early a day as possible, united in proceedings that resulted in the appointment of Hon. G. C. West, J. C. McQuary, O. E. Morse, L. A. Thrasher, L. B. Snow, and J. E. Stone, citizens of Kansas, as commissioners to select said lands. These commissioners faithfully and promptly performed their duty by selecting the amount of land due the State, and making a full and complete report thereof, which is now on file in the office of the Auditor of State, and to which you are respectfully referred.

These lands are among the best in the State; and at the average price received for school lands patented to this date will be worth to the State about \$1,120,000. To meet the expenses necessarily incurred in selecting these lands and making a full report thereof, the State officers, to wit, Geo. T. Anthony, Thos. H. Cavanaugh, P. I. Bonebrake, John Francis, Willard Davis, and A. B. Lemmon, united in borrowing, on their personal responsibility, \$2,885.35; upon which sum they are liable to payment of interest amounting to \$212.94, making a total I therefore recommend that a committee of \$3.098.29. be appointed to investigate the proceedings relating to the selection of these lands, together with the reports and vouchers now on file in the Auditor's office, and, if found correct, that an appropriation be made to reimburse these officers for the full amount so expended by them in the interests of and for the State, and for which their personal obligation is now outstanding.

PRICE RAID CLAIMS.

The report of the board organized in pursuance of the provisions of the acts of February 11th, 1865, and February 26th, 1866, to audit the claims of citizens for services rendered, material and supplies furnished, transportation lost, and damages sustained from the Price raid and in the Indian expedition under General Curtis, in 1864, being unsatisfactory, the Legislature, by act of February 26th, 1867, provided for a new board, to reëxamine these claims. By this act it was provided that the State should assume the payment of the amount this commission should award, by issuing to holders of claims so allowed interestbearing union military scrip, to be paid out of any appropriation that might thereafter be made by Congress to reimburse the State for such expenditures. This commission awarded: For services, \$218,398.75; supplies and transportation, \$81,682.32; damages, \$131,093.83; property lost, \$35,518.47 - making a total award of \$467,293.37.

By the act approved February 17th, 1869, a commission consisting of three disinterested citizens was created to examine in every particular into claims rejected by either of the former commissions for want of proof, and not having passed upon their merit, and all claims that had not been prior thereto audited by either of the former commissions. It is further provided by this act that all claims audited and allowed by the commissioners appointed under the provisions of the acts of February 11th, 1865, and February 26th, 1866, together with all claims for services, transportation, forage, subsistence and property lost in action that might thereafter be audited and allowed by the commissioners appointed under this act, should be and were thereby assumed by the State of Kansas; pro-

vided, that no claims allowed by the commissioners appointed under the provisions of the act of February 11th, 1865, and rejected by a subsequent commission, should be assumed unless reaudited and allowed by the commissioners appointed under this act; and provided further, that the amount assumed by the State should not exceed the sum of five hundred thousand dollars.

The commissioners appointed under this act allowed claims to the amount of \$61,221.59, making the aggregate amount of claims \$528,514.96, being \$28,514.96 more than was authorized to be assumed under the provisions of this act. A small amount was also allowed by the Auditor and Treasurer of State, under the act of March 4th, 1873.

Congress, by act of June 8th, 1872, appropriated \$337,-054.38, which sum was placed in our State Treasury to pay the claims allowed for service, transportation and subsistence of troops, by a commission created under an act of Congress of February 2d, 1871. This money has been paid out by the Treasurer, but not strictly in accordance with the purposes for which it was appropriated, a part of it at least having been applied in payment of scrip issued on account of damages and for service in the Indian expedition, which scrip was not covered by the award of the commissioners appointed under the said act of Congress of February 2d, 1871.

Under the act of the Legislature, approved March 3d, 1877, a State agent has been appointed, whose duty, among other things, as defined by said act, is "to prosecute to a final decision all claims of the State of Kansas against the United States growing out of what is commonly known as the Price raid, and all other

claims of the State arising out of depredations committed by the Indians, or occurring during the late war, together with all claims which the State may have against the United States for expenses incurred in organizing, equipping and maintaining troops for the public service."

While the above provisions of the act are sufficiently broad and sweeping to authorize the State agent to prosecute the claims of the State against the United States Government, it by no means meets the obligations of the State to its citizens.

By the act of February 17th, 1869, the State unconditionally assumed these claims of her citizens to an amount not exceeding \$500,000. This was not done until after \$467,293.37 of said claims had been passed upon and allowed by its duly-constituted agents; and I can see no reason why all of the \$61,221.59 allowed by the commission created by the act of February 17th, 1869, as well as the small amounts subsequently allowed under the act of 1873, are not as just, and the holders thereof in excess of the \$500,000 assumed by the State in equity, equally entitled to be paid.

I can make no recommendation that, if adopted by the Legislature, would in my judgment reflect more credit upon the State, and mete out greater justice to the citizens directly interested in this matter, than to ask that a committee be appointed to ascertain, as nearly as possible, the amount of scrip connected with this matter yet outstanding and unpaid; and the adoption of such measures, during the present session, as will provide the necessary means for the prompt payment of whatever balance may be so ascertained, remembering that nothing inspires greater confidence in, respect

for, and devotion to a State, than the prompt discharge of every just obligation to its citizens.

RAILROAD FARES AND FREIGHTS.

There are about 2,300 miles of railroads in operation in Kansas, the assessed value of which, as shown by the report of the Auditor of State, is \$15,525,033.25. While it is true that these railroads have contributed largely to the wealth, prosperity and progress of our State, it is also equally true that not only our people, but the State and General Government, have contributed liberally toward their construction and support.

The railway corporations of Kansas derive their powers from, and the capital invested therein is entitled to, and receives protection at the hands of the State. Their income arising from earnings, is derived mainly from the patronage of the people of Kansas, and the people in return have the right to demand that such limitations, restrictions and regulations touching fares and freights be imposed as will fully protect their interests, and at the same time do no injustice to these corporations.

Our present law, in my judgment, is wholly inadequate. Section 56, of chapter 23, of the General Statutes of Kansas, prohibits railway corporations from charging over six cents per mile for transporting passengers. Such a limitation affords no just protection to the traveling public. Nor is it practically any restriction on the corporation, for but few if any railroads now in this country charge six cents per mile, even where there is no limitation. Sections 57, 58 and 59 of same chapter, relating to the classification of, and charges for carrying freight, are less restrictive, if possible, than said section 56. Besides, by these sections, the classification of freights

being left entirely at the discretion of the railroad companies, the restrictions and limitations therein attempted to be imposed are ineffective.

I therefore suggest that this law be so amended as to clearly define the limitations, restrictions and regulations relating to charges for fares and freights, and that such limitations, restrictions and regulations be made to do, as nearly as possible, equal justice to the railroads and the people, and thus have the rights of both parties touching this question, definitely settled.

TEMPERANCE.

The subject of temperance, in its relation to the use of intoxicating liquors, as a beverage, has occupied the attention of the people of Kansas to such an extent, that I feel it my duty to call your attention to some of its evils, and suggest, if possible, a remedy therefor. Much has been said of late years about hard times, and extravagant and useless expenditures of money; and in this connection, I desire to call your attention to the fact, that here in Kansas, where our people are at least as sober and temperate as are found in any of the States in the west, the money spent annually for intoxicating liquors would defray the entire expenses of the State government, including the care and maintenance of all its charitable institutions, Agricultural College, Normal School, State University, and Penitentiary - and all for something that, instead of making mankind nobler, purer and better, has not only left its dark trail of misery, poverty and crime, but its direct effects, as shown by the official report, has supplied our State prison with one hundred and five of its present inmates.

Could we but dry up this one great evil that con-

sumes annually so much wealth, and destroys the physical, moral, and mental usefulness of its victims, we would hardly need prisons, poor-houses, or police.

I fully realize that it is easier to talk about the evils flowing from the use of intoxicating liquors as a beverage than it is to provide a remedy for them. If it could be fully accomplished, I am clearly of the opinion that no greater blessing could be conferred by you upon the people of this State than to absolutely and forever prohibit the manufacture, importation, and sale of intoxicating liquors as a beverage. But many people insist that a prohibitory law could not, or at least would not, be enforced, and that any law that cannot be, or is not, enforced, is worse than no law at all.

I have too much faith in the people of Kansas to believe that any law intended to, and the effect of which would be to promote the moral, physical, and mental condition of mankind, would not be rigidly enforced. Yet, desiring the passage of no law in relation to the enforcement of which there could be any doubt, and with a view to the adoption of such measures only as will be backed up and enforced by the moral sentiment of our people, I respectfully call your attention to the first section of what is commonly known as the dramshop act, which reads as follows:

"Before a dramshop license, tavern license, or grocery license shall be granted to any person applying for the same, such person, if applying for a township license, shall present to the tribunal transacting county business a petition or recommendation signed by a majority of the residents of the township, of twenty-one years of age and over, both male and female, in which such dramshop, tavern, or grocery is to be kept; or if the same is to be kept in any incorporated city or town, then to the city council thereof, a petition signed by a majority of the residents of the ward, of twenty-one years of age and over, both male and female, in which said dramshop, tavern, or grocery is to be kept, recommending such person as a

fit person to keep the same, and requesting that a license be granted to him for such purpose: *Provided*, That the corporate authorities of cities of the first and second class may by ordinance dispense with petition mentioned in this section."

And earnestly recommend that said section be amended by striking out the proviso therein contained, and requiring the party desiring a license under said section to publish his petition, with the names of the signers thereto, in some newspaper printed and of general circulation in the town, city or township in which he desires to obtain such license; or, in case no newspaper is so published, then in some newspaper published in the county and of general circulation therein, at least thirty days before making such application;—and thus place all the cities, towns and townships in the State, irrespective of the particular class to which they belong, on an equal footing, and let the people in each locality settle this question for themselves.

SENATORIAL ELECTION.

It will devolve upon you during the present session to elect a United States Senator, and I have only to ask that in the performance of this duty you be governed solely by a desire to promote the integrity, honor, and good name of Kansas.

APPROPRIATIONS.

It is important that all appropriation bills should be introduced at the earliest moment possible, in order that you may have ample time to give them the careful consideration that the best interests of the State demand.

CONCLUSION.

In conclusion, allow me to impress upon you the fact that the people to-day look to you, as their representatives, for honest, earnest work in their behalf, and that nothing less than a faithful and constant devotion of your time to their interests will meet this demand.

And now, trusting that your deliberations may be pleasant and harmonious, and assuring you of my desire at all times to unite with you in every good work for Kansas, let us not forget the duties we owe not only to the people, whose servants we are, but above all to Him who controls the destinies of men and of States.

JOHN P. ST. JOHN.

EXECUTIVE DEPARTMENT, TOPEKA, KANSAS, January 14, 1879.

MESSAGE

OF.

GEO. T. ANTHONY,

RETIRING GOVERNOR,

To the Legislature of Kansas.

JANUARY 13, 1879.

TOPEKA, KANSAS:
GEO. W. MARTIN, KANSAS PUBLISHING HOUSE,
1879

STATE OF KANSAS, EXECUTIVE DEPARTMENT, TOPEKA, KANSAS, Jan. 13, 1879.

SIR: Impelled by a sense of duty, I have prepared, and herewith hand you, a communication to the Legislature. This innovation will, I trust, meet with sufficient approval on your part to justify you in its transmittal to the separate branches of that body, which favor I respectfully ask at your hands.

Very respectfully, GEO. T. ANTHONY,

Governor.

To Hon. John P. St. John, Governor elect, Topeka, Kas.

MESSAGE.

To the Legislature:

Our State constitution, in declaring and defining the duties of the Governor, provides that he "shall, at the commencement of every session, communicate, in writing, such information as he may possess in reference to the condition of the State, and recommend such measures as he may deem expedient."

The mandatory character of this provision finds ample justification in the necessity and value of the work required. It provides the means by which the Legislature may have official knowledge of the transactions of the government during its absence; of its condition in all its departments, and of its future necessities, to provide for which they have assembled.

In order that this executive communication may be complete in detail and correct in statement, the Governor has power to call upon all the other officers of State for such information as he may require.

The statutes have supplemented the constitution, in this regard, by making it the duty of all officers, or others having care and custody of State departments or institutions, to make full reports to the Governor, with their recommendations. Thus the material of fact and the basis of recommendation to be embraced in the Governor's communication are made absolutely complete.

Every consideration of business prudence and official propriety would seem to demand this communication from the incumbent of the office during the period to which it relates. No one else could be possessed of such knowledge necessary to its completeness in statement, or the experience as a guide for its recommendation.

Practically, this communication is no more nor less than an executive report of the transactions of an administration, with practical suggestions springing from a personal knowledge of such transactions; and the same business reasons, requiring a report from the Auditor, Treasurer, and other State officers, covering the period intervening between sessions of the Legislature, to be made by the incumbent, hold good in this case.

The reverse of this has been the practice. A custom sanctioned by usage since the State was organized has devolved this duty upon the incoming instead of the outgoing Governor. When your sessions were annual, this practice was less objectionable than now. Then the period covered by the message was but a single year, and on each alternate year it was written by an incumbent who had personal knowledge of the matters communicated. Now, with biennial sessions, the message necessarily covers the full period, and embraces all the transactions of an entire administration.

Believing it better to establish a good precedent than to follow a bad one, and holding duty to the public paramount to custom and usage, I have concluded to depart from the practice of predecessors, by addressing you. I am impelled to this departure by a belief that there are transactions, both complete and incomplete, connected with my administration, which should be brought to your attention in more fullness of detail and particularity of statement than could be expected or required of the Governor elect; and I trust you will, by law, make it his duty to perform a work I have assumed to do at the peril of unfriendly criticism.

STATE CLAIMS.

Under authority of chapter 176, Laws of 1877, Hon. S. J. Crawford was appointed, confirmed and commissioned, on March 6, 1877, as agent for the State in the prosecution of claims against the United States Government, with whom an

agreement was entered into as provided by said act, a copy of which is as follows:

THIS MEMORANDUM, made this 3d day of October, A. D. 1877, by and between the State of Kansas, party of the first part, and Samuel J. Crawford, of Topeka, Kansas, party of the second part, Witnesseth: That whereas, the said second party was on the 5th day of March, 1877, duly appointed and confirmed, and on the 6th day of March, 1877, duly commissioned by the Governor of the State of Kansas, the agent of the said State of Kansas to prosecute the claims of said State against the United States, pursuant to an act of the Legislature of the State of Kansas, entitled "An act to provide for the appointment of an agent to prosecute the claims of the State of Kansas against the United States, and to procure payment of money due said State from the United States on account of public lands disposed of by the United States in the said State of Kansas; also, to present and prosecute the claims of the State of Kansas for school lands due the said State from the United States; also, to prosecute the claims of the State of Kansas against the United States for moneys due the said State on account of expenses incurred in organizing troops for the military tervice of the United States, and for material and supplies furnished the same, and on account of Indian depredations," approved March 3, 1877, (Laws of 1877, page 232); and whereas, the said second party has duly qualified and entered upon the discharge of his duties as such agent; and whereas, it is provided by said act that the said agent "shall be allowed such compensation for his services as may be agreed upon between the Governor, Auditor and Attorney General of the State and himself, not to exceed ten per centum upon the amount secured to the State, and that in case any lands are secured by the State for school purposes or otherwise by such agent, then he shall be paid for his services in that behalf in land, at a price to be determined by the Governor, Auditor and Attorney General of the State, but not more than one-tenth of the whole amount secured by such agent:

Now, therefore, it is hereby stipulated by and between the said parties hereto, that the compensation of the said second party, for the services rendered by him in the discharge of the duties of said agency, shall be as follows, to wit:

First: On all claims successfully prosecuted for the State, for moneys expended by the State for military purposes, ten per centum of the amount so recovered.

Second: On all other claims successfully prosecuted for the State, when the amount recovered shall be paid to the State in money, ten per centum of the amount so secured.

Third: Where lands are recovered to the State by said agent, one-tenth of the lands so recovered, said one-tenth to be selected and set apart to the said party of the second part by three disinterested persons, one of whom shall be chosen by the parties of the first part; one by the party of the second part, and one by the two persons thus selected.

In testimony whereof, the State of Kansas, by its Governor, Auditor and Attorney General, party of the first part, and the said party of the second part, have hereunto set their hands, the day and year first above written.

(Signed) S. J. CRAWFORD.
(Signed) GEO. T. ANTHONY, Governor.
(Signed) P. I. BONEBRAKE, Auditor.
(Signed) WILLARD DAVIS, Attorney General.

Every facility and aid in their power has been given the agent, by each and all of the State officers.

The amount of bonds issued and liabilities incurred for war purposes, by the State, on account of the General Government, for which reimbursement is claimed, is shown by the following statement, prepared by the Auditor of State:

STATEMENT OF BONDS ISSUED BY THE STATE OF KANSAS FOR MILITARY PURPOSES.

1011100220		
JULY 1, 1864.—An act to provide for the expenses of the militia, incurred in the protection of the State, in the years 1861, 1862, 1863, and 1864, and		•
payment of the same, approved February 23, 1864		00

In addition to the foregoing exhibit, the State of Kansas has issued its interest-bearing certificates in pursuance of law, for the services of the State militia, material and supplies furnished, property lost in action, etc., in defense of the State, during the year 1864, to the amount of		15
	<u>-</u>	_
Making the total amount paid and assumed by the State, and for which the State has not been reimbursed by the United States		15

A bill passed the Senate at its last session, and is now pending in the House, for the adjustment and payment of this claim, or so much thereof as may be sustained by proper vouchers. So long a time has elapsed that it may be impossible to recover it all; but most of the claim can be sustained by adequate vouchers. It is a claim so just that our Representatives in Congress cannot fail to secure its recognition, if pressed as I have every reason to believe it will be pressed.

SCHOOL LANDS.

The sixteenth and thirty-sixth sections of public lands lying within Indian reservations had been withheld from the State by decision of the Interior Department, as follows:

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE, March 4, 1870.

Hon. J. D. Cox, Secretary of the Interior:

Size: I had the honor to receive the Secretary's letter of the 23d ult., requesting an expression of the views of this office on a question submitted in a communication from the Attorney General of Kansas, which accompanies the Department letter, relative to alleged losses to the school fund of that State by reason of final disposal of Indian reservations and trust lands within her borders.

The act organizing the Territory of Kansas, approved May 30, 1854, reserved sections sixteen and thirty-six in each township of said Territory for the use of schools. The act for the admission of Kansas into the Union, approved January 29, 1861, grants sections sixteen and thirty-six in every township, of public lands in said State, with the additional provisions that when either of said sections, "or any part thereof, has been sold or otherwise disposed of, other lands equivalent thereto, and as contiguous as may be, shall be granted to said State for the use of schools."

It will be observed that in the Territorial act, school lands are reserved in each township of said Territory.

In the same act is the following provision, relating to Indian reservations within its limits: "But all such territory shall be excepted out of the boundaries and constitute no part of the Territory of Kansas." Again, in the act admitting the State, January 29, 1861, the sixteenth and thirty-sixth sections are granted in every township of public lands in said State. In the same act, however, is the proviso, "that nothing in said Constitution respecting the boundary of said State shall be construed to include any territory which by treaty with such Indian tribe is not, without the consent of such tribe, to be included within the territorial limits of any State or Territory; but all such territory shall be excepted out of the boundaries and constitute no part of the State of Kansas, until said tribe shall signify their assent to the President of the United States to be included within said State, or to affect the authority of the Government of the United States to make any regulation respecting such Indians, their lands, property, or other rights, by treaty, law, or otherwise, which it would have been competent to make if this act had never passed."

Under treaty stipulations these Indian lands have from time to time been sold in trust for the Indians, or otherwise disposed of for their benefit, no pecuniary benefit resulting to the General Government from such disposals.

We draw from these facts the conclusion that as these lands, by the expressed terms of the organic act, were no part of the Territory of Kansas, and by the provisions in the act of admission were excepted from and declared to be no part of said State, the grant of the sixteenth and thirty-sixth sections in each township of public lands in said State did not include any part of the Indian reservations, and hence there is no legal foundation for school indemnity under existing laws.

Returning the communication of the Attorney General, I have the honor to be Your obedient servant,

(Signed) JAS. S. WILSON, Commissioner.

The amount of land involved in this controversy was about 270,000 acres, and of more than a million dollars in value. Not only the large interest at stake in this case, but the ultimate results of the precedent, caused the utmost caution and deliberation by the Department. The case of the State was sustained by an elaborate and exhaustive brief of the law and precedents, prepared by State Agent Crawford, and argued before the Hon. Secretary of the Interior and Commissioner of the General Land Office by Hon. Matt. C. Carpenter and other able attorneys who had been engaged by Mr. Crawford for this purpose.

The result will justify in this connection a reproduction of the text of the decision as communicated to me by the Hon. Commissioner:

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE, WASHINGTON, D. C., August 14, 1877.

Hon. Geo. T. Anthony, Governor of Kansas:

SIR: I have had under consideration the claim made by the State of Kansas, through her agent, the Hon. S. J. Crawford, for an allowance of certain lands for school purposes.

The claim, as stated by said agent, is: "That the State of Kansas is entitled to every 16th and 36th section of land in each township in said State; and when either of said sections, or any part thereof, has been sold or otherwise disposed of by the United States, then the State is entitled to other lands equivalent thereto." Or, in other words and in narrower limits, I may state the question to be: Is the State of Kansas entitled to the 16th and 36th sections of land (or equivalent therefor) which were formerly within the Indian reservations in said State?

There were a number of these reservations the Indians' title to which has never in all cases been extinguished, as such, and which constitute a part of the State of Kansas.

The act of Congress of date May 30th, 1854, entitled "An act to organize" the Territory of Kansas, provides as follows:

"SEC. 34. And be it further enacted, That when the lands in the said Territory shall be surveyed, under the direction of the Government of the United States, preparatory to bringing the same into market, sections numbered sixteen and thirty-six, in each township in said Territory, shall be and the same are hereby reserved, for the purpose of being applied to schools in said Territory, and in the States and Territories hereafter to be erected out of the same." (Stat. at Large, p. 239, vol. 10.)

The foregoing is also incorporated into the act of Congress of date July 22, 1854, providing, among other things, for the survey of said Territory.

The act of Congress admitting the State of Kansas into the Union, approved January 29th, 1861, provides:

"SEC. 3. And be it further enacted, . . . First, That sections numbered sixteen and thirty-six, in every township of public lands in said State, and where either of said sections or any part thereof has been sold, or otherwise been disposed of, other lands equivalent thereto, and as contiguous as may be, shall be granted to said State for the use of schools." (Statutes at Large, vol. 12, p.127.)

Without other provisions of law, it would be clear that the State is entitled to what she asks. But the act of admission referred to contains the following proviso, which is also in substance contained in the organic act. The proviso is as follows:

"Previded, That nothing contained in the said constitution respecting the boundary of said State shall be construed to impair the rights of persons or property now pertaining to the Indians in said Territory, so long as such rights shall remain unextinguished by treaty between the United States and such Indians, or to include any territory which, by treaty with such Indian tribe, is not, without the consent of said tribe, to be included within the territorial limits or jurisdiction of any State or Territory; but all such territory shall be excepted out of the boundaries, and constitute no part of the State of Kansas, until said tribe shall signify their assent to the President of the United States to be included within said State, or to affect the authority of the Government of the United States to make any regulations respecting such Indians, their laws, property, or other rights, by treaty, law, or otherwise, which it would have been competent to make if this act had never passed."—(Stats, at Large, vol. 12, p.127.

Upon the 23d day of April, 1870, the Secretary of the Interior asked an expression of the views of this office with reference to the question involved in the construction of these statutes, and the propriety of granting this claim.

In answer, the then Commissioner, Joseph L. Wilson, submitted his views upon the subject, in writing. After quoting from the foregoing acts, as above, except that he leaves off that part of the provision after the word "Kansas." in the 14th line thereof, he says:

"Under treaty stipulations these Indian lands have, from time to time, been sold in trust for the Indians, or otherwise disposed of for their benefit, no pecuniary benefit resulting to the General Government from such disposal."

We draw from these facts the conclusion, that as these lands by the express terms of the organic act were not part of the Territory of Kansas and by the provisions in the act of admission were excepted from and declared to be no part of said State, the grant of 16th and 36th sections in such townships of public lands in said State "did not include any part of the Indian reservations, and hence there is no legal foundation for school indemnity under existing laws."

These views thus expressed to the Secretary in this advisory manner rather than in the light of a decision upon the rights of the parties, and which, so far as I am able to learn, were in no manner approved or disapproved by the Secretary, do not, as I conceive, constitute such a decision on the part of my predecessor in office, as to bind me to a concurrence in them. I make this statement, because I find it necessary, after a careful consideration of the questions involved, to differ from the conclusions there arrived at. I am forced to adopt the view that the Indian reservations were just as much a part of the State of Kansas, in contemplation of the acts referred to, granting school sections, as any other portion. It is true that the State could not take possession at once, or as it did of other lands, for the right of possession was in the Indians temporarily. The right of the State to claim the lands was made dependent upon certain conditions or contingencies, which the acts referred to named. When these things were accomplished, the State's right attached; the Indian reservations were excepted out of the boundaries of the State only so long as the Indian title remained unextinguished, and no longer. This title extinguished, the lands became part of the State, and when part of the State, the State was entitled to the sixteenth and thirty-sixth sections therein. The latter fact just as necessarily resulted as the former.

The State of Kansas was formed within certain boundaries. These were universally recognized. But within these boundaries certain rights had been acquired, which justice demanded should be protected. These were, a right of possession only in certain Indian tribes, which were to be preserved until the Government could acquire them by the means named in the act of admission. When this was done, the lands were, by the terms of the act, to become a part of the State. No further legislation was necessary to this end. The reservations were only to continue so long.

Not only this, but the act providing for the survey of the lands within the State, provides that, whenever any part was surveyed with a view to bringing them into market, the sixteenth and thirty-sixth sections were to be set apart for school purposes. At the time of the organic act, and not till long after, were the lands surveyed, so that the language providing that "each township in the State," etc., could not have referred to any townships already surveyed, but to all townships that should thereafter be surveyed.

The townships within the Indian reservations were perhaps longest delayed; still finally they were surveyed, with a view to their sale. No time was fixed in which the surveys should take place, neither with reference to these nor any other parts of the State. This view is supported also by the subsequent acts of Congress.

The resolution of date April 10, 1869, providing for the purchase of lands in the Osage reservation, in said State, provided, among other things, "that the sixteenth and thirty-sixth sections shall be reserved for State and school purposes, in accordance with the provisions of the act of admission of the State." Not only were the lands here reserved, but "in accordance with the provisions of the act of admission of the State."—saying as plainly as might be that it was the understanding of Congress that the act of admission reserved these lands for that purpose; so, the two other acts of date of July 15, 1870, reserve these sections.

Not only this, but I have for my guidance the almost uniform custom of this department, directing me to the same end and conclusion. For instance: In the case of the State of California, it appearing that in certain locations, owing to natural obstacles, the school lands could not always be selected according to the uniform system adopted, it was provided that the State might select other lands; and the Commissioner of the General Land Office, in his circular of instructions upon the subject, uses the following language: "Fractional townships created by Indian reservations are not to be understood as coming within the meaning of the act, as when the township is completed, it [the State] will have its proper school lands." See opinion of Attorney-General Butler, March 31, 1836, 3 Opinions. See also, Secretary's decision, December 20th, 1858, No. 644; 1 Lester, 632; id., No. 534, p. 492; id., No. 319, p. 285.

The almost uniform action of the Government with reference to like grants to other States is in perfect accord with these views. In the case of Cooper vs. Roberts, 18 Howard, 173, the court say: "It has always been a cherished policy with the Government of the United States to appropriate the section numbered sixteen in every township of land for the use of schools." But not only does it appear clear to me that these lands were within the contemplation of the organic act, the act providing for the survey of the lands, and the act of admission, but that these reservations were, in a sense, and in the same contemplation, a part of the Territory and State. The reservation clause can only fairly be construed, in my opinion, to be a suspension of the political and economic functions of the State Government for the time. In this view of the subject I am borne out by so able an authority as Chief Justice Marshall. In the case of Fletcher vs. Peck, 6 Cranch, 141, the opinion recites "that in October, 1763, the King of Great Britain issued a proclamation creating four new colonies - Quebec, East Florida, West Florida, and Grenada - and prescribing the boundary of each; and further declaring that all the lands between Alatamaha and St. Marys should be annexed to Georgia. The same proclamation contained a clause reserving under the dominion and protection of the Crown for the use of the Indians, all the lands on the Western waters, and forbidding a settlement on them, or a purchase of them from the In-. . . The counsel for the plaintiff rest their argument on a single proposition. They contend that the reservation for the use of the Indians, contained in the proclamation of 1763, excepts the lands on the Western waters from the colonies within whose bounds they would otherwise have been, and that they were acquired by the Revolutionary Wat. . : . The court does not understand the proclamation as it is understood by the counsel for the plaintiff. The reservation for the Indians appears to be a temporary arrangement, suspending for a time the settlement of the country reserved, and the power of the royal Governor within the territory reserved, but is not conceived to amount to an alteration of the boundaries of the Colony."

This case, it will be seen, is exactly in point, and parallel, and must be accepted as a controlling authority. See, to the same import, the opinion of Attorney-General Black, 9 Opinions, 346:

It will be seen, by a reference to the decision of the Secretary of the Interior, of date August 26, 1870, that in interpreting the act of April 10, 1869, he makes a distinction between the lands embraced in the first and second articles of the Osage treaty. He says:

"The United States, however, purchased, under the treaty, the lands embraced in the first article, and thereafter they became public lands; and for such of the sixteenth and thirty-sixth sections of them as may be sold, or otherwise disposed of, the State will be entitled to select equivalents, which must be taken as near as may be to the ceded tracts."

According to the doctrine of this decision, when the United States acquires the Indian title, the State is entitled to the school sections; but the Secretary then held that the lands embraced in the second article of the treaty, which were to be sold in trust for the Indians, were not acquired by the United States. "The United States acquired no beneficial interest in them, and in no sense can they be considered public lands." This conclusion was undoubtedly based upon, and finds its excuse in, the particular wording of the act which contains the words "lands sold to the United States." Perhaps it would not be proper for me to question the soundness of the decision, nor is it necessary to do so. The subsequent decision of the Secretary of the Interior, of date February 14, 1871, practically overrules the former decision, and decides that under the twelfth section of the act of July 15, 1870 (16 Statutes at Large, page 362), the State is entitled to the sixteenth and thirty-sixth sections referred to, known as Trust Lands.

I conclude, therefore, without further discussion of the question, that the State of Kansas is entitled to each sixteenth and thirty-sixth section of land, or equivalents therefor, to be selected according to law, embraced within the lands heretofore known as "Indian reservations," in said State, not heretofore obtained by her, or for which she has not in any manner received lands, or other compensation in lieu thereof.

Very respectfully,

J. A. WILLIAMBON,

Commissioner.

This decision was accompanied by a request that I should select the indemnity lands and certify such selection to the local land offices, in order that they might be withdrawn from market and certified to the State when the work was complete. This involved an unpleasant responsibility. Public lands were being taken up very rapidly, and to delay the selection for your meeting would entail a very great loss to the State in the quality and location of the lands. On the other hand, the selection could only be made by the employment of competent commissioners, and provision for their payment as soon as the work was done.

Under these circumstances the State officers were called together, and their counsel and coöperation solicited. They cheerfully responded, and the conclusion was reached that the interests of the State demanded a prompt location of the land, and that the exigencies of the case fully justified the means requisite to its accomplishment. It was unanimously agreed to select competent men, commission them as agents of the State, and set them at once to the work, according to carefully prepared instructions. To meet the expenses of the work, money was obtained upon the personal obligation of the State officers, all of whom joined in a note to Donnell, Lawson & Co., of New York, who advanced \$3,000 at a stipulated interest of seven per cent. per annum.

The following-named gentlemen were appointed commissioners: J. C. McQuary, of Salina; G. C. West, of Topeka; J. E. Stone, of Montgomery; L. B. Snow, of Butler; L. A. Thrasher, of Allen; and O. E. Morse, of Linn.

Their report will abundantly verify that they performed their duties with intelligence and pains-taking care. I do not believe that more careful or valuable work was ever performed of a like nature.

The following statement of receipts and disbursements on this account, made by the Hon. Treasurer of State, who was made treasurer for this purpose, will show the amount paid each commissioner, and the total amount required to meet the liability, to provide for which an appropriation should be made before maturity of the paper:

STATEMENT OF DISBURSEMENTS.

The selections made by the commissioners were certified by me to the local land officers, who were ordered by the Commissioner of the General Land Office to withdraw them from settlement. The complete lists of selection have been made by the State Auditor, but cannot be approved and forwarded to the Commissioner for final certification to the State until a fee, imposed by section 2238, paragraph 7, United States Statutes, is paid by the State, or waived by the United States. It is my opinion that this fee does not attach to indemnity lands given in lieu of lands belonging to the State before this fee was imposed. No time should be lost in making the necessary appropriation, should the Commissioner decide adversely to the demand which has been made for a certification without this fee.

SCHOOL MONEYS.

The decision affirming the right of the State to the 16th and 36th sections of the lands lying within the Indian reser-

vations, was logically followed by a demand for five per cent. of the net proceeds of the sale of the balance of such reservations. This claim, like the other, was carefully prepared, and ably argued before the same officers, by the same attorneys, and the result communicated to me in the following decision:

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE, WASHINGTON, D. C., Dec. 31, 1877.

Hon. GEO. T. ANTHONY, Governor of Kansas:

SIR: I have considered the claim made by the State of Kansas, for "five per centum of the net proceeds of all sales of public lands lying within said State, including the lands embraced in former Indian reservations therein, which have been sold by Congress since the 29th day of January, A. D. 1861."

This claim is founded upon the following clause of the third section of the act of Congress, approved January 29, 1861, entitled "An act for the admission of Kansas into the Union," and which reads as follows:

"FMA. That five per centum of the net proceeds of sales of all public lands lying within said State, which shall be sold by Congress after the admission of said State into the Union, after deducting all the expenses incident to the same, shall be paid to said State for the purpose of making public roads and internal improvements, or for other purposes, as the Legislature shall direct." (12 Stat., 127.)

At the time of the passage of this act, there existed in the State of Kansas numerous large Indian reservations, which, by the terms thereof, it was provided should be "excepted out of the boundaries and constitute no part of the State of Kansas, until said tribe [possessing any such reservation] shall signify their assent to the President of the United States to be included within said State." And it was further provided, that nothing contained in the constitution of said State shall be construed "to affect the authority of the Government of the United States to make any regulation respecting such Indians, their lands, property or other rights, by treaty, law, or otherwise, which it would have been competent to make had this act never passed."

It is suggested that as these lands were excepted out of the boundaries of the State at the time of the passage of this act, that, therefore, they were not included within the contemplation of the five-per-cent clause above quoted; and that being in a state of reservation, they were not "public lands," within the same contemplation. This view was expressly held by the First Comptroller of the Treasury, in the case of the application of the State of Nebraska, for a like allowance under like provisions of law. In that case, the claim made by the State of Nebraska was disallowed by this office, but an appeal was taken to the Secretary of the Interior, and the decision of this office reversed, and the claim allowed. The Comptroller also expressed the view-that it was not within the province of the Secretary of the Interior to pass upon the legality of this claim. With this question,

of course, I have nothing to do. The only question presented for my consideration is that having reference to these Indian reservations in connection with the five-per-cent, claim made by the State.

It will be noticed that the Nebraska case differs from this in the fact that at the time of the application by the former, the Indian lands were still in a state of reservation, while in this case the Indian title has in all cases been extinguished, and the lands surveyed.

In the matter of the application of the State of Kansas for an allowance of 16th and 36th sections, or equivalent therefor, of these reservations for school purposes, recently decided by this office, I had occasion to examine the questions here raised, and then held that these reservations were, in contemplation of the act referred to, as much a part of the State as any other: and when the Indian title became extinguished, and the lands surveyed with a view to bringing them into market, the State had the same right to its school sections therein as in any other part of the State. From the views then expressed I have seen no good reason for departing. On the contrary, I am confirmed in the views then expressed by the recent decision of the Supreme Court of the United States in the case of Fanne Bucher, Executriz, &c., vs. David Wetherly et al., October Term, 1877. Without repeating the reason then advanced for my conclusions. I may add that in this case the language of the act is explicit that "the net proceeds of sales of all public lands lying within said State, which shall be sold by Congress after the admission of said State into the Union . . . shall be paid to said State."

It may be admitted that these lands were not, at the time of the passage of this act and until the Indian title was extinguished, in contemplation of the preëmption and homestead laws, or of the recent decisions of the Supreme Court, public lands, so that they could be occupied under these laws or even granted by Congress.

But in another sense, broader and more general, they were such, as I think I have shown in my former decision referred to, and as is shown by the use of these words in other acts of Congress relating to like reservations.

For instance, the act of March 3, 1863 (12 Stat., 819, providing for the removal of certain tribes of Indians from Minnesota and Dakota, and the disposal of their lands, provides "that after the survey of said reservations they shall be open to preëmption . . . in the same manner as other public lands. . . . And portions of said reservations, which may not be settled upon, . . . may be sold at public auction as other public lands are sold, after which they shall be subject to sale at private entry as other public lands of the United States."

So these words are used in a like connection and sense in the act of February 28, 1859, making provision for carrying into effect treaty stipulations with various Indian tribes, etc. In the act of July 22, 1854, providing for the establishment of new land districts, and for other purposes (10 Stat., 310), Congress uses the following language:

"SEC. 13. And be it further enacted, That the public lands in the Territory of Nebraska, to which the Indian title shall have been extinguished, . . . and the public lands in the

Territory of Kansas, to which the Indian title shall have been extinguished, shall constitute a new land district. . . . And the President is hereby authorized to cause [the same] to be surveyed . . . as other public lands of the United States."

These illustrations are sufficient to show that Congress has used the words "public lands," with reference to these reservations, as well before the extinguishment of the Indian title as afterwards.

But without discussing the question whether these lands were public lands within the contemplation of the act of admission, at the time of the passage thereof, and before the Indian title was extinguished, it is sufficient to know that they have become such, for, as is seen, the five-per-cent clause contemplates all public lands within said State which shall be sold after its admission.

That these are public lands now, or became such upon the extinguishment of the Indian title, in every sense, is not disputed. That they were public lands in a sense, with fee in the Government, and that it was contemplated by the act admitting the State into the Union that the right of possession in the Indian should be extinguished, and that these lands were in fact a part of the State at all times after said act of admission, with merely a suspension of the political and economical functions of the State over the same, and until such time as the Indian title should be extinguished, I think ought not to be doubted. There is much force in the suggestion made by the counsel for the State, that if it be claimed that these lands did not become part of the State and were not public lands, and are not included in the grant, it might, with the same propriety, be claimed that the right of the State to tax the same, when they became part of the State, was not surrendered.

The allowance of five per cent. on the sale of the public lands in the State of Kansas, can hardly be considered in the nature of a grant, and therefore the law giving it should not be subject to those rules of construction applicable to donations.

The allowance of this sum was rather in the nature of a consideration for certain concessions named in what was in its nature a compact or agreement between the State and the United States. And no presumption can be allowed on the part of the one as against the other of the contracting parties so as to limit the terms of the contract. On the contrary, the terms of agreement should have that fair and liberal construction which shall look only to a full compliance with the original intent of the parties. Conducing to show what this intent was, perhaps it would not be improper to consider the various acts and policy of the Government with reference to like concessions to other States. Without going into this subject in detail, suffice it to say, that in almost if not every instance of the admission of a State into the Union since the admission of the State of Ohio, like or similar grants have been made, and in many of them a much larger sum; and in none of these cases, it is alleged, have Indian reservations, and there were such in many of the States, been excepted out of the terms of the grant or agreement.

The foregoing views, taken in connection with those expressed in my

former decision referred to, I deem sufficient to justify me in the allowance of the claim made by the State.

There is urged another reason for the allowance of this claim, which, in harmony with the opinion of the Secretary of the Interior, before referred to, and with very great deference to the opinion of the Comptroller, I am inclined to think entitled to much weight. The act of Congress, approved March 3, 1857, providing that the Commissioner of the General Land Office shall state an account between the Government and the several States with reference to like grants, and authorizing him to include in his estimate Indian reservations, taken in connection with the act admitting the State of Kansas into the Union, which provides that she shall be admitted on an equal footing with the original States, and that all the laws of the United States not locally inapplicable shall have the same force and effect in this State as in other States in the Union, I am of the opinion would authorize the statement of the account asked for in this case. The reasons for this view are quite fully set out in the opinion of the Secretary, above referred to, and I need not enter upon them here.

I decide, therefore, that the State of Kansas is entitled to five per centum of the net proceeds of sales of all lands heretofore included within Indian reservations in said State, not sold and conveyed in fee by the United States prior to the 29th day of January, 1861.

Very respectfully,

J. A. WILLIAMSON,

Commissioner.

HON. S. J. CRAWFORD,
HON. M. C. CARPENTER,
GEN. E. W. RICE,
Attorneys for the State.

Through the courtesy of Hon. J. A. Williamson, Commissioner of the Land Office, a special clerical force was employed to ascertain the sum due the State under the above decision. It was found to be \$190,800, and demand has been made upon the Hon. Secretary of the Treasury for its payment.

The magnitude of the sum, and the still greater amount contingently involved, made it necessary, not only to submit the case anew, but to obtain a decision corroborative of the one already obtained, and another, affirming the authority of the Treasury Department to pay without an act of appropriation by Congress. Months were consumed in the delay of the decision by the Hon. First Comptroller, which was promised on or before this date, but has not been received.

SALT-SPRING LANDS.

By communication from Hon. Thos. H. Cavanaugh, of January 20, 1878, I was informed of a rumor, current about Salina, that two sections of State land, viz., sections 17 and 6, township 13, range 1, originally certified to the State by the United States, as locations of salt springs Nos. 4 and 5, had been sold, and were now in possession of innocent purchasers. Subsequent investigation brought evidence that the sale had been made by one John W. Berks, of Salina, Kansas; whereupon the following correspondence was, had with that gentleman:

EXECUTIVE OFFICE, January 25, 1878.

SIE: It is reported to me on what seems to be competent authority, that you have sold, or purport to own, section 17, township 13, range 3, and section 6, township 13, range 1, west, of lands in Saline county.

These are original salt-spring lands, certified to the State of Kansas, and now owned by it. Will you be kind enough to inform me if you have any title to said lands; or if you have, as agent, or attorney, become possessed of any title in the interest of others; or negotiated the sale, as such agent or attorney for any party, to present owners or claimants? This information will greatly oblige,

Yours truly,

GEO. T. ANTHONY, Governor.

To John W. Berks, Salina, Kas.

SALINA, KAS., January 28, 1878.

His Excellency, GEO. T. ANTHONY, Governor, &c.:

SIR: I have yours of the 25th inst., in relation to two sections of land in this county, to wit, section 6, township 13, range 1, west, and section 17, township 13, range 3, west, and in reply have to state, that the land as above described, together with the S.E. \(\frac{1}{2}\) of section 8, township 13, range 3, west, was purchased of the State Normal School at Emporia, and that I hold certificates for the said lands from the said school, said certificates being dated December 20, 1877.

I have the honor of remaining,

Your ob't serv't,

JNO. W. BERKS.

EXECUTIVE OFFICE, January 31, 1878.

Sir: Thanking you for your prompt response of the 28th inst., to mine of the 25th, I have to say, that a very grave error has been committed by some one in relation to the lands named in my communication to you. They are original salt lands; the title to which is and ever has been, since the original grant, in the State.

In order to make a prompt and intelligent investigation of the facts in relation to this complication, will you be kind enough to send me a copy of your certificate from the Normal School authorities, which you say bears date December 26th, 1877? Very respectfully,

GEO. T. ANTHONY, Governor.

To John W. Berks, Esq., Salina, Kansas.

SALINA, KANSAS, February 22, 1878.

HON. GEO. T. ANTHONY, Governor:

SIE: In relation to sections 6, 13, 1, W., and 17, 13, 3, W., on which I hold contracts from the State Normal School, have this to state: That I would like to have the investigation that you suggested on the 31st ult. take place immediately, for this reason, among others: I sold section 17 for other property, which is improved. Now, if my claim on 17 is good, the exchange must stand; but if my claim on 17 is not a legal one, I desire to give the party his land again, that he may proceed to make a spring crop. In this crop matter there is no time to spare. I wish to do precisely right, and trust that we will speedily know what that is.

I have the honor of remaining, your obedient servant,

JNO. W. BERKS.

This was referred to the honorable Attorney General, to the end that unlawful occupants should be ejected from the land, and the guilty punished for its unlawful sale. Nothing, so far as I am informed, has yet been done—other and more important transactions of the same parties, involving Normal School lands, having engaged attention.

NORMAL SCHOOL LANDS.

Demand having been made for a patent for a quarter-section of Normal School land, claimed to have been bought and paid for by the party so demanding, and it being found that no report of sale, or proceeds thereof, had been rendered to the Auditor and Treasurer of State, an investigation was at once instituted, which soon developed a painful and disastrous condition of that trust. It was found that notwith-standing it was reported from year to year that these lands could not be sold at the minimum price fixed by law, and that therefore the Legislature must provide means to sustain the Normal School faculty, yet more or less of them had been sold in each year from 1872 to date, and the proceeds thereof embezzled by the agent making the sales.

A meeting of the Board of Regents was called, in relation to which the following correspondence was had:

EMPORIA, KAS., February 27, 1878.

GOVERNOR ANTHONY—Dear Sir: The ex-agent made to me last night, in his private office, what he declares is a full and complete showing of all his doings in land matters connected with Normal and also salt or State lands. These disclosures were made to me in confidence, until such a time as the Board meets. You will please treat this communication confidentially. With the advice of Mr. Cross, I have called a meeting of the Board for next Saturday, at 1 o'clock P. M., (March 2.) Mr. Cross and myself are of the opinion that you ought to meet with the Board, and have such other person or persons to accompany you as, in your judgment, would be advisable. Mr. Cross also writes to you this morning.

Very truly yours,

J. J. WRIGHT.

EXECUTIVE OFFICE, February 28, 1878.

SIR: Referring to yours of yesterday's date, in which you state that Mr. Bancroft has made to you what he claims to be a full and complete statement of his transactions in connection with the Normal School lands, and that you have called a meeting of the full Board of Regents for Saturday, this week, I have to say that I will meet with you at that time if it is possible; but in no event must your Board compromise with the delinquent, or compound his crime by any settlement or adjustment that shall shield him from the full force of the law in a criminal prosecution.

The wrong that has been been done, or appears to have been done, is such an one that it is due to the State, it is due to you, it is due to every one who is connected with it, that a most searching and rigid investigation be had, let the consequences fall where they may.

Very respectfully,

GEO. T. ANTHONY, Governor.

To Hon. J. J. Wright, Emporia.

Accompanied by Auditor Bonebrake, I attended the meeting of Regents, as requested; and late at night it was determined that an arrest of the agent should be made the following morning. Deeming the case one of very great importance, and knowing that prosecution would meet with vigorous resistance, the following letters were addressed to the Attorney General, and correspondence had with Hon. Almerin Gillett, which resulted in employing him as associate counsel:

EXECUTIVE OFFICE, March 4, 1878.

SIE: It has come to my knowledge that E. P. Bancroft, agent or pretended agent of the Regents of the Emporia Normal School, for the sale of lands belonging to that institution, has sold lands without the knowledge of the Board, without its authority as alleged by them, and embezzled the funds. In addition to this offense, he has also conspired with others in the sale of lands belonging to the State.

A prosecution, criminal and civil, has been directed to be commenced against him, and I have employed Hon. Almerin Gillett, of Emporia, as associate counsel with you; the Board to be represented by Hon. J. H. Crichton, as an attorney on its part, who also appears as complainant in the prosecution.

I desire that you give this immediate attention, to the end that all wrongs committed by Mr. Bancroft, or other parties connected with him, may be brought to light, and adequate punishment follow such crimes.

Mr. Bancroft was to have been arrested yesterday. You shall be advised as soon as I have information.

Very respectfully, Geo. T. Anthony, Governor. Hon, Willard Davis, Attorney General, State of Kansas.

EXECUTIVE OFFICE, March 4, 1878.

SIE: In the case of a complaint to be made in the name of the State vs. E. P. Bancroft, charging him with embezzlement of Normal School Funds, I desire you to act as associate counsel to the Atttorney General; and to this end wish this letter to be received as an evidence of your employment, subject to your acceptance.

You are doubtless aware that whilst the statutes of the State provide for the employment of counsel, at the discretion of the Executive, there is no existing appropriation to meet such liability on the part of the State.

Whether the contingent fund placed at my disposal will be adequate to meet this and other necessary expenditures, I am not at all certain, and your services may become a claim before the next Legislature.

You will please notify me at your earliest convenience, your acceptance or rejection of this proposition, together with a statement of your fees in the conduct of the case.

Very respectfully,

GEO. T. ANTHONY, Governor.

Hon. Almerin Gillett, Emporia, Kansas.

EMPORIA, KANSAS, March 16, 1878.

SIR: Your Excellency's favor of March 3d, inst., was placed in my hands on the 11th inst., and owing to my absence a formal answer was impossible until now. . . . I accept the appointment and its accompanying responsibilities, with a sincere desire on my part that the event will prove that the public service has not suffered thereby. . . . In event of the contingencies stated in your valued favor, I should think that a fair fee for seeing the case through, (as it will without doubt go to the Supreme Court,) would be five hundred dollars. This being a test case of this kind under the law of 1873, I expect to give it the whole attention that its importance demands.

Hoping these terms may meet your approval, I have the honor to remain your Excellency's very humble and obedient servant,

ALMERIN GILLETT.

To Hon. Geo. T. Anthony, Governor, Topeka, Kas.

TRIAL AND CONVICTION.

Every influence was brought to bear to secure a continuance of the case, at the time set for his trial. Assurances were urged that if given time, he could, through friends, make good to the State the amount embezzled; whereas, if forced to trial, all hopes of a recovery of the money would be at an end. It is proper for me to say in this connection, that I regarded a conviction as of much greater value to the State as an example and a warning, than a return of the money with a release of the offender, even had there been a reasonable hope of reimbursement, which was not the case, and I so stated to the attorneys of the State, as follows:

EXECUTIVE OFFICE, September 6, 1878.

SIE: Referring to the case of The State of Kansas vs. E. P. Bancroft, charged with embezzlement of State Normal School funds, I respectfully urge upon you the importance of bringing him to trial at the present term of court.

Information has reached me that it is the purpose of his attorney to urge a continuance of the case. I can conceive of no good reason for such continuance.

The preliminary examination was held, and all the technical points exhaustively examined into, and passed upon by the court, and the case continued to the present term for trial. There can be no reason in the interest of the State, or demands of justice, for a continuance. The people look to you, and expect from you, a vigilant prosecution, and nothing else will satisfy the ends of justice, or the demands of the people, whom you represent. I am satisfied that a continuance of the case can only be sought as a means of blunting the edge of justice by time, and wearying the prosecution, to the end that a compromise may be had, which will be in effect the compounding of a great crime. Such examples have been too frequent in this class of cases, and there should be an example at least in Kansas, to show the people that a man who would violate a sacred, public trust, and embezzle funds set aside by the General Government for the education of the children of a State, should be treated with the same measure of punishment at least, as is meted out to the man who steals bread to feed a famished family.

This letter is not inspired by any personal feeling against the accused, nor from any desire to deprive him of all just and honorable opportunities for defense; but by an obligation to the State and to its people, to see to it that criminals, whose prosecution rests with us, shall not be allowed to escape through the meshes of the law.

Very respectfully, Geo. T. ANTHONY, Governor. Hon. Willard Davis, Attorney General, and Associate Attorneys.

[Telegram.]

September 6, 1878.

HON. WILLARD DAVIS, Emporia, Kas.: Every effort for delay in trial of Bancroft shall be resisted to the uttermost. Have written you.

GEO. T. ANTHONY.

Mr. Bancroft was convicted; and I may now be allowed to refer to the charges made against me, of relentless prosecution in his arrest and trial, that it was not a pleasing, but a painful duty, to assume the attitude I did. No one can sympathize more sincerely with the friends of the convicted, or more heartily deplore the misfortune which has befallen himself and his family, than myself.

The condition of these Normal School lands requires your patient attention. Innocent parties are now in possession of many of those sold, who have paid in part or in full for the land to Mr. Bancroft after he ceased to be an agent. In view of the loose manner in which the trust was managed, they should be protected. Others hold contracts which I believe to be fraudulent in their inception, and should not be respected. The attorneys are diligently at work, and will, I hope, be able to give you information in time for action before your adjournment.

STATE NORMAL SCHOOL.

The State Normal School at Emporia suffered a serious impairment of its endowment through the default of Mr. Bancroft, its land agent. Ostensibly this loss is about \$8,000, but it is in fact more than double that sum. The lands realized but little more than half their current value at the time of sale. In fact, it is now clearly shown that in some instances a sale was negotiated at eight or ten dollars peracre to a second purchaser, before the sale had been made at five dollars by Mr. Bancroft to the party first purchasing. If the lands sold were to-day in possession of the school, they would sell for a sum \$20,000 greater than that realized.

This loss was quickly followed by a still greater disaster, in the burning of the school building. It has been the policy

of the State to insure its own property, hence this burning involves a total loss of the value of the building.

The question of reconstruction will be one for you to consider. Whatever might be said of it, were the question an original one, I am convinced that the State cannot afford to have this important educational land-mark obliterated. It marks the devotion and liberality of a people at a time when its cost was a public sacrifice an hundred fold greater than that of its reconstruction at this time. I hope it may be restored by you in its original dimensions and form. There are other and more potent reasons for this than the wish of the people residing in that portion of the State, or the vested right of Emporia, which city has expended liberal sums in its aid. The State as a whole should be a unit in holding intact all the original State institutions. Let none of them be lost.

MANAGEMENT OF SCHOOL LANDS.

The State holds no trust more sacred, if indeed any of greater magnitude, than these lands. The value of this endowment of common schools, and the necessity for business method in its management and protection, seem to have been lost sight of by legislators and people.

By act of admission the State received, exclusive of school lands within Indian reservations, 2,706,090.98 acres. To this may be added 265,000 acres secured by the State Agent, as heretofore stated, making a grand total of 2,971,090.98 acres. Of this, as shown by the current report of the State Auditor, only 215,217 acres have been sold and patented. How much is sold and under valid contract, I regret to say is beyond human ken. So loose, diffuse and untrustworthy is the present system of sale, that no data worthy of an approximate estimate exists.

The average price per acre realized from sales to date is \$4.23. Estimating the contracted and unsold lands at same rate, and we have the sum of \$12,567,714.85 as the proceeds of school lands alone as a permanent school fund. No man with faith in Kansas sufficient to justify his election as a

representative but will admit that these lands will ultimately realize greatly more than this, if managed with integrity and business prudence. I have no hesitancy in saying, that from these lands and other sources of income to the permanent school fund, it will reach the sum of \$20,000,000.

But to do this, a radical change must be made in the manner of sale and system of accounts now governing. Our present laws provide no system, fix no responsibility, secure no protection. The contract and original papers connected therewith are neither passed upon nor sent to a State officer for record. Appraisements are irresponsible and capricious always, and too frequently made with reference to the wants of a purchaser instead of the interest of the State. The result is looseness in accountability, neglect of duty, and an ultimate waste and loss beyond estimate.

This state of things must continue until your wisdom shall provide a comprehensive system in accord with the imperative demands of business method and accountability. To devise such system, and put it in place of existing laws, I believe to be the most important work you can do for the State.

PARDONS.

Section 3 of chapter 73, Revised Statutes, provides that the Governor "shall communicate to both houses of the Legislature a list of all persons pardoned by him during the preceding year, with a statement of the offenses of which each was convicted, the time of imprisonment, or amount of fine, and the condition, if any, upon which such pardon was granted."

Deeming this requirement both mandatory and wise, it is complied with, for the first time, I believe, in "Exhibit B" herewith.

Believing that other facts than these specifically named would be of value, I give you a brief, in each case, of reasons for clemency. I believe that the law should require this statement of reasons, as well as of fact, from every Executive who exercises the pardoning power, until such time as an amended law provides a court of pardons.

The practice of vesting the pardoning power in the Governor is based upon the theory of the divine right of rulers, which makes the offense run against the king, and therefore entitles him to exercise the power of elemency.

With us the right to govern is derived from the governed, and the offense of the criminal runs against the ople, who alone can exercise the power of pardon. So delicate and doubtful a prerogative should be hedged about by laws, guarding its exercise, and fixing rigid rules of accountability for its use.

FUGITIVES FROM JUSTICE.

In July, 1877, information was received from one Gregory, that Samuel Lappin and C. G. Scrafford were at Callao, in Peru, South America, under assumed names. With this information, I felt it to be an imperative duty to secure, if possible, their return. The Hon. Attorney General prepared the necessary papers, and demand was made, but not before both had fled from Callao.

Subsequently, Mr. Scrafford was arrested, and while en route to this country was released from the officer in charge, by the Governor of Panama, on the claim that a citizen could not be held under arrest, whilst in transitu between two countries, in an intervening one having no treaty obligations with the others to surrender fugitives. The United States protested against this construction of international obligations, and demanded a rearrest of Mr. Scrafford, and his surrender to the United States authorities; and he would undoubtedly have been so returned, had he not voluntarily surrendered himself to the State authorities here.

The Hon. Secretary of State in a communication says: "The interference of the Governor of Panama in the matter is regarded as having been unnecessary and officious. A note to this effect has been addressed to the Minister of Foreign Affairs of Colombia, in which he has been requested to express to the Governor of Panama the displeasure of the Government of Colombia at his course. The note also expresses an expectation that Scrafford will again be arrested and held for transportation to this country for trial."

The trial of Mr. Scrafford, which has just terminated in conviction, has devolved an immense labor upon the Attorney General, who had to search for evidence and secure the attendance of unwilling witnesses, under the most adverse It has also involved considerable cost, which circumstances. should be promptly provided for, on statement of account, which will be furnished you by the Attorney General. Hon. A. M. F. Randolph, Attorney General at the time the offense was committed, and whose personal knowledge was of great value in securing testimony, cheerfully assisted in the trial as associate attorney, on the invitation of Attorney-General He should be reimbursed, and paid for his valuable services. Geo. R. Peck was also associated in the trial, by an engagement of my predecessor.

STRIKE OF RAILROAD EMPLOYES.

On the 4th of April last, a strike of engineers and firemen occurred on the Atchison, Topeka & Santa Fé Railroad, which soon assumed proportion requiring the interposition of State authority. An event so unusual, and one involving the use of this extreme power, with its incident cost, will warrant, if, indeed, it does not require, a statement of its cause and attendant circumstances.

To the end that you may have full and complete information, a carefully-collated record has been prepared and herewith published, as "Exhibit A." In reading this exhibit, it will not escape your notice that the attorney, sheriff, mayor and other officers of Lyon county and Emporia city deny, in a vigorous and threatening protest, the legal and rightful power of the Executive to interfere by military force in the execution of laws, except upon the demand of the local civil officers, after the full power of such municipal authority has been exhausted without avail. They assert, substantially, that the act of a Governor in sending the military, unbidden by them, for such purpose, works a legal wrong and an official insult to the people of county or city where sent; that such sending is the equivalent of an invasion by an enemy, justifying the forcible ejectment of such military intruders.

This raises a question of vital concern to the State—a question you should carefully consider, to the end, that if the constitution and the statutes of the State are in conflict, or either of them ambiguous in terms, on so important a subject, they may be put in harmony and made plain as soon as possible.

The Governor's powers, in connection with the enforcement of the laws, as understood by me, are not only determined but very clearly defined by the constitution. Section 3 of article 8, reads: "The supreme executive power of the State shall be vested in the Governor; who shall see that the laws are faithfully executed."

If power thus vested in, and duty enjoined upon the Executive had been left without means to assert the one and perform the other, our constitution would have been a mockery of law and an insult to reason. But this is not the case. Ample means are placed in his hands to redeem all his obligations in this connection, by section 4, article 8, which says: "The Governor shall be commander-in-chief, and shall have power to call out the militia to execute the laws, to suppress insurrection, and to repel invasion."

The powers and duties of local municipal officers are fixed and defined by statute. It is their duty to execute the law; and when men, as in this case, confederate and conspire against it, extreme powers are given them by article 8, chapter 31, of the statutes, even to the calling upon every citizen within their jurisdiction to aid them in arresting offenders. But if they fail or refuse to do this duty, there is no power to compel them to do it. The Governor has no more control over them than they have over him. Neither are subject to the order, direction, or advice even, of the other. If there is any act of mine, in this case, subject to criticism, it is that of calling upon local municipal officers to do their duty. Although simply advisory and suggestive, they still would have been justified in resenting it as an unwarrantable interference.

There should be no confusion where all is so plain. It is the duty of local officers to enforce law and preserve order. But whenever and wherever they neglect or refuse to do this, the constitutional obligation of the Governor compels him to step in with the militia—which force the constitution has placed in his hands for the purpose—and execute the law. The necessity for action, and the mode of proceeding, must be determined by the judgment and discretion of the Governor, subject only to the limitations fixed by the constitution.

I assumed the responsibility of meeting concerted lawlessness and organized crime with the means at my command for that purpose. If the facts, as you find them of record, did not justify the use of such means, it was an error for which no apology is due, for it was an error in the interest of law, and against anarchy.

LIABILITIES INCURRED.

The liability incurred in the use of militia, as sustained by adequate vouchers in the Executive office, was as follows:

Transportation of Capt. Ziegler's company from Independence to Lawrence, via Leavenworth, Lawrence & Galveston Railroad, \$870.75; transportation of Capt. Walkinshaw's company from Leavenworth to Topeka, via Kansas Pacific Railroad, \$203.50; subsistence of troops at Topeka and Emporia, \$341.90; telegraphing, transporting arms, etc., \$107.60; payment of soldiers for service, \$978.00; total, \$2,501.75.

Cost of transportation is due to the companies furnishing it. Cost of subsistence, pay of men, and all expenses except transportation, were met by an advance of moneys by Atchison, Topeka & Santa Fé Railroad Company, on my request and obligation, as subsistence could not be obtained without present payment, and the men were not able to wait legislative action for their compensation.

The appropriations should run to the parties named—\$870.75 to the Leavenworth, Lawrence & Galveston Railroad Company; \$203.50 to the Kansas' Pacific Railroad Company; and \$1,427.50 to the Atchison, Topeka & Santa Fé Railroad Company.

STATE ARMORY.

By an act of March 13, 1877, the sum of two thousand dollars was appropriated and made subject to my order for the purpose of erecting a State Armory. The plans and specifications were made without cost to the State, through the courtesy of E. T. Carr, Esq., architect. The contract was let to Messrs. Lindell and Allen, of Topeka, for labor and material to complete the building for the sum of the appropriation, \$2,000.

Subsequently a sub-contract was made with the same parties for a slate roof, and stone steps, in place of wood, at a cost of \$130, which was paid from my contingent fund. The contracts, plans and specifications will be found on file at the Executive office, if further information is required.

INTER-STATE RELATIONS.

Nothing has occurred to mar our relations with sister States, except with the State of Ohio in relation to obligations arising under the inter-State extradition laws. This controversy having been permitted to find its way to the public from the Executive Office of Ohio, and presented through public journals in a distorted form, I deem it of sufficient importance to lay before you the facts.

On December 8, 1877, I required the surrender of one Geo. I. Hopkins, on papers carefully prepared by Isaac N. King, Esq., County Attorney of Sumner county. This demand was refused by the Governor of Ohio, upon opinion of Attorney General of that State, as shown by letter and opinion following:

STATE OF OHIO, EXECUTIVE DEPARTMENT, COLUMBUS, January 26, 1878.

To the Governor of Kansas:

YOUR EXCELLENCY: Your requisition upon the Governor of this State for the delivery of George I. Hopkins, was yesterday presented to this Department.

The Governor declined, upon the advice of the Attorney General, to

issue upon the requisition. I have the honor to inclose herewith a transcript of the opinion.

I am, your Excellency's obedient servant,

ROBT. F. HURLBUTT,

Private Secretary to Governor of Ohio.

[Opinion of Attorney General.]
STATE OF OHIO, EXECUTIVE DEPARTMENT, COLUMBUS, January 25, A. D. 1878.

To His Excellency R. M. Bishop, Governor:

I have given most careful attention to the sufficiency of the requisition and accompanying papers of the Governor of Kansas upon yourself, for a warrant for the arrest of one George I. Hopkins now a resident of Ohio, to be delivered up to an agent of the State of Kansas, to be transported to said State for trial for the alleged crime of seduction.

The commonwealth of Ohio is and has ever been watchful and jealous of the personal liberty of her citizens. She permits no one to be deprived of his liberty without "due process of law."

The right to demand of the Governor of a State or Territory that a citizen of his State or Territory be delivered up and transported to another State or Territory for trial, is an extraordinary right, and only to be exercised where the federal laws are complied with in the most strict manner.

The statute of the United States provides that the right of the Executive of a State or Territory to demand of an Executive of another State or Territory for the return of a fugitive from justice, for trial, depends upon the fact whether the alleged fugitive has been *indicted* for the offense, or is charged by affidavit before a magistrate.

In the case in hand, the party sought to be transported to another State is charged neither by indictment nor affidavit, but by information—a mode of presenting a party with an offense, unknown to the laws of the United States.

I must, therefore, say that the warrant should not issue.

Respectfully,

(Signed)

ISAIAH PILLARS, Attorney General.

On January 25, 1878, a second demand for Hopkins was made, this time upon an affidavit before a magistrate, which was in time refused in writing, as follows:

STATE OF OHIO, EXECUTIVE DEPARTMENT, COLUMBUS, April 6, 1878.

To His Excellency Governor Anthony, Topeka, Kansas.

DEAR SIE: The warrant asked for the arrest of Geo. I. Hopkins has been submitted to the Attorney General for his opinion, and he indorses it, "Not approved, for reasons heretofore assigned, when application was before made for same party for same offense."

I will only add; that it is a case not coming under the criminal statutes of Ohio, and hence declined by the Governor.

Yours, respectfully,

ALBERT ALLEN, Acting Private Sec'y.

This second refusal was very justly protested against by Isaac N. King, Esq., the County Attorney of Sumner county, who had prepared the papers each time with great care, and in strict accordance with law. He says: . . . "You have issued two requisitions directed to the Governor of the said State of Ohio, in this matter, in accordance with the laws of our State; and the Governor of Ohio has twice refused to issue a warrant for the arrest of the said Hopkins, thus shielding him from the punishment he so justly deserves, on account of his terrible crime. I would now ask that you as Governor take some steps in this matter to secure the return of said fugitive for trial, under the laws he has violated. Please advise me of what steps you will take in this matter."

It having been uniformly held that while this law of Congress created an unconditional obligation upon the several States, whenever a proper case was presented, yet, no means were provided for its enforcement against an Executive who refused compliance therewith. There was nothing left but to decline recognition of a like obligation in return. This I took occasion to do in October last, in words following:

EXECUTIVE DEPARTMENT, TOPEKA, Nov. 8, 1878.

SIB: Referring to your requisition, under date of 23d October, 1878, for one Peter C. Becker, charged with embezzlement in the county of Butler in your State, which was presented by Mr. M. Thomas, your authorized agent to receive him, in connection with my refusal to issue a warrant for the arrest and surrender of the said alleged criminal, I beg to state for your information the reasons for such refusal.

On December 8, 1877, I issued a requisition for one George I. Hopkins, charged with crime in this State, who had taken refuge, and was then a fugitive from justice, and in the State of Ohio.

Under date of January 26, 1878, I was informed by your private secretary that you declined to surrender the culprit, for reasons set forth in an opinion of the Hon. Attorney General of your State, a copy of which said opinion was transmitted for my information.

This opinion of the learned attorney, after reciting the fact of the demand, and expressing the extreme jealousy of the Commonwealth of Ohio for the personal liberty of her citizens, and its purpose to see that no one of them was deprived of such liberty without due process of law, and further declaring that the right of a Governor of a State to demand the surrender of a fugitive by another State was an "extraordinary right, only to be admitted by the surrendering State when the federal laws were com-

plied with in the most strict manner," concludes, that whereas, my demand was based upon an *information* instead of an "indictment" or "complaint," before a justice of the peace, there was nothing to justify the demand or to sustain the delivery, an "information being a mode of presenting a party with an offense, unknown to the laws of the United States.',

Not wishing to question the opinion of your Attorney General, yet dissenting from his assumption that proceeding by information was "a mode unknown to the laws of the United States and in the practice of the Federal Courta," I returned the papers to the proper authorities for correction, as indicated by his objections.

On March 3, 1878, a second requisition was made, this time based upon an "affidavit before a magistrate," in strict accord with the requirements of the United States statutes, and the suggestions of the learned attorney. This second demand was refused by you, your Secretary giving as a reason therefor that the question had been submitted to the Attorney General for his opinion, and he indorsed it, "Not approved, for reasons Heretofore assigned, when application was before made for same offense."

This in the face of the fact that the first refusal was because the demand did not rest upon an affidavit before a magistrate, or precisely what this second demand refused did rest on.

To this fictitious objection of the Attorney General, you volunteer an additional reason for your refusal, viz.: "That it is a case not coming under: the criminal statutes of Ohio, and hence denied by the Governor."

In view of the uniform interpretation of the obligation of States by Legislatures and courts, to the effect that it is enough, if "a requisition is supported by an indictment or complaint, duly accompanied by executive averment that the particular offense is a crime in the State where it was committed," and that for the Governor, upon whom requisition is made, "it is immaterial to consider what is the nature of the offense charged against the prisoner, for we have only to consider, whether it be a crime according to the law of the State from which the party is alleged to have been a fugitive." (See 6 Penn. Law Journal, 412, case of John S. Clark; New York, 9 Wend., 212; case of Haywood, Sup. Court of New York, 1 Am. Law Jour., N. S., 271, 1848; case of Johnson v. Riley, Sup. Court of Georgia, 13 Ga., 97; case of Fetter, Sup. Court N. J., 3 Zab., 311; and the Sup. Court of Maine 6 Am. Law Jour., 226.)

This can only be construed as a determination on the part of the State of Ohio to refuse a recognition of its obligations to the State of Kansas in this relation. If it be true, as you assert, that the laws of Ohio do not recognize seduction under the revolting conditions presented in this case as a crime, I still deny the right of that State to refuse a rendition of such criminal for punishment in States where a higher morality has denounced a penalty against it as a crime hardly less heinous than that of murder.

The whole correspondence conveys so conclusively a fixed purpose to refuse a recognition of the rights of the Commonwealth of Kansas, as to compel me, from a sense of duty, to decline your demands, made under and by virtue of act of inter-State comity, which the State of Ohio refused to respect.

Deeply regretting the circumstances which have forced this action as the only means of vindicating the honor of the State,

I am, sir, very respectfully,

(Signed) GEO. T. ANTHONY, Governor.

To His Excellency R. M. Bishop, Governor of Ohio.

STATE OF OHIO, EXECUTIVE OFFICE, COLUMBUS, Nov. 21, 1878.

To His Excellency Governor Anthony, Topeka, Kansas:

Size: Yours of 8th inst. received, stating your reasons for declining to honor a requisition made upon you by me for the surrender of one Peter C. Becker, charged with embezzlement. My own absence East has been one of the causes of my delay in answering. In addition to this, the Attorney General was absent upon my return home. I have, however, submitted your letter to him, and herewith inclose you his reply, which speaks for itself. I very much regret the circumstance has occurred, as my desire is to remain on the most amicable relations not only with your State, but all other States. The warrant for Hopkins's arrest will be issued whenever again demanded.

Respectfully yours,

RICHARD M. BISHOP, Governor.

STATE OF OHIO, ATTORNEY GENERAL'S OFFICE, COLUMBUS, November 20, 1878.

To His Excellency R. M. Bishop, Governor of Ohio:

SIE: The communication from his Excellency Geo. T. Anthony, Governor of Kansas, of the date of the 8th inst., handed to me, has been carefully read.

His Excellency, the Governor of Kansas, certainly has cause to complain for not issuing a warrant for the arrest and extradition of George I. Hopkins, an alleged fugitive from the State of Kansas, in pursuance with the requisition of the Governor of Kansas upon the Governor of Ohio, of the date of March 23d, 1878. The blame in the matter attaches to this office.

The mistake occurred as follows: On January 26th, 1878, a requisition issued by the Governor of Kansas upon the Governor of Ohio, for the extradition of said Hopkins, based upon an information, was submitted to me under the rules of your office, for approval.

I disapproved the issuing of a warrant upon said requisition, for the reason stated in my opinion of the date of January 26th, 1878, a copy of which was transmitted to his Excellency Governor Anthony.

When the requisition of the date of March 23, 1878, was presented to me for my approval, I was informed that it was but a duplicate of the requisition in the same matter already passed upon; and thereupon, supposing such to be the fact, I indorsed the requisition, "Not approved, for reasons

heretofore assigned, when application was heretofore made for same party for same offense."

Upon examination, it appears that the requisition was based upon an affidavit charging the offense, and the warrant should have issued; and I now recommend that the same issue.

With this explanation and correction, I hope the amicable relations between the coëqual States of Kansas and Ohio may be restored.

Your Excellency's obedient servant.

ISAIAH PILLARS, Attorney General of Ohio.

INDIAN RAID.

In September and October last occurred an Indian raid resulting in loss of life and property at once terrible and disastrous. About Sept. 8th, it was rumored that a band of Northern Chevenne Indians had left their reservation, near Fort Reno, and were moving toward this State. This report was promptly communicated to Gen. John Pope, commanding this military department, who assured me that there was no danger. He represented that the Indians in question had been driven out by hunger in search of food, that through neglect, or worse, had been withheld from them by the Government. He assured me, also, in most positive terms, of his disposition and ability to protect settlers from harm, should the Indians come into the State.

Little was heard further until Sept. 18th, when the following message was received by me at Leavenworth:

DODGE CITY, Sept. 18, 1878.

GEO. T. ANTHONY, Governor: Three hundred Indians are driving off stock and killing herders. They are now within six miles of our city. We are without arms, having equipped numbers who have gone south. Can you send us arms and ammunition? Situation alarming. We are power-JAMES KELLY, Mayor. less without arms and ammunition.

C. W. WILLETT. H. E. GREYDEN.

D. SHEELY.

This was at once communicated to Gen. Pope by me, and responded to as follows:

[Telegram to Gen. Pope.] **SEPTEMBER 18, 1878.**

MAJ. GEN. JOHN POPE, Fort Leavenworth: Following just received from Dodge City: "Three hundred Indians are driving off stock and killing herders. They are now within six miles of our city. Situation alarming. We are powerless and unprotected. Can you send us arms and ammunition?" Are these reports true, and is State intervention necessary to protect life and property? Answer here. GEO. T. ANTHONY.

[Gen. Pope's reply.]

FORT LEAVENWORTH, KAS., Sept. 18, 1878.

GOV. ANTHONY: Gen. Pope in town. Telegram just received from commanding officer Fort Dodge, who has for a week had his orders about the Indians, makes no mention of their being in the vicinity.

Platt, A. A. G.

The parties were immediately directed to look to the commanding officer at Fort Dodge for assistance, and Gen. Pope advised accordingly, as follows:

[Dispatch to Mayor Kelly, Dodge City.]

LEAVENWORTH, KAS., Sept. 18, 1878.

To James Kelly and others, Dodge City, Kas.: I have your demand for arms. Have you called on commanding officer at Fort Dodge for protection? He does not report trouble to Gen. Pope. Will send on special train arms in charge of Adjt.-Gen. Noble.

Geo. T. Anthony.

[Dispatch to Gen. Pope.]

SEPTEMBER 18, 1878.

GEN. JNO. POPE, Fort Leavenworth: Have referred parties calling for aid to commanding officer, Fort Dodge, and promising arms if U. S. forces could not protect them. Special to Kansas City press reports murders by Indians near Dodge City.

GEO. T. ANTHONY, Governor.

Soon after the above, a second and still more urgent demand came from Mayor Kelly, and was followed by a second one upon Gen. Pope, and the inauguration of measures to extend the aid required if the General failed to respond, as the following telegrams will more fully show:

[Dispatch from Dodge City.]

DODGE CITY, KAS., Sept. 18, 1878.

GOV. GEO. T. ANTHONY: Indians are murdering and burning houses within three miles of town. All the arms we have have been sent out: can you send us arms and ammunition immediately?

H. SHINN. R. W. EVANS. T. S. McCarthy.

JAMES C. CONNOR.

C. W. WILLETT.

[Dispatch to Gen. Pope.]

LEAVENWORTH, KAS., Sept. 18, 1878.

GEN. JNO. POPE, Fort Leavenworth, Kas.: Mayor and citizens say Indians are murdering and burning houses within three miles of Dodge City.

I must send arms and ammunition if you have not an adequate force there to protect citizens. Answer.

GEO. T. ANTHONY.

[Dispatch to General-Manager Strong.]

SEPTEMBER 18, 1878.

W. B. STRONG, Gen'l Manager A. T. & S. F. R. R., Topeka: Can you send special with arms and ammunition in charge of Adjutant-General Noble, to-night?

GEO. T. ANTHONY.

[Mr. Strong's reply.]

TOPEKA, KAS., Sept. 18, 1878.

GEO. T. ANTHONY: Yes, sir. Name the hour you wish to have the train start, and the place you wish to reach.

W. B. STRONG.

Mayor Kelly answered my telegram, referring him tocommanding officer at Fort Dodge, in words following:

DODGE CITY, Sept. 18, 1878;

GOV. ANTHONY: No U. S. troops here, and no arms at post. The country filled with Indians. Send arms immediately—breech-loaders.

JAMES H. KELLY, Mayor Dodge City.

Upon receipt of this I at once visited Gen. Pope, who again asserted that it was a "scare," and said there were not more than seventy-five warriors in the party, and they absolutely free from hostile intent upon the lives of settlers. His information also was to the effect that no Indians had been within many miles of Dodge City, and the report to me of depredations on that day entirely without foundation. On this authentic information the sending of arms was deferred until the following day. Mayor Kelly was advised of Gen. Pope's views, and was offered arms, if still required, as follows:

[Dispatch to Mayor Kelly.]

SEPTEMBER 19, 1878.

JAMES H. KELLY, Mayor Dodge City, Kas.: Adjutant General will come with arms and ammunition by to-day's train, if you still deem it necessary. Gen. Pope says there are not seventy-five Indians now at large.

Answer at Topeka.

GEO. T. Anthony.

[Dispatch to Manager Strong.]

SEPTEMBER 19, 1878.

W. B. STRONG, General Manager, Topeka: Adjutant General will godown with arms on passenger train to-day. Please provide for him.

GEO. T. ANTHONY.

Adjutant-General Noble went out with arms and ammunition, as above indicated, and issued them in numbers and manner shown by the following report;

DODGE CITY, KAS., Oct. 20, 1878.

GOV. GEO. T. ANTHONY: Have issued one hundred stand of arms and seven thousand rounds of ammunition to Mayor of Dodge; forty stand and two thousand ammunition to citizens of Cimarron; also, sixty stand and ammunition to Capt. Friedley, of Medicine Lodge, upon urgent request. All quiet at Dodge now, and citizens feel confident that they can meet any

emergency. Rumors that Indians are near Lakin, and United States troops concentrating at other points. Shall return to-night, as nothing further can be accomplished by staying.

P. S. Noble, Adjutant General.

I was at Iuka, Pratt county, on the 24th of September, and found much excitement; some settlers actually leaving from points not less than twenty miles south and west of that place. To get the truth and allay fears, I sent a trusty messenger to Capt. Johnson at once, with a request that they go to Sun City and report the result of careful investigation. Capt. Johnson reported the next day, as follows:

Sept. 25, 1878.

MR. ANTHONY: I received a letter from you this morning, handed me by our friend Mr. Nelson. Was pleased to see the interest you take in our Indian scare, which is much smaller than reported. Mr. Nelson and myself went to Sun City, and found out all particulars in regard to the Indian trouble. Mr. Nelson has the names of killed and wounded, except two men. I anticipate no further trouble from Indians.

A. J. JOHNSON.

Mr. Nelson reported three killed and three wounded, and fully sustained the views of General Pope, that the Indians were only in quest of food, ponies and arms, and were not disposed to attack any one until resisted in such taking of property.

THEY GO NORTH.

On October 2d the following telegrams were received by me at Leavenworth:

ELLIS, October 2, 1878.

GOV. ANTHONY: Reliable information has just been received that eighteen white men were killed this morning by Indians, near Buffalo. Please send immediately one hundred guns and ammunition to Ellis, together with such other assistance as you can afford. We can furnish a number of volunteers.

DAVID RATHBONE.

Ellis, October 2, 1878.

GEO. T. ANTHONY: Cheyennes depredating western Kansas; troops have scattered them, and made matters worse. Our men need arms badly; help us.

J. C. Henry,

Secretary Western Kansas Stock Association.

Response was immediately made that arms would be sent and Adjutant General directed accordingly, by wire:

[Telegram to Mr. Henry.]

LEAVENWORTH, October 2, 1878.

J. C. HENRY AND DAVID RATHBONE, Ellis, Kas.: Will send Adjutant General with arms to-night. Keep me fully advised of the situation.

GEO. T. ANTHONY.

[Telegram to Adjutant General.]

LEAVENWORTH, KAS., Oct. 2, 1878.

P. S. Noble, Adjutant General: Be prepared to go west on Kansas Pacific train to-night, with one hundred and fifty arms and ammunition, if ordered.

Geo. T. Anthony.

[Telegram to Sup't Oakes.]

LEAVENWORTH, KAS., Oct. 2, 1878.

T. F. Oakes, Gen'l Supt. K. P. R. R., Kansas City: Call for arms to resist Indians at Ellis. Will you authorize passenger train to take them to-night?

Geo. T. Anthony.

[Sup't Oakes's reply.]

Hugo, Col., Oct. 2, 1878.

GEO. T. ANTHONY: This will authorize you to ship the arms to Ellis by passenger train, free of charges.

T. F. OAKES.

I went at once to Fort Leavenworth and had an interview with Gen. Pope. He gave me particulars of the movement of Indians, and of troops in pursuit. Did not believe the report of massacre, and authorized me to say to all parties on line of Kansas Pacific Railroad that the Indians had all left the State with military in close pursuit—"Not a hostile Indian within a hundred miles." This interview was immediately reported, and additional information sought.

[Telegram to Mr. Henry.]

LEAVENWORTH, Oct. 2, 1878.

J. C. HENRY AND DAVID RATHBONE, Ellis, Kansas: Had interview with General Pope, who says: No hostile Indians in Kansas; no Cheyennes within a hundred miles of Buffalo to-day. Have you confirmation of dispatches sent me? Answer.

GEO. T. Anthony.

[Telegram to Station Agent.]

LEAVENWORTH, Oct. 2, 1878.

STATION AGENT, Buffalo Station, Kansas: Reported eighteen citizens killed by Indians to-day near you. Give me essential facts by wire at once-GEO. T. ANTHONY, Governor.

[Station Agent's reply.]

Buffalo, Kas., Oct. 2, 1878.

GEO. T. ANTHONY, Governor: J. C. Henry has given you all the particulars.

C. T. Lyon, Agent.

Telegrams were immediately received fully confirming reports of outrages made earlier in the day, and claiming that Indians were still in the vicinity:

[Telegram from Mr. Keeny.]

WAKEENY, Kas., October 3, 1878.

GEO. T. ANTHONY: Three Indians seen this morning eleven miles north from here by Clark, whose word is as good as General Pope's.

J. F. KEENY.

[Telegram from Mr. Henry.]

BUFFALO, KAS., October 2, 1878.

GEO. T. ANTHONY, Governor: Seventeen men known to be killed, on Sappa; one wounded, on Solomon, night before last; settlers in southern Nebraska in great danger. Surgeons from here with citizens' guard to go north will meet Adjutant.

J. C. HENEY.

Arms and ammunition were sent with the Adjutant General, who issued them, and took security therefor, at such points as they were demanded; a full report of which follows:

TOPEKA, KANSAS, Oct. 15, 1878.

To his Excellency Geo. T. Anthony, Governor, and Commander-in-Chief: According to orders received from you, I proceeded to distribute arms along the line of the Kansas Pacific Railway, taking such security therefor as I could get, in consideration of the exigencies of the case and demand of the parties. The following are the places and names of parties to whom arms were issued under the above orders:

- J. F. Keeny, Wakeeny, Kas., 50 Sharp's carbines and 1,300 rounds of ammunition.
- O. B. Richards, at Carlyle, Kas., 10 carbines and 300 rounds of ammunition.
- G. W. Kimball and others, Ellis, Kas., 50 carbines and 1,000 rounds of ammunition.
 - J. R. Hamilton, 20 carbines and 700 rounds of ammunition.

Kansas Pacific Railway Company, at Buffalo, 30 Sharp's carbines and 1,000 rounds of ammunition.

- J. M. Gravelly, 2 Sharp's carbines.
- J. C. Henry, Ellis, Kas., 50 Sharp's carbines, with 4,000 rounds of ammunition.
 - J. H. Edwards, 20 Sharp's carbines and 2,000 rounds of ammunition.
- J. H. Marr and others, and J. L. Worley and others, of Norton and Decatur counties, 100 carbines, with 2,000 rounds of ammunition.

I arrived at Ellis, made the proper distribution, and then telegraphed for special train to take me along the line at the different points. Left Ellis, accompanied by Hon. J. H. Edwards, at 7 o'clock; reached the last station, Carlyle, at 12 midnight, and returned as far as Wakeeny, where I found great excitement in regard to a rumor that Indians had stampeded the ranch of Mr. Henry. The rumor proved false, and quiet reigned to a certain degree. In fact, the whole country is alarmed, and the demand for arms is tenfold that which can be supplied by the State.

I wish to say right here, that in the matter of bonds, I was compelled to violate the provisions of the statutes as to the issue of such arms, and took the responsibility of letting citizens have them where in my opinion there was danger of attack.

I trust my action in the matter will be justified; and I know it would have been condemned had I lived up to the strict letter of instructions and the law, and refused such aid. I shall take the opportunity, in making my report, to call the attention of the Legislature to this matter, suggesting that discretionary power be given the Adjutant General in such cases, thereby relieving him of the responsibility imposed by the present law.

I am, sir, very respectfully, your obedient servant,

P. S. NOBLE, Adjutant General.

The history of this sad affair is conclusive of neglect and inefficiency somewhere. Confiding in the superior knowledge of Gen. Pope, and his positive and repeated assurances of protection, I did not act beyond urging and demanding what the State had a right to expect from the General Government—absolute protection. That Gen. Pope was sincere in his assurances of safety, there can be no doubt. That he was sadly in error, cannot be denied.

There can be but one means of sure protection from a recurrence of this disaster: the Indians must be put under military surveillance, with an adequate force to hold them upon their reservations. To protect the western border against bands of Indians, allowed, as these were, to roam, would require a standing army larger than the whole military force of the United States.

I have made urgent demand upon the General Government for the surrender of the chiefs, and such members of this depredating band of Indians as may be identified, to the civil courts of the State, for trial. Also, that an adequate force be stationed on the southern border between us and the Indian reservations, to fully protect the State. Compliance with both these demands has been assured. That you may fully understand the status of the demand for surrender, I add the correspondence in relation thereto:

TOPEKA, KANSAS, Nov. 11, 1878.

SIR: On Sept. 9th past, a band of Northern Cheyenne Indians escaped from their reservation, at Fort Reno, I. T., and took up their march northward. In their passage across this State, which covered a period of nearly thirty days, they not only evaded capture by the U. S. military forces, but they committed crimes against life and property, savage and revolting in their character, and disastrous in pecuniary loss.

More than forty men were murdered, and many women ravished and worse than murdered. An Indian invasion, so unexpected and so revolting in its fiendish details, has awakened a feeling of profound anxiety, and a rightful demand for the adoption of extreme measures to prevent a recurrence. If this band can be permitted to five its reservation and traverse two States, plundering and murdering at will, before even a portion of their number are captured, and not meet with exemplary punishment, then the reservation system should be abandoned as a failure, and the frontier citizen surrendered to a condition of perpetual peril.

To end such undertakings on the part of the Indians, and protect the future from their consequences, an example of adequate punishment should be made in their case.

To return this band to their reservation, with its chiefs and leaders, would be a wrong to this State, against which I protest in the name and on behalf of its entire population. I cannot believe such a thing will be seriously contemplated.

On mature reflection, and with thoughtful reference to the demands of law and justice, as well as the ends of public safety, I feel it an imperative duty to call upon you for a surrender to the proper officers of the civil courts of the State of Kansas, for trial and punishment under its laws, the principal chiefs, "Dull Knife," "Old Crow," "Hog," "Little Wolf," and others, whose identity can be established as participants in the crimes of murder, and woman-ravishing.

I believe there is a precedent for this demand, in the surrender to the civil courts of Texas of "Satanta," and one other chief, in the year 1872. But if there is no precedent, public necessity and simple justice would, I believe, be ample justification for this demand.

The laws of Kansas work a practical abolition of capital punishment, but the fact of surrender to the civil authorities for trial, with a conviction followed by sentence of death, or imprisonment for life, would have a salutary effect, and, as I believe, work protection and comparative security.

Very respectfully,

GEO. T. ANTHONY, Governor of Kansas.

To the Hon. Secretary of War, Washington, D. C.

HEADQUARTERS DEPARTMENT OF THE MISSOURI, FORT LEAVENWORTH, Kas., Dec. 31, 1878.

Hon. Geo. T. Anthony, Governor of Kansas, Topeka, Kansas:

GOVERNOE: I have the honor to inform you that I have received orders from the War Department to turn over to the civil authorities of Kansas, such of the Cheyenne prisoners en route to this place, from the north, as can be identified as the criminals who committed murder or other crimes during the raid of the Indians through Kansas in September last. As it is desirable not to keep these Indians here longer than necessary, I have to request that such persons as may be needed for the identification of the criminals be sent to meet the Indians on their arrival here. I cannot yet tell exactly when they will reach here, but I will notify you by telegraph as long as possible in advance—perhaps a week.

A considerable force of infantry will be sent within a few days to Camp Supply, and to a point on the Canadian, half-way between that post and Fort Reno, to cover the southern line of Kansas as far as is practicable for the present. Of course you know as I do, that infantry is not a very effective force to head off or pursue parties of mounted Indians. You know also that until parties of Indians from the Indian Territory break away we have no right to act against them except on application of the Indian agent, or until they have passed out of the limits of their reservation; and that we have no power to inquire into their condition or wants, or to remedy either, nor can we use any precautionary measures of repression, whatever may be the indications of their purpose to break away, unless first asked to do so by the agent. Thus tied up, there is nothing left to the military except to wait until the Indians are gone or until the agent asks the military to act, which for obvious reasons he is very reluctant to do until it is too late for effective measures to prevent trouble.

For these reasons, a considerable cavalry force is needed, not only near these Indians, but on the western frontier of Kansas, to take the field whenever parties of Indians leave their reservations.

The condition of affairs in the Indian Territory makes such a force absolutely necessary on this frontier, but I regret to say that necessities equally pressing in other parts of the country, and even more pressing in some places, demand the service of cavalry elsewhere; and although both Gen. Sheridan and myself understand and have long understood and tried to provide for the necessities of the situation, as has also the General of the Army, there is actually not the cavalry force to send for the present. I hope, however, before many weeks, to get six companies of cavalry, which I will so place as to secure the frontier settlers as far as activity and zeal can do so with such a force.

I write this letter to you, that you may understand the position in which the military forces of this department are placed in relation to the Cheyennes and Arapahoes, Kiowas and Comanches, and other wild Indians in the Indian Territory.

I repeat that we are powerless to act against these Indians, whatever we may know or believe of their purposes, until they leave the limits of their reservations, or until the Indian agent asks military interposition.

It would not be difficult for the military forces, if they had the authority to encamp at these agencies, to feed the Indians so that they would have no excuse to leave; and to enforce their stay at the agencies by constant repressive force, if necessary. Unfortunately we have no such power; and our only function is to pursue, which, as you need not be told, is almost unavailing over these wide plains, after the Indians have once started. It is due to the military forces that I should write these facts to you, as there appears to be a disposition to censure the troops for transactions which they have no power to control, either by precautionary or repressive measures.

Very respectfully, your obedient servant,

JNO. POPE,

Brevet Major General U. S. A., Commanding.

GEO. T. ANTHONY, Governor. EXECUTIVE DEPARTMENT, TOPEKA, Jan. 13, 1879.

EXHIBIT A.

History of Railroad Strike.

The following telegrams and communications relating to the disturbance on the line of the Atchison, Topeka & Santa Fé Railroad, taken in the order of their occurrence and date, will afford a succinct history of the strike, and show the necessity of interference on the part of the Executive.

On the morning of April 5th, the following communication was received from Superintendent Morse:

GOV. ANTHONY: There is a large mob about our depot, threatening, violence. I have called on the sheriff, and he is trying to raise a posse, but we may need help from the State. Will you protect this company and its property?

C. F. Morse, General Superintendent.

Topeka, April 5th.

To which the following answer was made:

EXECUTIVE OFFICE, TOPEKA, April 5, 1878.

SIR: Referring to your note of this date, in relation to disturbances upon your road, I would respectfully refer you to article 8, chapter 31, Revised Statutes 1868, which provides the mode of procedure for the suppression of such irregular and riotous conduct. In this connection I have to assure you of my full sympathy, and that the power of the State shall be brought to bear to suppress any effort to drive peaceable laborers from their work upon your road or elsewhere.

Proceedings should be strictly in conformity to law, with great care, and, above all, conducted in such a manner as not to precipitate a conflict without abundant means to master all opposition. After your appeal to local authorities, or before, I shall be pleased to confer with you in relation to the means required. I urge caution and forbearance.

Very respectfully, GEO. T. ANTHONY, Governor.

To C. F. Morse, Supt. A. T. & S. F. R. R.

On the same morning the following telegram from General Manager Strong was received from Pueblo:

PUEBLO, COLORADO, April 5, 1878.

GOV. GEO. T. ANTHONY: Very unexpectedly, and without notice, or assigning any reason, most of our engineers refused to work yesterday.

(45)

Everything quiet so far. Will have others in a day or two. You will favor us by suggesting to the authorities at Topeka—also at Atchison, Emporia, Newton, and Dodge City, by wire—to be ready to meet any emergency. Please acknowledge receipt of this telegram to me here.

W. B. Strong, General Manager.

In answer to which, the following telegram was sent:

EXECUTIVE OFFICE, TOPEKA, April 5, 1878.

To W. B. STRONG, General Manager Atchison, Topeka & Santa Fé Railroad, Pueblo, Colorado: The following telegram has been sent to the authorities of the principal cities on the line of your road:

"TOPEKA, April 5, 1878.

"I am informed that a class of employés on the Atchison, Topeka & Santa Fé Railroad have organized to offend against the public peace by conspiring to prevent the operation of trains on said road, without their consent. It is expected that the civil authorities will protect peaceable laborers and arrest offenders, under authority of article 8, chapter 31, General Statutes of Kaussa, 1868. Ample preparations should be made to check disturbanges and arrest offenders the moment such organized resistance to the laws is developed. To this end the full power of the State will be brought into requisition for the preservation of law and order.

GEO. T. ANTEONY, Governor."

The following dispatch on the same day was received from the Mayor of Emporia:

EMPORIA, April 5, 1878.

GEO. T. ANTHONY, Governor: Your dispatch received. There is no disturbance whatever in this city. When any does occur we are prepared to act promptly.

J. S. Watson, Mayor.

On the afternoon of the 6th, General Manager Strong came to the capital, and reported that he had just come over the road from Colorado; that at Emporia it required the sheriff and five men to protect the train-men; and that in the opinion of Sheriff Conner, it would require a force of fifty men to insure safety and protect passing trains, if any attempt was made to move freight. Whereupon the following correspondence with Sheriff Conner was had:

TOPEKA, April 6, 1878.

Sir: Can you organize an adequate force of not less than fifty men, who will protect the property of the A. T. & S. F. Railroad Company, and see that no trains, passenger or freight, are molested while passing through your county? If you desire authority beyond that in the statutes, I will see them mustered in under your command as militia of the State; and all expenses incurred for services and subsistence shall be paid. Answer promptly.

Geo. T. Anthony.

To Sheriff H. Conner, Lyon County, Emporia, Kansas.

Reply of Sheriff Conner, to the above dispatch:

EMPORIA, April 6, 1878.

To GEO. T. ANTHONY: I think I can get fifty good men. Will try to have twenty armed men on duty in the morning, and more just as fast as

arms can be procured. I shall swear them in as deputies, but wish, under authority you have given, to consider them militia. If you can send twenty stand of arms and ammunition, please do so to-morrow.

H. CONNER, Sheriff.

TOPEKA, April 6, 1878.

H. CONNER, Sheriff, Emporia: Have men on hand at 8 A. M. to-morrow.

Train will bring what you need. Provoke no collision under any circumstances. Wait orders.

GEO. T. ANTHONY.

TOPEKA, April 6, 1878.

J. B. ZIEGLER, Captain Montgomery Rifler, K. S. M., Independence: Hold your company in readiness to move on six hours' notice, with fifty men, for duty.

GEO. T. ANTHONY.

TOPEKA, April 6, 1878.

SIB: Hold your company in readiness to move on two hours' notice. Inform me by wire, at once, the number of men you can collect. Would like your company to muster fifty men, if possible.

GEO. T. ANTHONY, Governor.

To Capt. J. C. Walkinshaw, 3d Ind. Co. V. Gds., K. S. M., Leavenworth.

[Letter to Auditor Bonebrake.]

TOPEKA, April 6, 1878.

Siz: Referring to our conversation of this morning, in which you informed me that you had been solicited to join representative citizens of Topeka in a conference with the striking railroad engineers and the railroad company, with a view to the settlement and adjustment of existing difficulties, permit me to say that, as the case has been presented to me, I understand that these engineers not only refuse to operate trains, except passenger and mail trains, but by violence and with continuous threats, forbid their operation by others; that passenger trains have been delayed, and United States mails delayed, by the acts of these men.

I am further informed that this morning at Emporia, these law-defying engineers have put out the fires, and drawn the water from the locomotives, and otherwise damaged and impaired the working force of the road. This in defiance of the local authorities here and there, after an effort has been made by both city and county authorities to suppress the wrong-doers.

I felt it my duty to the State, that its good name should be protected, and its law enforced; and accepting the failure of the local authorities to do it, as evidence of their inability to accomplish so desirable an end, had made arrangements to provide an adequate military force to protect life and property, and place the railroad company in a condition to redeem its obligations to the public, by a prompt shipment of property, and transport of passengers.

I am this moment informed, and since the above paragraph was written, that the westward-bound train from Kansas City, when about leaving there, was delayed by the engineer being driven from the engine, and that with some difficulty an engineer was found to take the train at Turkey Creek and bring it through to Topeka.

In view of these exciting facts, I respectfully submit to you the great delicacy of any conference, on the part of law-abiding citizens, with parties who are members of this conspiracy against the public peace. Your sheriff and the city marshal have failed to enforce the law, even, in fact, driven from their duty by force and intimidation. Citizens have failed to respond to their demand, made in answer to the law, for assistance. In this attitude of defiance any conference, that even expresses sympathy, must work an impairment of law to the public peril.

Presuming that the men with whom you are to confer are not of the above class, and profoundly desiring a peaceful and inexpensive adjustment of the trouble, without enforcement of the more rigid plan determined upon, I shall await the result of such conference, respectfully asking to be informed by you as promptly as possible of its results.

I am, sir, very respectfully,

GEO. T. ANTHONY, Governor.

Hon, P. I. Bonebrake, Auditor of State.

All efforts at adjustment in this conference proved of no avail, and all admitted that the situation was one of great peril. On the 7th, troops were ordered from Leavenworth and Independence, who reached here on the following morning (8th), and took possession of the railroad station and shops.

On the morning of the 8th, proclamation was issued as follows:

GOVERNOR'S PROCLAMATION.

EXECUTIVE OFFICE, TOPEKA, KANSAS.

It having come to my knowledge that lawless men have confederated and conspired together to defy the law and imperil the public peace of the State of Kansas, and that such lawless men, thus confederated and conspiring, have offended against the law and the peace of the State, by delaying the transit of passengers and United States mails over the Atchison, Topeka & Santa Fé Railroad, and by refusing to permit the movement of freight trains on said road, overpowering by threats and violence peaceable employés, and the civil officers of the State, who have attempted to protect them and preserve the peace:

Now, therefore, in order to aid the civil authorities, enforce the law, protect the peace and defend the honor of the State, and by authority vested in me as Commander-in-Chief of the Militia, I have called into service a military force, and commanded it to take possession of stations, track and rolling-stock of said Atchison, Topeka & Santa Fé Railroad, to the extent that may be necessary to protect and hold its operation free from unlawful interference by whomsoever such interference may be attempted; and notice is hereby given to all who have, or who may contemplate offending against the law in this respect, to desist, and they are hereby commanded

to desist from further acts of disobedience and violence, and to disperse, if assembled for such purpose, and go to their several homes and lawful employments.

Notice is also hereby given to all law-abiding citizens, that it is expected and required of them that they remain quietly at their several homes and places of business, and that they do not permit themselves, as individuals or in assemblies, to approach the depots of said railroad, except upon business, and by approaches pointed out by the military authorities in immediate command. This precaution is alike necessary for the public good and for the protection of life.

Done at Topeka, this 8th day of April, 1878.

GEO. T. ANTHONY, Governor.

Capt. Walkinshaw was ordered to Emporia, under instructions as follows:

TOPERA, April 8, 1878.

SIB: You will proceed with your company, and a detachment of ten men and non-commissioned officer from Capt. Ziegler's company, to Emporia, by special train provided you. On arrival, you will report to H. Conner, Sheriff, who has a posse of men to coöperate with you, and whom you are hereby authorized and directed to muster into the State service, and take command of—with general instruction to protect the property of citizens, and see that trains are allowed to move in and out of Emporia unmolested, using all necessary means to accomplish that end.

I leave to your discretion all else. Keep me advised by wire of your movements, and the condition of affairs on arrival at Emporia.

GEO. T. ANTHONY, Governor.

To Capt. J. C. Walkinshaw, Commanding.

Sheriff Conner was advised by wire of the movements of Capt. Walkinshaw, at the time he with his command left Topeka, as follows:

TOPEKA, April 8, 1878.

H. CONNER, Emporia Junction: Capt. Walkinshaw's command of fifty State troops leave here at 8:25, and will arrive about 11:30. I send arms by him, and authority to muster your men into State service. You will advise with and act under his orders. We have full control here, with ample force of troops.

Geo. T. Anthony.

8:50 A. M.

In the afternoon of said day, the following telegram was received from T. N. Sedgwick and others:

EMPORIA, KANSAS, April 8, 1878.

Gov. Geo. T. Anthony: We have now in our midst a band of fifty armed men, who profess to come here under your orders, for the protection of the property of the Atchison, Topeka & Santa Fé Railroad. We simply consider this an insult to our civil officers and citizens. We have been and

are still able and willing to protect all the property of the road and all the employés who are willing to work. We can't make men work; but there has not been a time since this strike commenced that it required more than six men to do all the police duty that was necessary. We hope that you will at once recall these troops, and we will take care of our own affairs; and if you do not, we will not answer for the consequences.

T. N. SEDGWICK, County Attorney.

H. CONNEB, Sheriff.

J. S. WATSON, Mayor.

D. S. GILMORE, Ch'n Board Co. Comm'rs.

A. WARD, County Commissioner.

And was immediately answered, reciting correspondence had with Sheriff Conner, as follows:

TOPEKA, April 8, 1878.

Answering your telegram of this date, the following correspondence, had with one of its signers, will explain itself, and protect me from the charge of insulting you:

"TOPEKA, April 6, 1878.

"Sir: Can you organize an adequate force of not less than fifty men, who will protect the property of the A. T. & S. F. R. R. Co., and see that no trains, passenger or freight, are molested while passing through your county? If you desire authority beyond that in the statutes, I will see them mustered in under your command as militiated the State; and all expenses incurred for service and subsistence shall be paid. Answer promptly.

(Signed)

GEO. T. ANTHONY.

"To Sheriff Conner, Emporia, Lyon county, Kansas."

"Emporia, April 6, 1878.

"Geo.T. Anthony: I think I can get fifty good men. Will try to have twenty armed men on duty in the morning, and more just as fast as arms can be procured. I shall swear them in as deputies, but wish, under authority you have given, to consider them militia. If you can send twenty-five stand of arms and ammunition, please do so tomorrow. (Signed) H. Conner, Sheriff."

Arms were sent by Capt. Walkinshaw, who was authorized to muster Sheriff Conner and his posse as he had requested, making them part of the militia force of the State. I hope that this coöperation solicited by your sheriff will be carried out.

State force was called into requisition because local authorities had failed to protect the operation of the road, and cannot be withdrawn until freight and passenger trains are allowed to run unmolested over the entire line of the road.

I sent troops supposing you needed them. Hope you can do as you say, and have ordered Capt. Walkinshaw to withhold all interference until you fail.

GEO. T. ANTHONY, Governor.

T. N. Sedgwick and others, Emporia.

Here follows the order to Capt. Walkinshaw, referred to above, to withhold interference:

EMPORIA, 4-8-78.

GOV. GEO. T. ANTHONY: The sheriff says he does not want the arms, and that he has sufficient force to send out all trains. The citizens and sheriff guarantee safety to all employes and property. What shall we do with the arms, &c.?

J. C. Walkinshaw, Copt.

TOPEKA, April 8, 1878.

CAPT. J. C. WALKINSHAW, Emporia, Kansas: I am assured by local authorities of Lyon county that they are able and willing to force compliance with law, protect property, and secure unmolested passage of all trains on the A. T. & S. F. R. R. You will withhold all interference and await orders. Keep possession of your train.

GEO. T. ANTHONY, Governor.

Thereupon a second dispatch was received from County Attorney T. N. Sedgwick and Mayor Watson, questioning the legality of the act of sending armed men to quell disturbance, as follows:

EMPORIA, April 8, 1878.

To Gov. Anthony: We insist again to state that in sending those armed men to our city you have acted without warrant of law, and that our citizens and peace officers feel justly indignant. Our sheriff is amply able to quell any disturbance that is likely to arise. We therefore beg of you, in the name of peace and good order, to recall your armed men.

T. N. SEDGWICK, County Attorney. J. S. WATSON, Mayor,

To which the following answer was sent:

TOPEKA, April 8, 1878.

T. N. SEDGWICK, Emporia, Kansas: Your second demand for withdrawal of troops received. I am responsible to the law for my action. Troops will in no manner interfere with your local authorities, nor attempt the enforcement of law, unless you continue to fail in so doing. They will not be withdrawn until the possibility of their need at any point is past.

GEO. T. ANTHONY, Governor.

The following dispatch was sent to Superintendent Morse by Sheriff Conner and others:

DEPOT, TOPEKA, 8th, 1878.

GOV. ANTHONY: Please note attached message from officials at Emporia.
C. F. Morse.

"EMPORIA, 8, 1878.

"C. F. Morse: We understand the Governor, by your request, has sent fifty armed men here to protect your property and men. We consider this an insult to our civil officers and citizens, and entirely unwarranted and without precedent or warrant. Our civil officers are amply able and willing to protect your property and employés. There have been no riots or disturbances of any kind, and if any such disturbance should occur, we are abundantly able to take care of it. These troops must be recalled from here at once. If they are not, we will not answer for the consequences.

"H. CONNER, Sheriff.

"T. N. SEDGWICE, County Attorney.

"D. S. GILMORE, Ch'n Co. Board Commissioners."

On the evening of the 8th, the following order was issued

to Capt. Wheeler, in charge of the depot and shops at Topeka:

STATE HOUSE, April 8, 1878.

CAPT. WHEELER, Topeka: Keep all your men, and make arrangement to have every man for duty at a moment's notice, through the night. Have good picket line out, and exact absolute vigilance. More danger to-night than ever again.

Geo. T. Anthony.

On the morning of the 9th, the following dispatches relative to the situation were received from the depot in Topeka, and from Emporia:

DEPOT, April 9, 1878.

Everything looks well this morning. I think the strikers have thrown up the sponge, and will all scatter, looking for work, to-day or to-morrow. They are now calling for their pay, and seem entirely subdued.

I have these reports from my man, who has been with them.

C. F. M.

EMPORIA, April 9, 1878.

Everything quiet during the night. Stood guard at pump-house, round-house and depot during the night. Just going to breakfast.

J. C. WALKINSHAW, Captain.

And later in the morning, the following mention of a painful accident:

Emporia, April 9, 1878.

Gov. Geo. T. Anthony: A citizen, named Shannon, a minister, has just been accidentally shot in one of our coaches.

Walkinshaw.

TOPEKA, April 9, 1878.

CAPT. WALKINSHAW, Emporia, Kansas: Do not allow any complication or collision to arise from excitement. Better run your train back out of county than have trouble from this cause.

GEO. T. ANTHONY.

EMPORIA, April 9, 1878.

Gov. Anthony: One of your militia just accidentally killed Rev. O. J. Shannon, Pastor of Congregational Church. Tremendous excitement. No possible use of troops here, and I advise you to immediately withdraw them.

JACOB STOTLER.

TOPEKA, April 9, 1878.

JACOB STOTLER, Emporia, Kansas: Regret the painful accident. Capt. Walkinshaw had been ordered to withdraw his men.

GEO. T. ANTHONY.

DEPOT, April 9, 1878.

GOV. ANTHONY: The following just received from our man in charge at Emporia.

C. F. Morse.

"Mr. Shannon was sitting in middle coach, talking with soldiers. A man in rear end of coach, carelessly handling his gun went off. I had not better leave here to-day.

"L. WORTON, JR."

DEPOT, April 9, 1878.

GOV. ANTHONY: I have taken responsibility of moving Capt. Walkinshaw's company to Reading.

C. F. MORSE.

C. F. Morse: Your direction to run troops out of Lyon county, approved. Had given this direction to Capt. Walkinshaw immediately on hearing of the accident.

GEO. T. ANTHONY.

EXHIBIT B.

Report of Pardons Granted.

JOHN HAMILTON—Grand Larceny—Leavenworth County.—Convicted Dec. 21, 1874; sentence, five years; pardoned Jan. 26, 1877. The value of the property taken was barely \$20. Possession of the stolen property was relied on as only proof of unlawful taking. He has always asserted his innocence. Warden inclined to believe his statements. Has served two years creditably. Pardon recommended by Judge, County Attorney, and nine jurors—three absent from the county.

- W. H. BOYD—Grand Larceny—Mitchell County.—Convicted Aug. 12, 1874; sentence, five years; pardoned Feb. 14, 1877. Has served half his term. Sick much of the time. In the opinion of the physician, not likely to recover while in confinement. Value of property taken, \$25.
- W. J. Burns—Grand Larceny—Chase County.—Convicted May, 1875; sentence, three years; pardoned March 3, 1877. Pardon urged by the Judge, County Attorney, and all the jury. Extenuating circumstances discovered since trial. County Attorney wishes his testimony in the prosecution of other offenders.
- G. W. Robinson—Grand Larceny—Wyandotte County.—Convicted September, 1874; sentence, four years; pardoned March 27, 1877. In delicate health; has had several hemorrhages of the lungs, becoming more frequent, and, in the opinion of the physician, argue fatality.

JEREMIAH McCarty—Grand Larceny—Doniphan County.—Convicted September, 1875; sentence, four years; pardoned April 7, 1877. The Judge, County Attorney, ten jurors, and a large number of citizens ask his pardon on the ground that grave doubts exist of his guilt. The Warden and Physician of the prison are of the opinion that the accused is insane.

- I. J. STINE—Burglary—Leavenworth County.—Convicted December, 1875; sentence, one and one-half years; pardoned April 18, 1877. Pardon urged by the Judge, County Attorney, and a large body of his neighbors, on the ground that he stole food to keep his family of eight children from starving. Granted for reasons urged, and that his term has nearly expired.
- J. J. HABLAN—Rape—Marion County.—Convicted April, 1873; sentence, seven years; pardoned April 26, 1877. The County Attorney says that it was the general remark at the trial that the evidence was not legally sufficient; that his conviction was owing in a great degree to the admission by his attorney, on the trial, that he was a desperate character; the sole witness against him was a young girl, who, he has since learned, had a bad character for chastity. Judge thinks his conviction owing to said admission, and states that the severity of his sentence was owing to that admission. Seven jurors join in the application.

JACKSON BOOKER—Rape—Wyandotte County.—Convicted March, 1873; sentence, ten years; pardoned May 17, 1877. Pardon urged by Judge, County Attorney, and many citizens, showing grave doubt of his guilt; which opinion is based on recent investigation. They think him convicted on false testimony.

(54)

MARTIN OSTBANDER—Grand Larceny—Sedgwick County.—Convicted September, 1873; sentence, five years; pardoned June 5, 1877. Certificate of the Warden, and also of the Prison Physician, show the mental condition of the prisoner seriously impaired; that he now exhibits all the symptoms of moral insanity, and that longer confinement will result in confirmed mania.

ELI HINTON—Petit Larceny—Washington County.—Convicted April, 1877; sentence, ninety days in county jail; pardoned June 15, 1877. Evidence, brought to light since his conviction, establishes his innocence. Eight jurors and many neighbors ask his release. He is fifty-two years of age. Has heart disease. Has borne an excellent character.

JOHN McPherson—Grand Larceny—Montgomery County.—Convicted September, 1875; sentence, five years; pardoned June 26, 1877. Pardon urged by county officers, ministers of the gospel, ten jurors, County Attorney, three hundred citizens, with a favoring letter from the Judge. The gravamen of the application is, that he was convicted solely on circumstantial testimony of such a character as to entitle him to clemency. From a statement of the testimony and facts, concurred in by the attorneys of the State and of the defense, which accords with the minutes kept by the prosecuting attorney, the application would seem well founded.

JOHN R. EWELL—Assault with Intent to Kill—Johnson County.—Convicted March term, 1877; sentence, three years; pardoned Aug. 13, 1877. Urged by 290 citizens and neighbors, that he was convicted by false testimony of the prosecuting witness. Seven jurors say their verdict was based on the supposed truth of the prosecuting witness's statement. It is now claimed that the prosecuting witness and one Dr. W. conspired to convict Ewell, to get rid of his testimony in an action against them for procuring an abortion on the wife of the prosecuting witness. Considering the shown character and unreliability of the testimony of said prosecuting witness, in connection with the hitherto good character as a peaceable and law-abiding citizen of the accused, pardon was granted.

E. G. HEGWAR—Manslaughter, Third Degree—Chase County.—Convicted March, 1877; sentence, sixteen months; pardoned August 15, 1877, on the ground of impaired health, certified to by the Warden and Physician, which will soon be likely to result in death, unless his situation is changed.

W. P. Owens—Grand Larceny—Montgomery County.—Convicted March, 1877; sentence, two years; pardoned August 23, 1877, on the ground that the accused was not the guilty party; that he purchased the property in question in good faith, and with no criminal intent, as shown by the statement of the Judge, County Attorney, Sheriff, and many citizens, in connection with affidavits produced showing that a wrong had been done the accused.

GEORGE SILVERS—Grand Lorceny—Douglas County.—Convicted Jan. 25, 1875; sentence, six years; pardoned Aug. 30, 1877. He was not the principal, but was led into the larceny by another, who escaped. The punishment already received sufficient; such being the opinion of the examining magistrate, of the two attorneys who prosecuted for the State, of the county officers, and the Judge who gave the sentence, and of many citizens.

EDWARD NORTON—Assault and Battery—Leavenworth County.—Convicted Sept. 22, 1875; sentence, twelve months; pardoned Sept. 12, 1877. A young colored man of general good habits and character. Has a wife and two children dependent, whom he can support. His punishment being merely nominal in the jail, he having the range of the vicinity. Said pardon being urged by the Judge, County Attorney, county officers, Mayor, and citizens.

EDWARD WOOLHEATER—Burglary and Larceny—Marion County.—Convicted Sept. 21, 1875; sentence, five years; pardoned Dec. 4, 1877. This was the case of a young man breaking into a depot building and taking a box of cigars. He plead guilty. Has served faithfully two and one-half years. Punishment received deemed sufficient. Concurred in by the Judge who sentenced him, and who could not, under the law, make his term shorter than he did.

SAMUEL S. TAYLOR—Grand Larceny—Leavenworth County.—Convicted March, 1876; sentence, four and one-half years; pardoned December 4, 1877. The offender was weak-minded. Made a tool of by others while intoxicated. Has served faithfully over two years in prison, where he has behaved well. His services needed by a mother made dependent by the recent death of an elder son. Urged by Judge, County Attorney, and forty-five others.

ISAAC YOUNG—Grand Larceny—Montgomery County.—Convicted Dec. 15, 1876; sentence, three years; pardoned Dec. 18, 1877, on the condition that he henceforth refrain from the use of intoxicating drinks. It was his first offense, committed while intoxicated, led on by others. Judge thinks he was in a debauch at the time, and that having become sober, he was in the act of returning the horse, when arrested.

WILLIAM GARNER—Burglary and Larceny—Lincoln County.—Convicted April 16, 1875; sentence, six years; pardoned Dec. 18, 1877. The property taken in this case was of the value of \$25—in the grasshopper year. The Judge says the evidence showed great destitution in his family, and the property consisted of food and clothing of the "relief goods," which were not promptly distributed. Punishment received deemed ample. Judge and County Attorney urge his release.

MICHAEL AMEY—Assault with Intent to Commit Rape—Anderson County.—Convicted March 16, 1876; sentence, five years; pardoned Dec. 19, 1877. Urged by the County Attorney, by many citizens, and by the entire jury, who think the sentence too severe for the case made. The County Attorney says that the evidence was weak and meager, and that the verdict resulted largely from prejudice and from rumor not properly in evidence. Considering the doubtful character of the evidence, the prejudice, the rumor not properly admitted, and that the jury think the sentence too severe, pardon was granted.

PERRY STEADMAN—Forgery—Miami County.—Convicted at May term, 1877; sentence, two years; pardoned Dec. 20, 1877. This prisoner was barely sixteen—plead guilty—amount involved about \$20. Judge and County Attorney, in behalf of erring youth, recommend his pardon. One hundred and sixty-five citizens of Johnson and Miami counties think he was not aware of the nature of his act; that it was wanting in criminal intent, and that they can effect more than the State in his reform. Considering his youth, his confession, his good conduct in prison, the opinions of the Judge and Prosecuting Attorney as to the sufficiency of his punishment, together with the assurances of his friends, pardon was granted.

C. S. Jackman — Grand Larceny — Ottawa County. — Convicted May 11, 1876; sentence, four years; pardoned Dec. 31, 1877. Prisoner 21. First offense. Of hitherto excellent character, enjoying the confidence and esteem of his neighbors. Plead guilty. County Attorney says his sentence is severe, longer than usual for a like offense in that district in cases where there was a trial. Petition signed by eighty, including county officers, State Senators, etc. Considering his hitherto good character, his prompt confession, his faithful services for over a year and a half, and that his parents are aged and need his services, pardon was granted.

James T. Wright — Perjury — Neosho County. — Convicted Dec. 8, 1877; sentence, one year; pardoned Feb. 4, 1878. The alleged perjury relates to partnership matters, of long standing, of immense amount, and where no books were kept. The prosecuting attorney, nine of the jurymen, petitions from his former home and from his present abode, numerously signed, represent him a man of fifty years, irreproachable in conduct, even above suspicion in all his business; ask his release. Considering the peculiar circumstances of the case, the nature of the business concerning which the testimony was given, the liability to mistake, and the universal sentiment of those conversant with the facts of the case, who urge elemency, pardon was granted.

ALONZO DUFFIELD—Robbery, First Degree — Douglas County.—Convicted Oct. 12, 1875; sentence, twelve years; pardoned Feb. 5, 1878. Convicted on sole testimony of a low, dishonest colored man. Prisoner was of industrious habits, and had led an irreproachable life to the age of 17. Judge and County Attorney say he was jointly charged with one J., who was equally guilty and allowed to plead guilty and receive a sentence of five years for larceny, and was pardoned by predecessor. Considering his youth, the nature of the testimony against him, his good conduct in prison, the fact that his associate, equally guilty, was sentenced for five years for the offense of larceny, pardon was granted at the recommendation of the Judge, County Attorney, Sheriff, and other reputable citizens.

REESE CRAVENS—Burglary, Second Degree, and Larceny—Douglas County.—Convicted January 25, 1875; sentence, five years; pardoned Feb. 26, 1878. The prisoner broke into a dwelling and took a shirt valued at \$2. The examining magistrate, who heard the testimony, thinks burglary not intended, only to get the shirt. Judge and County Attorney say that he plead guilty, and only for the technical burglary the offense would have been petit larceny. They join in the request for his release.

E. R. CUTLEB—Defiling a Female under Eighteen—Chautauqua County.—Convicted October, 1877; sentence, six years; pardoned April 27, 1878. In this case trial was pressed without due preparation by the defense. County Attorney and citizens seemed surprised at the verdict on the testimony. Evidence developed since the trial, and not at that time known, shows the prosecuting witness to have been of previous loose character. The application was indorsed by Judge, County Attorney, 8 jurors, 12 county officers, 206 women and 705 men.

OBVILLE N. KELLOGG—Assault with Intent to Kill—Cherokee County.—Convicted Feb. 13, 1877; sentence, two years; pardoned March 29, 1878. The prisoner was under the influence of liquor; without malice. His release asked by 230, embracing county officers, editors, clergymen, Senators, Representatives, Sunday-school teachers, and others. Considering that the act was committed while intoxicated, that he had served a year, and the general desire of his neighbors for his release, pardon was granted.

JOHN H. GWIN—Grand Larceny—Montgomery County.—Convicted at December term, 1874; sentence, four years; pardoned April 25, 1878. The property stolen was billiard balls, valued at \$25. Prisoner has served over three years. Pardon granted on recommendation of the Judge.

[ENOS B. DAVIS — Obtaining Money under False Pretenses — Lyon County. Convicted March 31, 1877; sentence, two years; pardoned May 13, 1878. Re was regarded a reputable and industrious young man, without bad habits. His mind thought to be somewhat impaired. Considering his faithful service for over a year, granted, on request of two hundred and fifty citizens of Lyon county.

THOMAS Y. JONES—Assault with Intent to Kill—Leavenworth County.—Convicted June 29, 1874; sentence, ten years; pardoned April 9, 1878. Prisoner old, infirm, health in a precarious condition, of no service to the State. His wife and children in Canada, where they desire him to go. Granted on condition that he "immediately leave the State and remain without its bounds."

HENRY BELLEW—Grand Larceny—Leavenworth County.—Convicted December, 1877; sentence, two years; pardoned May 13, 1878. It is claimed that the prisoner in this case was not guilty of the theft. That he recaptured the stolen property, and while in a state of intoxication said and did things which led to his prosecution and conviction. Granted at the instance of the Judge and County Attorney.

BUD VANNOY—Burglary, Third Degree—Atchison County.—Convicted June 11, 1877; sentence, one year; pardoned March 23, 1878. Aged 17. Broke into an office; stole a small amount of money; plead guilty. Considering his youth, his confession, good conduct, and term of over eight months, the sudden death of his father which leaves his mother dependent, granted, at request of his mother, the Judge and County Attorney.

C. F. Loomis—Grand Larceny—Lyon County.—Convicted Sept. 11, 1874; sentence, five years; pardoned April 23, 1878. Prisoner has served three and one-half years. Release asked by petition from citizens of Chase and Lyon counties, by. six jurors, by the Judge, County Attorney, and others. Considering the length of service rendered, his good conduct in prison, the generally-expressed wish for his pardon by county officers, Judge, County Attorney, and prominent citizens of both Chase and Lyon counties, granted.

EDWARD FITZGERALD—Assault with Intent to Rape—Wyandotte County.—Convicted Dec. 13, 1877; sentence, two years; pardoned May 31, 1878. It is represented that the conviction was wrong, obtained on false testimony, such being the opinion of the County Attorney, Sheriff, Clerk, Judge, and some of the jury. Granted for the reasons urged.

HENRY JENNINGS—Burglary and Larceny—Douglas County.—Convicted Feb. 23, 1878; sentence, four months in county jail; pardoned April 26, 1878. Only thirteen years of age. Led into crime by bad associations. Considering his youth, punishment already received, and the fact that his associates in jail with whom he is necessarily thrown are likely still more to demoralize him, granted, at the instance of many citizens of Lawrence.

ROBERT WHITE (colored)—Rape—Douglas County.—Convicted Oct. 16, 1876; sentence, twelve years; pardoned July 2, 1878. Notwithstanding the verdict, one hundred and forty citizens of Douglas represent that great doubt exists as to his guilt; that he was industrious, peaceable and of good character, and for many years noted for his inoffensiveness. The Judge and prosecuting attorney both approve his pardon. Granted.

SHERMAN B. LUM—Manslaughter, Fourth Degree—Jewell County.—Convicted April, 1878; sentence, six months, county jail; pardoned Aug. 5, 1878. Fatality by administering chloroform. Claimed that his conviction was wrong. A physician of twenty-five years standing says his treatment was humane, same surgeons generally adopt. Granted, at request, in pursuance of petitions numerously signed by citizens of Jewell, Republic, and Cloud counties.

WM. DEFOREST MILLER—Burglary—Labette County.—Convicted November, 1877; sentence, eighteen months; pardoned Sept. 12, 1878. The property taken was school books, from a school house. The prisoner was not fifteen, and had up to that time borne a good character. Pardoned, on satisfactory evidence that he was under sixteen years of age.

DANIEL R. CLAIBOURNE—Grand Larceny—Coffey Connty.—Convicted June, 1875; sentence, seven years; pardoned Sept. 10, 1878. Evidence discovered since the trial, led to the belief that, if connected with the theft, it was only in a remote degree. Was always a good citizen. Has demeaned himself well in prison. Hurt his right hand by accident while in the service of the State. Considering the peculiar circumstances of this case, punishment already received deemed sufficient.

James Thomas Davis—Grand Larceny, sentence, two years; Escaping Jail, sentence, one year; Robbery, ten years—Douglas County.—Convicted October, 1874; pardoned Sept. 13, 1878. Has served out first two sentences. Health seriously impaired. Previous character good. In his escape took no part further than to follow out the others. In going took with him a revolver belonging to the jailer. The jailer says he did not plan the escape. His conduct in prison was good. Pardoned, on recommendation of the jailer, Sheriff, and one hundred and thirty signers of petition.

OSCAR SPURGEON — Grand Larceny — Coffey County.—Convicted Aug. 19, 1876; sentence, five years; pardoned Dec. 4, 1878. Pardon is urged on the ground that the party has been sufficiently punished. The Judge says, at the time of his sentence, he thought an example should be made. He now asks that he be pardoned. He has conducted himself well in prison. Granted, at the instance of many petitioners, for reasons urged.

WILLIAM T. MATHEWS—Grand Larceny—Douglas County.—Convicted Oct. 5, 1877; sentence, four years; pardoned Nov. 22, 1878. He plead guilty to two separate charges of grand larceny, for which he was sentenced to three and four years respectively; has served out the first, and is now serving on his second sentence. He is represented to be a young man of good parentage, has conducted himself well in prison, and it is thought has been sufficiently punished. Has a mother poor and dependent. Pardoned for the reasons urged.

JASPER BURNHAM AND OLIVER BURNHAM—Grand Larceny—Lyon County.—Convicted Oct. 1, 1875; pardoned Nov. 18, 1878. Pardon urged by petitions numerously signed by citizens of Lyon county, who represent that there were many mitigating circumstances in their case, and think they have been sufficiently punished, and that no good will result from their longer confinement; that their mother is old, feeble, and dependent on others for support. Judge concurs, and remarks that he is not now sending for so long a term, for the same offense, and he thinks the people desire a pardon in their case. Granted for reasons urged.

ALONZO HICKS—Grand Larceny—Chase County.—Convicted July 9, 1878; sentence, one year; pardoned Nov. 22, 1878. Fifty citizens of Chase county represent the prisoner as under age; that until this affair he has always acted upright and honest, and they think that a manifestation of clemency in his case would act as a stimulant to future good conduct. Granted.

FRANK GATEWOOD — Assault with Intent to Kill—Lyon County.—Convicted Sept. 5, 1878; sentence, six months in county jail; pardoned Dec. 2, 1878. Prisoner confined in an underground cell, damp and unhealthy, since May 17. Has suffered rheumatism, and, to some extent, lung disease. Pardoned on recommendation of County Attorney and other county officers and citizens.

JEHIDA WILLIAMS—Grand Larceny—Lyon County.—Convicted September, 1876; sentence, three years; pardoned Dec. 11, 1878. Suffering from consumption; will soon die unless released. Granted on certificate of Prison Physician, which corroborates this.

MORRIS H. WARNER—Grand Larceny—Bourbon County.—Convicted January, 1877; sentence, five years; pardoned Dec. 11, 1878. Has served two years. Conducted himself well in prison. Was an excellent soldier for three years—never shrank from duty. His friends say he is honest. Prosecuting attorney thinks his term too long. Has a large family, wife and small children. Granted, at the request of one hundred and fifty citizens, who think his guilt was in doubt.

JOHN W. SMITH, alias JOHN THORP—Burglary and Grand Larceny—Jefferson County.—Convicted June 13, 1878; sentence, six years; pardoned Jan. 6, 1879. The prisoner in this case was under fifteen years. His mother resides in Missouri, and is in indigent circumstances. He being the eldest of five children, and was of irreproachable character when he left his home in October, 1877.

GEORGE LEGERE—Assault with Intent to Kill—Douglas County.—Convicted February, 1878; pardoned January 7, 1879. This offense was committed in a drunken debauch, by a peaceable, good-natured, industrious man. No injury done. Has a wife and small children destitute. Pardon urged by jury, witnesses, neighbors, Sheriff, County Attorney and others.

N. S. Brand—Manslaughter, Fourth Degree—Bourbon County.—Convicted Sept. 28, 1878; sentence, one year; pardoned Jan. 8, 1879. Accused was watchman at Fort Scott depot. Safe in depot had \$20,000 to be paid to employés on the following day. Deceased, in the night, was ordered away from the yard three times, and while being arrested was shot. Pardoned at the instance of many citizens and of the County Attorney, who was of the opinion he ought to have been acquitted.

Lewis Hopkins—Burglary—Leavenworth County.—Convicted Aug. 5, 1872; sentence, ten years; pardoned January 8, 1879. Pardoned at the request of petition, and the Judge who sentenced, on the ground that he has been sufficiently punished, and would have been sentenced for a shorter term had the law relating to burglary admitted of a shorter sentence.

EXHIBIT C.

Report of Commutations.

JOHN H. NEIGHBORS—Assault with Intent to Kill—Linn County.—Convicted July 14, 1876; sentence, two and one-half years. This offense was committed under the influence of liquor. The prisoner when sober was an orderly, industrious and peaceable man. His pardon is asked by petitions numerously signed by his neighbors and by the person assaulted.

Commuted to one and one-half years, June 27, 1877.

JOHN W. BAGBY—Manslaughter, First Degree—Crawford County.—Sentence, seventeen years; sentenced January, 1875. Pardon in this case is asked by five hundred citizens, accompanied with the statement of the facts and evidence adduced on the trial, which it is claimed show it a case of justifiable or excusable homicide. Most of the jurors, the County Attorney, county officers, and members of the Legislature, join, and claim that the sentence was excessive.

Commuted to five years, July 12, 1877.

S. M. McDaniels—Grand Larceny—Leavenworth County.—Sentenced Dec. 6, 1873—five years. Prisoner in the last stage of consumption. His family and friends, worthy and reputable, would have him die at home, and thus avoid the odium which would seem to attach to a prison death. Commuted to three years seven months, July 26, 1877.

JOHN E. CROSSLEY—Burglary, Second Degree, five years; Grand Larceny, two years—Douglas County.—Sentenced June 6, 1877. Pardon is sought by parents, the Sheriff, and many reputable citizens, on the ground of the youth of the offender, his frank confession, plea of guilty, his hitherto good character, the probable bad effect of too long association with hardened criminals.

Commutation to three years for the burglary, and pardon for the larceny, August 11, 1877.

WILLIAM G. WALLACE—Assault With Intent to Rape—Johnson County.—March term, 1877; sentence, five years. Health impaired. Permanent injury received in prison, which cripples him for life. Four years service in the Union army. Three years in the regular army; honorably discharged. At request of court, bar, medical men and citizens, who represent that there exist grave doubts of his guilt.

Commutation to seven months, October 19, 1877.

HEZEKIAH WIEST — Maiming — Franklin County.— Convicted Sept. 28, 1877; sentence, five years. Commutation urged by 115 citizens, on the ground that the act was a misadventure rather than designedly done; by court officers and county officers, on the ground that the punishment was too severe. Judge says that had he possessed the discretion he would not have imposed to exceed one year.

Commuted to one year, December 19, 1877.

WILLIAM J. PHILIPOTT— Embezzlement—Bourbon County.—Sentence, two and one-half years; convicted May 26, 1876. Suffered from pneumonia, and recently from chills and fever. His term will expire in July next. On recommendation of the Warden and Chaplain.

Commuted to two years, January 17, 1878.

JOHN W. MANHALL—Burglary, Second Degree — Johnson County.— Convicted August 11, 1871; sentence, ten years. Several hemorrhages of the lungs. General breaking-down of the system. Doubtful if he can survive his term.

Commuted at instance of Physician and Warden to eight years, Jan-

uary 19, 1878.

JOHN VENIBLES—Burglary, Second Degree—Johnson County.—Convicted Aug. 11, 1871; sentence, ten years. Prisoner suffers from acute articular rheumatism, which permanently affects his joints, causing enlargement and distortion; also severe valvular difficulty.

Commuted at instance of Physician and Warden to eight years.

JAMES KNOX—Grand Larceny—Lyon County.—Convicted Sept. 9, 1873. Failing health. Can't recover while in prison. At request of Physician, Warden and Chaplain.

Commuted to six years, May 14, 1875.

PHILIP W. WATTS—Grand Larceny—Leavenworth County.—Convicted March, 1876; sentence, five years. At the request of Judge, County Attorney, six jurors and many citizens.

Commuted to three and one-half years, July 8, 1878.

GEORGE GILLETTE—Attempt to Rob—Atchison County.—Convicted June 11, 1877; sentence, three years. Pardon urged by the Judge and 44 prominent citizens of Atchison county, on the ground that the evidence was entirely circumstantial, and that Hackett, upon whom it was alleged the offense was committed, did not appear at the trial nor pretend to have been robbed.

Commuted to one and one-half years, August 13, 1878.

E. E. IVES—Grand Larceny—Harvey County.—Convicted Oct. 2, 1877; sentence, two years. Was confined a long time before trial. An intelligent lad of nineteen. Pardon urged by two hundred. Conduct in prison good. Commuted to eighteen months, Sept. 14, 1878.

RICHARD JOHNSON AND GEORGE SMITH—Grand Larceny—Washington County.—Convicted May 29, 1877; sentence, three years each. Property taken, seventeen bushels of wheat; valued ordinarily, would make the offense petit larceny. Judge and County Attorney think this a case for executive clemency. County officers and citizens concur.

Sentence commuted in each case to one and one-half years, March 25,

1878.

JOHN SPARKS HAMILTON—Grand Larceny—Butler County.—Convicted Sept. 28, 1876; sentence, three years from expiration of former sentence of three years. Commuted to one year. Prisoner in this case plead guilty. Non compos mentis. Punishment thought excessive.

SECRETARY OF STATE.

FIRST

BIENNIAL REPORT.

JUNE 30, 1878.

TO THE GOVERNOR.

TOPEKA, KANSAS:
GEO. W. MARTIN, KANSAS PUBLISHING HOUSE.
1878.

Office of Secretary of State, Topeka, Kansas, Sept. 1, 1878.

HON. GEO. T. ANTHONY, Governor of Kansas:

Your Excellency: I have the honor herewith to transmit the First Biennial Report of the business of this department. It is a complete record of the business during the seven months' deficiency caused by the change of the fiscal year, and for the full year ending June 30th, 1878. I would respectfully direct your attention to the recommendations contained in the report, for the amendment of the statutes in a number of instances, which, in my judgment, would be an improvement, in each case, upon the existing law.

Very respectfully yours,

THOS. H. CAVANAUGH,

Secretary of State.

REPORT.

LAWS.

I respectfully call your attention to the recommendation contained in my two former reports, concerning the amendment of the statute providing for and naming the number of the Session Laws that shall be printed, so that it will harmonize with the law controlling and directing the distribution of the same. As I have before stated, it requires now more than thirty-three hundred and fifty (3,350) copies of the Session Laws to supply the counties as at present organized, without providing for the many and constant formations of new townships in the older as well as in the newer or younger counties of the State. Every township so organized creates a demand for at least three additional copies to an already large list.

The matter has been before the Legislature upon two occasions, but being postponed until near the close of the session, the law died upon the calendar. Could it be considered, there would not be a dissenting vote upon its passage.

For the great relief and protection of my successor, I renew my petition for the passage of a law for the regulation of the issue of statutes from this office, upon resolution of either house; and in accordance with the precedent and custom established at the formation of the State, that the Secretary of State should furnish, for the use of members, reference books, the property of the State. This custom has been the source of great annoyance to this department, and the Legislature should protect the officer and the State by the passage of some law to regulate the distribution and return of all books, property of the State, into the custody of the Secretary of State.

STATE PRINTING.

Your attention is called to the statement of the public printing, as presented in the four tables submitted herewith. Tables Nos. 1 and 2 are for the deficiency caused by the change in the fiscal year, and tables Nos. 3 and 4 are for the fiscal year ending June 30, 1878. The account with the State Printer has been kept faithfully and accurately, as the law directs, and is correctly set forth in the accompanying tables.

The printing for the State has been executed promptly, and in a neat, workmanlike and creditable manner. Too much credit cannot be accorded to Mr. Geo. W. Martin, for his faithful compliance with the law.

I desire to express my entire satisfaction with the working of the law making the appropriations for public printing, and to testify to the great good resulting to the State in the perfect and satisfactory transaction of business under the law. Business under the new system has fully met my expectations, and deepened my conviction that, on account of the simplicity and accuracy permitted in the keeping of the accounts of the fund, the plan should not be changed.

(See next page for printing tables.)

Itemised statement of public printing for the seven months ending June 30, 1877, not including material used, and not including printing for the State Board of Agriculture; total cost of same, and amount appropriated. TABLE NO. 1.

Mr. Martin, in compliance with sec. 5, ch. 122 of the Laws of 1875, did, on the 5th day of July, 1875, designate the Commonwealth, published in Topeka, as the official State paper, and it continued to be the same until September 7th, 1878, when the Topeka Blade was designated, in like manner, as the official State paper, in which all laws, publications, advertisements, notices, etc., are required to be published.

PAPER AND BINDING STOCK.

In pursuance to an act of the Legislature, defining the duties of the Public Printer, approved March 3, 1876, Geo. W. Martin, State Printer, caused to be published, March 15, 1877, and March 15, 1878, in the *Tribune*, printed in the city of Chicago, Ills., and the *Globe-Democrat*, published in the city of St. Louis, Mo., an advertisement for proposals to furnish the State of Kansas, for use in the State Printing Office, for the period of twelve months from the 11th day of April, 1877, and twelve months from the 11th day of April, 1878, with all the paper and binding stock needed by the Public Printer in the lawful discharge of his duties for the time mentioned.

Bids were received as follows:

JOURNALS.

The copy of the House Journal for the State Printer was transcribed by Mr. W. W. Walton, Chief Clerk of the House, as directed by a resolution of the House, adopted on the day of March, 1877. I have approved vouchers, under the di-

rection of the House, for the pay of the same to the amount of \$500 for 5,000 folios. I have also approved vouchers for Mr. Walton, for the index to said Journal, amounting to the sum of \$200. The Journal shows of itself that the resolution of the House has been faithfully obeyed by its Chief Clerk.

The Journal of the proceedings of the Senate was transcribed by Capt. Henry Brandley, Secretary of that body, in accordance with a resolution adopted on the —— day of March, 1877. The copy was furnished as directed by law and in accordance with resolution, and I approved several vouchers for the remuneration of the same, for \$284 for 2,840 folios. I also approved voucher for the amount appropriated for the payment of making index, by the Secretary, to the Journal.

Journals of the proceedings of the two houses have been distributed as the law directs.

NOTARIES PUBLIC.

The two previous reports which I have submitted to the Executive of the State contained certain recommendations relating to notaries public. I desire in this report to call your attention to those suggestions, and, if possible, make them more pointed and direct in this report. The year and a half just past, and since the adjournment of the Legislature, has been no exception to the usual rule; and upon certifying to the official acts of notaries public, I have found that a number of notaries have done official acts long after their appointment as notary had expired. You are well aware that upon such grounds as these, are applications made to the Legislature to legalize acts so done and executed. It is a class of legislation which serves to cumber the statute book, and should be avoided when it is possible by so simple a remedy as is proposed. I therefore repeat the suggestion contained in my former reports, that to prevent all such acts and legislation a law should be enacted requiring all notaries public in the State to attach to their official signature the date of their appointment by the Governor of the State, and the term of such appointment. A number of States have such a law upon their statute books. and, consequently, in the session laws of those States, there are no "acts to legalize."

In Wisconsin, the present Governor has, by proclamation, terminated the tenure of all appointments heretofore made by Ex-

ecutives, for the purpose of putting notaries, in that State, on proper and equal footing. It was done that a correct record might be made in the Secretary's office of acting notaries in the State.

There is printed in another place in this report, a list of all the notaries appointed in and for the several counties in the State, a large proportion of whom have failed to qualify, or notice of whose qualification has failed to reach this office.

COUNTY OFFICERS.

Referring to this subject, I desire very respectfully to direct your attention to the recommendations contained in my former reports of this Department. I there recommended certain amendments to the law defining the duties of county clerks in the several counties of the State, to the end that it should be one of their lawful duties to forward to this office, for record and general information, a list of all the county officers, together with their official signatures, signed and sealed in the presence of the clerk, and so certified by him. In again urging this, I would call your attention to the fact that the Legislature passed a hill embodying all these suggestions, but that the original bill was lost, and did not reach the Executive for his approval. In calling your attention to it at this time, I am actuated by a desire to place this Department in possession of this information. that the Secretary of State may be able to comply with requests from citizens of this and other States, to certify to the official character, signature and seal of any county officer in the State who may by law be authorized or empowered to administer oaths and take acknowledgments; and further, that the information so secured may guide this Department, and all others in the State, in their dealings officially with the officers of the several counties of the State.

I would add to my former recommendations upon the subject, that the names of the justices of the peace in the several townships of the county be added to the list of county officers. In my judgment it is desirable, and should be the law, that the Executive Department, at the capital, be in possession of a knowledge of all the officers comprising the judiciary of the State, from the officer representing the minor courts to those upon the bench in the highest court.

A law of this kind is the rule of several States, and the Secretary of State is required by law to incorporate the information in annual reports.

Two years ago, when preparing my report, I addressed a request to the several county clerks in the State, for the information desired to be secured, and with a courtesy which I cheerfully acknowledge, my request was complied with, and I was enabled to present in my report the names of all the county officers in the State. The valuable assistance which that list has been to us (officers of the Executive Department), has made me again a trespasser upon their courtesy, and a request made this fall has met with as prompt and kind a response as in the first instance. The information which has thus been placed in my possession, I have incorporated in this report, and its presence, in my judgment, adds greatly to its interest and value as a reference book of the Department of State.

You will note that the arrangement of the list gives names of the officers in office, whose terms expire January, 1879, the offices and term of office; name of those elected November, 1877, whose term of office expires in 1880, and also the names and office of those elected in November, 1878, whose terms of office expire in 1881. In this way we have a complete list of all the officers now in office, who have been elected since former report, and of those whose office begins with 1879, the new administration.

I desire to publicly and officially acknowledge the many obligations which I am under to the gentlemen who have and do occupy official positions in the several counties in this State; and desire to say that during my administration of the department intrusted to my charge. I have never desired any act upon the part of the clerks of the several counties in the State, in the line of their official duty, that has not been promptly and accurately, kindly and courteously done. It has been my fortune in the past to have had the opportunity of judging of the qualifications of the gentlemen occupying office and intrusted with the people's business, in several of the States in this Western country, and I say it proudly that in none of those of which I have knowledge was the degree of efficiency shown as in our own I feel assured that a larger per cent. of gentlemen who are well qualified now occupy positions in the several counties of this State, than in any of the Western States, young or old.

To this selection of qualified and efficient persons as the immediate business representatives of the people, is due the high and honorable, favorable and prosperous position we now occupy as a State. In this is the explanation, and to this is due the praise which certain gentlemen take great pride and satisfaction in ascribing to an especial Providence, which, in their judgment, had, previous to their advent, presided over the destinies of the State.

Of the efficiency and of the courtesy of county clerks in this State, I am competent to speak, and I gladly say that, as a class, I never met any gentlemen who brought to the discharge of their duties any more of efficiency and knowledge of their duties—discharged with any more pleasant courtesy—than those who are now and have been during my administration clerks of the counties in Kansas. This in appreciation of the favors and courtesies shown.

STATE BOARD OF RAILROAD ASSESSORS.

MEETING OF 1877.

The Board, consisting of Lieut. Gov. M. J. Salter, T. H. Cavanaugh, Secretary of State, P. I. Bonebrake, State Auditor, John Francis, State Treasurer, and Willard Davis, Attorney General, met in the office of the Auditor of State upon the day appointed by law. The Board proceeded to organize by electing Lieut. Gov. M. J. Salter, President, and P. I. Bonebrake, Auditor of State, Secretary.

On motion, it was resolved that a personal inspection of the whole property to be assessed would be an advantage to the Board in fixing the value of the several kinds or classes of property to be assessed. The Board in person viewed and inspected the property of every railroad in the State, with the exception of the Kansas Central and the Leavenworth, Lawrence & Galveston, which road, upon resolution, Hon. John Francis, Treasurer of State, was requested to view and inspect and report to the Board.

The proceedings of the Board, in the ascertaining and fixing of the values of the property, you will find recorded at length in the Report of Hon. P. I. Bonebrake, Auditor of State.

MEETING OF 1878.

The Board met on the day required by law, in the office of the

Auditor of State. Present: T. H. Cavanaugh, Secretary of State; P. I. Bonebrake, Auditor of State; John Francis, Treasurer of State; Willard Davis, Attorney General. Absent: Hon. L. U. Humphrey, Lieutenant Governor. The Board organized by electing Hon. T. H. Cavanaugh, President, and Hon. P. I. Bonebrake, Secretary.

The proceedings of the Board, in the assessments of the several railroads of the State, with all their property, will be found recorded at length and published in the Report of the Hon. P. I. Bonebrake, Auditor of State.

I am pleased to be able to reaffirm my former opinion of the workings of this law. It seems to me to be the most just, equitable and satisfactory mode of assessment yet applied to railway property. There is satisfaction expressed by all the gentlemen who are managing the interests affected in this State, and I am certain it meets with the approbation of the people, for it furnishes a means and way for them to collect the proportion of the burdens of government due from the corporations. It in fact places the property upon an equality with that of the citizen, and provides no exclusive remedy in law without penalty.

STATIONERY.

On the 23d day of January, 1877, I advertised in the State paper for bids to furnish stationery for the use of the several departments of State Government for the year 1877, as follows:

PROPOSALS FOR STATIONERY.

Office of Secretary of State, Topeka, Jan. 23, 1877.

Sealed proposals will be received at this office until 12 o'clock M., of February 3d, 1877, for furnishing all stationery except lithographic work, required for the use of the State of Kansas for one year from February 3d, 1877. The supplies to be paid for monthly, excepting the three months of December, January and February, the stationery bills of which will be paid in March, and to be furnished as required.

In estimating the prices of all grades of writing papers, all envelopes, wrapping papers, etc., the bidder will be required to submit specimens, with prices indorsed thereon, together with statement of size, grade, weight, etc. The aggregate amount of supplies to be used by the State guaranteed not to fall below an average of \$100 per month.

The successful bidder will be required to give satisfactory bond.

The right is reserved to reject any or all bids.

Schedule of the stationery required will be furnished at this office.

THOS. H. CAVANAUGH, Secretary of State-

Mr. Geo. O. Wilmarth was the only bidder, and was awarded the contract for furnishing stationery to the State for the year 1877, at the following prices:

TOPEKA, KANSAS, February 3, 1877.

Hon. Thos. H. Cavanaugh, Secretary of State, Topeka, Kansas:

DEAR SIR: I hereby propose to furnish the stationery that you may require for supplying the State officers and Legislature for the ensuing year, at the prices named upon the inclosed list; goods to be delivered at your office in good order.

Assuring you that I shall endeavor in the future, as in the past, to give you satisfaction in every particular, should the contract be again awarded to me,

I am, very respectfully, yours,

G. O. WILMARTH.

On the 23d day of January, 1878, I advertised in the State paper for bids to furnish the State departments with stationery for the year 1878, as follows:

PROPOSALS FOR STATIONERY.

Office of Secretary of State, Topeka, Jan. 23, 1878.

Sealed proposals will be received at this office until 12 o'clock M., of February 3d, 1878, for furnishing all stationery, except lithographic work, required for the use of the State of Kansas for one year from February 3d, 1878. The supplies to be paid for monthly.

In estimating the prices of all grades of writing papers, all envelopes, wrapping papers, etc., the bidder will be required to submit specimens with prices indorsed thereon, together with statements of size, grade, weight, etc. The aggregate amount of supplies to be used by the State guaranteed not to fall below an average of \$100 per month.

The successful bidder will be required to give satisfactory bond.

The right is reserved to reject any or all bids.

Schedule of stationery required will be furnished at this office.

THOS. H. CAVANAUGH, Secretary of State.

Bids were received of Geo. O. Wilmarth, Esq., Topeka, Kansas, and Messrs. T. J. Kellam & Co., Topeka, Kansas. The contract for furnishing the State with stationery for the year 1878 was awarded to Geo. O. Wilmarth, Esq. The bids are as follows:

TOPEKA, KANSAS, February 4, 1878.

Hon. T. H. Cavanaugh, Secretary of State, Topeka, Kansas:

DEAR SIR: I hereby propose to supply the stationery that you may require for the use of the State officers and Legislature, for the ensuing year, at the prices named upon the inclosed list, all goods to be delivered at your office without extra charge; and the goods to be of the same style and quality as those supplied by me during the past year.

Assuring you that I shall endeavor in the future, as in the past, to give you satisfaction in every particular, should the contract again be awarded to me,

I am, very respectfully yours,

GEO. O. WILMARTH.

Explanation.— Upon all rubber bands in full package quantities, a discount of 10 per cent from prices named will be given.

Envelopes in considerable quantities, a discount of 5 per cent. from above prices in red ink will be given.*

Prices that are given at gold rates, the premium upon gold at the time of purchase to be the rate to be taken.

Office of T. J. Kellam & Co., Dealers in Books and Stationery, Topeka, Kas., February 4, 1878.

Hon. Thos. H. Cavanaugh, Secretary of State:

DEAR SIR: We submit herewith a bid, with samples, for contract to supply the State of Kansas with stationery for one year, in accordance with your advertisement hereto attached; the goods to be delivered at your office free of charge for freight, boxing or carting.

Our prices are all for first-class goods, obtained by special arrangement with manufacturers; and we engage to supply you promptly, and to your perfect satisfaction, should the contract be awarded to us.

Very respectfully,

T. J. KELLAM & Co.

STATE BOARD OF CANVASSERS.

Below are printed the proceedings of the State Board of Canvassers, at a special session held in the office of the Secretary of State, January 16, 1877, and at the regular session begun on the 26th day of November, 1877, and concluded on the 1st day of December, 1877:

SPECIAL ELECTION IN THE SECOND SENATORIAL DISTRICT, To fill vacancy caused by the resignation of Hon. A. H. Horton.

Office of the Secretary of State, Topeka, Kas., Jan. 16, 1877.

Pursuant to call of the Governor, the State Board of Canvassers met in the office of the Secretary of State, Tuesday, January 16, 1877; Governor Anthony in the chair. Present: Messrs. Cavanaugh, Bonebrake and Francis.

The Secretary of State presented the following abstract of votes cast at a special election held in the Second Senatorial District, on the 12th day of January, A. D. 1877, under proclamation of the Governor, for Senator of the Second Senatorial District, composed of the county of Atchison. W. W. Guthrie received one thousand and thirty-three votes, Geo. W. Glick received eight hundred and six votes; total vote in the district, eighteen hundred and thirty-nine. W. W. Guthrie's majority was two hundred and twenty-seven.

On motion of Hon. P. I. Bonebrake, the person having received the highest number of votes was declared elected, and the Secretary of State instructed to issue a certificate of election to said person, to wit, W. W. Guthrie. No further business appearing, Board adjourned size die.

GEO. T. ANTHONY, Governor.
T. H. CAVANAUGH, Secretary of State.
P. I. BONEBRAKE, Auditor of State.
JNO. FRANCIE, Treasurer of State.

GENERAL ELECTION HELD NOVEMBER 6, 1877.

OFFICE SECRETARY OF STATE, TOPEKA, KANSAS, November 26, 1877.

State Board of Canvassers met, pursuant to law, in the office of Secretary of State, Monday, the 26th day of November, 1877. Present: Governor, Geo. T. Anthony; Thos. H. Cavanaugh, Secretary of State; P. I. Bonebrake, Auditor; John Francis, Treasurer of State. Absent: Willard, Attorney General.

On motion of Auditor, Governor Anthony was chosen Chairman. On motion of Treasurer, Thos. H. Cavanaugh was chosen Secretary of the Board.

On motion of Auditor, Board adjourned until 9 o'clock Wednesday morning, November 27, 1877. GEO. T. ANTHONY, Chairman.

T. H. CAVANAUGH, Secretary.

OFFICE SECRETARY OF STATE, TOPEKA, KAS., Wednesday, 9 a. m., November 27, 1877.

State Board of Canvassers met pursuant to adjournment, Governor Anthony in the chair. Present: Messrs. Cavanaugh, Bonebrake, Francis, and Davis.

On motion of the Attorney General, the Board took a recess until 3 o'clock this P. M.

Three o'clock P. M., November 27, 1877—Session of Board resumed. All members present.

On motion, Board proceeded to canvass the returns for Chief Justice of the Supreme Court to fill vacancy, and declared that Albert H. Horton, having received the highest number of votes cast, was the duly-elected Chief Justice of the Supreme Court to fill vacancy. For abstract, see "Exhibit A," following.

On motion, Board proceeded to canvass the votes cast for Judges of the District Court in the Tenth Judicial District, and Hiram Stevens, having received the highest number of votes cast, was declared the duly-elected Judge of the Tenth Judicial District. For abstract of votes see "Exhibit C," following.

On motion, Board adjourned to meet Friday, November 30, 1877, at 3 o'clock P. M. GEO. T. Anthony, Chairman.

T. H. CAVANAUGH, Secretary.

OFFICE SECRETARY OF STATE,
TOPEKA, KANSAS, Friday, November 30, 1877,
3 o'clock, p. m.

The State Board of Canvassers met pursuant to adjournment; Governor Anthony in the chair. All the members present.

On motion, the Board proceeded to canvass the returns for Judge of the District Court of the Fifteenth Judicial District; and Joel Holt having

received the highest number of votes cast, was declared the duly-elected Judge of said district. For abstract of votes, see "Exhibit C," following.

On motion, the returns of the votes cast for member of the Legislature, to fill vacancy in Rush county, were referred to the Attorney General, with the request that he give his opinion as to the right of the Board to canvass said returns, by 10 o'clock Saturday, December 1, 1877.

On motion, the Secretary was instructed to notify Mr. L. U. Humphrey, or his attorney, that the Board would have under consideration the returns showing the votes cast for Lieutenant Governor, to fill vacancy, on Saturday, December 1, 1877, at 10 o'clock A. M., and request his presence before the Board, should he so wish.

On motion, the Board adjourned, to meet at 10 o'clock A. M., Saturday, December 1, 1877.

GEO. T. ANTHONY, Chairman.

T. H. CAVANAUGH, Secretary.

OFFICE SECRETARY OF STATE, TOPEKA, KANSAS, December 1, 1877.

Board met pursuant to adjournment; Gov. Anthony in the chair. All the members present.

Attorney General Davis made a verbal statement in regard to the canvassing of the votes cast for Representative to fill vacancy in Rush county,
that had been referred to him yesterday. After which, on motion of Mr.
Cavanaugh, the Board proceeded to canvass the returns from Rush county.
Mr. A. Mott having received the highest number of votes cast, was declared
the duly-elected Representative from Rush county, to fill vacancy. For
abstract of votes cast, see "Exhibit B."

On motion, the Board proceeded to canvass the votes cast for Lieutenant Governor, to fill vacancy. Lyman U. Humphrey having received the highest number of votes cast, was declared duly elected to said office to fill vacancy. For abstract of votes cast, see "Exhibit A."

No further business appearing, the State Board of Canvassers adjourned sine die.

GEO. T. ANTHONY. Chairman.

T. H. CAVANAUGH, Secretary.

EXHIBIT A.

Statement of the votes cast at the general election held on the 6th day of November,
A. D. 1877, in the various counties of the State of Kansas, for Lieutenant Governor
to fill vacancy, and Chief Justice of the Supreme Court to fill vacancy, as canvassed
by the State Board of Canvassers, at their annual session, begun on the 26th day of
November, 1877, and coucluded on the 1st day of December, A. D. 1877.

We, the undersigned, State Board of Canvassers, do hereby certify that the above and foregoing is a true and correct statement of the votes cast at the general election held on the 6th day of November, A. D. 1877. In the various counties of the Tenth and Fifteenth Judicial Districts of the State of Kansas, for Judges of the District Court, as appears from the certified abstracts of said votes on file in the office of Secretary of State; and in accordance therewith, we do determine and declare that the persons having the greatest number of votes as above shown, were duly elected to the offices therein designated, to wit: Judge of the Tenth Judicial District, Hiram Stevens; Judge of the Fifteenth Judicial District, Joel Holt.

(Signed)

GEO. T. ANTHONY, Governor.
THOS. H. CAVANAUGH, Secretary of State.
P. I. BONEBRAKE, Auditor of State.
JOHN FRANCIS, Treasurer of State.
WILLARD DAVIS, Allorney General.

There will be found in the Appendix, proceedings of the Board of Canvassers in the canvass of the vote cast for State officers, members of Congress for the several districts and Congressman at Large, members of the Senate to fill vacancies in the 10th, 16th, 21st, 30th, and 38th districts, members of the House of Representatives over the entire State, and for Judge in the 11th, district.

I have postponed the publication of my report to include this, for, under the law governing the publication of reports of the several officers, there will not be any further report from this office until after the election in 1880. This information will be invaluable to the citizens of the State, and in my judgment is in proper place in this report.

COMMISSIONS.

There is submitted herewith a full and correct list, under proper classification, of all the commissions issued by this department upon the order of your Excellency. There is in the list a record of the names of all Notaries Public, Commissioners of Deeds, and of those gentlemen appointed by your Excellency, and confirmed by the Senate, for positions in the State at large.

CHANGE IN FISCAL YEAR.

The results of the change in the fiscal year have been as fore-shadowed in my report of 1876, which contained the recommendation to your Excellency that a change should be made.

The wonder now is, how the business of the State was ever transacted under the old rule. The change has resulted in material benefit to the State, and has had the effect of making the transaction of business by the several departments more pleasant and satisfactory.

I herewith submit the usual estimates for the expenses of this department, for the fiscal years ending June 30, 1880, and June 30, 1881. The expenses are divided into direct and indirect. This I do in justice to the department of the Secretary of State, that it may not appear and stand charged upon the Auditor of State's books, with more money than is expended directly for the running and legitimate expenses of the department. The estimates of direct expenses are only such as are entirely and exclusively for the use of this department, while those set down as indirect are those appropriations under the direction and control of the Secretary of State, but are expended for all the departments in the State.

These estimates are made with a view to secure the "maximum of efficiency, with a minimum of expenditure."

The estimates for 1881 include provision for a session of the Legislature, which accounts for the larger sums asked for for the purchase of certain items.

You will note that I have added to the indirect expenses the sum of \$400, for repairs to the State House. Such appropriation should be made for the purpose of keeping in repair, during the legislative interim, the capitol buildings:

ESTIMATES FOR FISCAL YEAR ENDING JUNE 80, 1880.

Direct Expenses.		
For clerk hire	4.600	
For postage and telegraphing	500	
For freight and express	75	
For contingent	400	
		\$5,575
INDIRECT EXPENSES.		40,0.0
For stationery	2.000	
For fuel	1.000	
For gas	1.000	
For blank books	200	
For engineer	800	
For repairs to State House		
For janitor	800	
For fireman	600	
For ice		
		6,900
m. t. 1 authoritor for 1890	:	10 435

FOR FISCAL YEAR ENDING JUNE 80TH, 1881.

Add five hundred dollars (\$500) to the stationery, two hundred and fifty dollars (\$250) to the gas, fifty dollars (\$50) to blank-books, two hundred dollars (\$200) to the fuel, twenty-five dollars (\$25) to freights and expressage, fifty dollars (\$50) to the postage appropriations, to provide for the session of the Legislature to be held that year — making a total for direct expenses of \$5,650, and for indirect expenses \$7,900, and total, \$13,500.

ESTIMATES FOR THE FISCAL YEAR ENDING JUNE 80, 1881.

DIRECT EXPENSES.		
For clerk hire	\$4,600	
For postage and telegraphing	550	
For freight and express	100	
For contingent	400	
Lot confittene		
-		\$5,650
INDIRECT EXPENSES.		
For stationery	\$2,500	
For fuel	1,200	
For gas	1.250	
For blank books	250	
For engineer	800	
For engineer		
Repairs to State House	400	
For janitor	800	
FOR Breman	600	
For ice	100	
_		7,900

Total estimates for 1881		18,550

STATE HOUSE—RECOMMENDING CONSTRUCTION OF THE WEST WING.

I would very respectfully ask your attention to a few facts connected with the State House as it is at present, and to a few reasons why the west wing should be erected, or other room provided, to relieve the several Departments of State from their present overcrowded condition.

During the past four years the business of the several departments of the State have increased very largely, and, with the attendant accumulation of books, papers and records, we now find that every office in the State Capitol is crowded beyond the capacity of the space afforded by the room or rooms assigned to each and every department. In this Department, there is need for as much more room to provide for the most convenient, safe and correct manner of preserving the property and valuable official documents and papers belonging to the State.

It is of your knowledge that the same is true of every other department in the government of the State. Of the Treasury Department, it is my opinion that there is pressing need of more room—not alone for the convenience, health and efficiency of

the Treasurer and his assistants, but for the safety of the funds and securities of the State. I could go on and enumerate each and every office in the Department of State.

There are two or three other State appendages that I desire to speak of. The State Board of Agriculture has been made by the efforts of yourself and others one of the most important institutions of the State, and I say that it has not one-fourth of the room required for the arrangement and preservation of the many valuable specimens of the agricultural productions and the mineral wealth of the State which it has secured by the lavish expenditure of time and money, nor has it any facilities for the preservation and display of the many valuable and interesting articles received in exchange from other States and many foreign countries. This is a department of considerable interest to all our citizens, and to those citizens of other States visiting our State it is attractive and instructive, placing at once under his observation the varied soils and productions of the State. With this knowledge of the facts, I venture upon the following suggestions for your consideration, and express the hope that it may be deemed by you of sufficient importance to merit a paragraph to the Legislature in your annual message.

I am satisfied after careful consideration, that the most satisfactory way to provide more room, and in fact the only way to provide all the room necessary, is to erect and complete the west wing of the State Capitol.

The State Historical Society is now occupying the hall-way west of the Senate entrance, and it cannot remain in undisputed possession of that space. The Senate having, at its last session, adopted a resolution recommending and requesting that I should place that space within the Senate chamber, I have had architects examine the partitions, and, upon the assurance of several that I could with safety remove the partitions, I have directed Mr. C. B. Hopkins, architect and builder, residing in this city, to make the change as requested by Senate resolution.

The Society has, through the constant effort of its Secretary, aided by the Directors, secured a very large number of valuable manuscripts, maps and pictures, which are indissolubly connected with and interwoven in the history of our State. This Department is entitled to respectful consideration, and should have quarters assigned it within the State Capitol.

The Department of Insurance is without a suitable office; and the Superintendent of Public Instruction should be assigned quarters in a place where there would be space sufficient to turn around. The business in the Superintendent's Department is increasing with the growth of the State, and with the assistance now provided by law, and the inconvenient quarters now occupied, requires constant and unremitting labor to dispatch satisfactorily the business of the department.

In recommending the construction of the west wing of the Capitol, I am satisfied that I am urging the erection of only a building which will furnish all the room required for the least sum of money, and that it is the most economical plan that can be proposed.

To build separate buildings, of which there is some suggestion, would in a few years result in a useless expenditure of money upon the part of the State; for the time is rapidly approaching, when there must be additional legislative room. Even now the hall of the House is inconveniently crowded, and there has not been a year since I have known the State that the head of this department has not under resolution provided rooms for more than half a dozen committees of the Legislature. The construction and completion of the west wing will completely obviate any necessity of this, and place at the disposal of the several officers of the State all the room they require.

I have on file in this office estimates for the construction of the west wing, which estimates set forth a sum less than half the cost of the east wing. I am satisfied that with the lessened cost of the material and reduction in the price of labor, the west wing can be built for even a less sum than estimated two years since.

I sincerely hope the Legislature will at the next session appoint a joint committee, or that the committees on public buildings in the several houses be directed by resolution to investigate this matter, and make a report without delay, that it may be acted upon early in the session.

The east wing is sadly in need of repairs. The cornice, to preserve it, should be repaired or galvanized. The inside woodwork should be repaired and painted. The heating apparatus we consider out of repair to such an extent as to almost endanger the safety of the building. Such repairs as were absolutely

necessary I have had made, and the bills for the same are unpaid, and will be presented to the Legislature at the coming session for payment. I carnestly recommend that the entire steam-heating apparatus be overhauled and repaired before some serious accident shall occur.

I would respectfully suggest that an appropriation be made and placed under control of the Secretary of State, to be expended in repairs of the building and fixtures during the next two years. I have incorporated such a sum in my estimate of indirect expenses.

The capitol grounds should be placed in a creditable condition. The south half of the grounds should be graded. The cost will be but a nominal sum. There is stone enough lying loose on the south half to macadamize the drive, if gathered and broken up for that purpose.

ARTICLES OF INCORPORATION.

(For county officers elected in 1878, see Appendix.)

THE PERMANENT SCHOOL FUND.

I would respectfully direct your attention to the report in detail of the investment and management of this fund, as set forth in the First Biennial Report of the Hon. A. B. Lemmon, Superintendent of Public Instruction. I desire to indorse heartily the recommendation therein referring to the rate of interest upon the bonds issued in the future by school districts in this State. In my judgment, ten per cent. interest is more than a people, individually or collectively, can safely agree to pay, or pay. The accumulations of the permanent fund, in the future, will nearly absorb the whole amount of bonds issued by the districts of the State.

I would further recommend a provision in the law authorizing the Commissioners to dispose of any United States bonds belonging to the fund, when in their judgment the best interests of the fund, confided to their best care, shall demand it. This will enable the Commissioners to have funds on hand to purchase any and all State or school-district bonds that shall be offered. That no such securities shall be disposed of, except for the purchase of State or school-district bonds.

There is one more matter in this connection that, in my judgment, demands and deserves attention. The law providing for the sale of the school lands, (the 16th and 36th sections of each township,) should be amended; for now it places them in jeopardy, as the prey of schemers and speculators. It should not be permitted by law, that any person or persons could make settlement on school lands, for the purpose of claiming and buying such lands when appraised and offered for sale. It leads to the formation of associations of men for the purpose of securing the lands in this manner. They control the petition for the sale, the appointment of appraisers, and indirectly the appraisement, of lands. It precludes the possibility of competition of bidders on the day of sale, for no citizen desires or will bid against the occupying claimant. Through this manner of proceedings, the school fund is defrauded out of a fair and honest price for the lands which are an endowment from the United States.

I would therefore suggest that you renew your recommendation to the Legislature, of the creation for the State of a land department, with a commissioner, and all the necessary machinery for listing, valuing and disposing of these and all other State lands.

BOARD OF EQUALIZATION.

You will find in the report of the Hon. P. I. Bonebrake, Auditor of State, a full record of the proceedings of the State Board of Equalization for the two calendar years of the present fiscal year.

The suggestions which the Auditor has made, I heartily indorse; and hope that the attention of the Legislature may be called to this important subject. Such recommendations as were intended to be placed in this report, are now incorporated in the report of the Committee upon the Revision of the Laws of the State.

PUBLICATION OF THE REVISED STATUTES.

Should the Legislature, at its approaching session, receive and adopt the work of the Committee of Revision, it will place in this Department a very large amount of work not provided for

by law. It is the duty of the Secretary of State to publish all laws. To issue the Session Laws by the first of June, succeeding the adjournment of the Legislature, requires that all other work of the Department shall be suspended and postponed, and the entire force concentrated on this work. The laws are all copied, and before appearing in the volume of Laws there are made five comparisons in this office, and as many more in the office of Public Printer.

I would suggest, therefore, that, in my judgment, it will be necessary for the Legislature to provide by law the help and assistance necessary for the speedy publication of the Statutes, by this department, as the law now directs.

COMPARISON OF VOTES, AND ESTIMATED POPULATION OF THE STATE.

Comparison of the votes cast in 1878 with the votes cast in 1876, and an estimate of the population of the State, by counties, from the vote of 1878.

APPENDIX

TO THE

FIRST BIENNIAL REPORT

OF THE

SECRETARY OF STATE,

JUNE 30, 1878.

Containing Abstract of Votes Cast at the General Election held Nov. 5th, 1878, for State Officers, Members of Congress, Members of the House of Representatives, and Members of the Senate to Fill Vacancies; Official Vote of State, by Townships, at the General Election held Nov. 5th, 1878; List of County Officers elected at the General Election held Nov. 5th, 1878; and Register of State Government for 1879.

APPENDIX.

Office Secretary of State, Topeka, Kansas, November 25, 1878.

State Board of Canvassers met, pursuant to law, in the office of Secretary of State, at 10 o'clock A. M., November 25, 1878—a quorum being present. On motion, Governor Geo. T. Anthony was chosen Chairman, and Hon. P. I. Bonebrake was chosen Secretary.

Board proceeded to canvass returns of the votes cast for the various officers, as returned by the county clerks to the Secretary of State. After canvassing as far as Barton county, the Board, on motion, adjourned until 3 o'clock P. M., Tuesday, November 26, 1878.

GEO. T. ANTHONY, President.

P. I. BONEBRAKE, Secretary.

Tuesday, 3 o'clock P. M., November 26, 1878.

Board of Canvassers met pursuant to adjournment, a quorum being present.

Board proceeded with the canvass until Kingman county was reached. The returns from this county not having been received, on motion, the Board adjourned until 3 o'clock P. M., Wednesday, November 27, 1878.

GEO. T. ANTHONY, President.

P. I. BONEBRAKE, Secretary.

WEDNESDAY, 3 o'clock P. M., November 27, 1878.

Board met pursuant to adjournment, a quorum being present. The returns from Kingman county not having been received, on motion, Board

GEO. T. ANTHONY, President.

P. I. BONEBBAKE, Secretary.

FRIDAY, November 29, 1878 — 9 o'clock A. M.

Board met pursuant to adjournment, a quorum being present.

adjourned until 9 o'clock A. M., Friday, November 29, 1878.

The Board proceeded with the canvass of votes, with the following result: (See statements following these minutes.)

No further business appearing, State Board of Canvassers adjourned sine die.

GEO. T. Anthony, President.

P. I. BONEBRAKE, Secretary.

MEMBERS OF CONGRESS.

Statement of the votes cast at the general election held on the 5th day of November, A. D. 1878, for Member of Congress of the First Congressional District, as canvassed by the State Board of Canvassers, at their annual session, begun on the 25th day of November, A. D. 1878, and concluded on the 29th day of November, A. D. 1878.

We, the undersigned, State Board of Canvassers, do hereby certify that the above and foregoing is a true and correct statement of the votes cast at the general election held on the 5th day of November, A.D. 1878, in the various counties of the State of Kansas, for Members of Congress at Large, as appears from the certified abstracts of said vote on file in the office of Secretary of State; and in accordance therewith, we do determine and declare that James R. Hallowell received seventy-three thousand nine hundred and seventy-eight votes, Samuel J. Crawford received sixty thousand one hundred and fifty-eight votes, and there were eight scattering votes.

(Signed) GEO. T. ANTHONY, Governor.

 GEO. T. ANTHONY, Governor. THOS. H. CAVANAUGH, Secretary of State. JOHN FRANCIS, Treasurer of State. P. I. BONEBRAKE, Auditor of State. WILLARD DAVIS, Attorney General.

STATE OFFICERS.

Statement of the votes cast at the general election held on the 5tb day of November, A. D. 1878, for Governor, Lieutenant Governor, Secretary of State, Auditor of State, Trassurer of State, Attorney General, Superintendent of Public Instruction, and Chief Justice of the Supreme Court, as canvassed by the State Board of Canvassers, at their annual session, begun on the 25th day of November, A. D. 1878, and concluded on the 29th day of November, A. D. 1878.

STATE OF KANSAS.

FIRST BIENNIAL REPORT

OF THE

AUDITOR OF STATE,

AND

REGISTER OF STATE LAND OFFICE,

FOR FISCAL YEARS ENDING JUNE 30, 1877, AND JUNE 30, 1878.

TOPEKA, KANSAS:
GEO. W. MARTIN, KANSAS PUBLISHING HOUSE.
1878.

REPORT.

Office of the Auditor of State, Topeka, Kansas, August 1, 1878.

To His Excellency, GEO. T. ANTHONY, Governor:

In compliance with section 1 of chapter 180, Session Laws of 1877, I have the honor to submit the Biennial Report of the Auditor of State for the fiscal period (seven months) ending June 30th, 1877, and the fiscal year ending June 30th, 1878, embracing exhibits of receipts and expenditures, appropriations, assessments, and such other transactions as the law requires shall be reported by this office.

The law requires the Auditor of State to "mention all the apparent defects, inconsistencies, omissions, unequal and oppressive laws, etc., for the purpose of enabling the Legislature to make such amendments as will tend to perfect the statute laws of the State." From the fact that the Legislature at its last session provided for a revision of the statutes, and that the Commissioners appointed for that purpose will embody in their report many changes in the laws relating to this department and the collection of the revenues, I deem it unnecessary to make many suggestions at this time. The suggestions and recommendations made will be found in connection with the tabular or other exhibits.

This Report will be divided as follows:

(For the seven months ending June 30, 1877.)
PART I.

RECEIPTS AND EXPENDITURES.

PART II.

APPROPRIATIONS.

PART III.

ASSESSMENT AND TAXATION.

PART IV.

SCHOOL-LAND ACCOUNTS.

(For the fiscal year ending June 30, 1878.)

PART I.

SUMMARY OF RECEIPTS AND EXPENDITURES.

PART II.

APPROPRIATIONS.

PART III.

REVENUE ACCOUNTS.

PART IV.

SCHOOL-LAND ACCOUNTS.

PART V.
ASSESSMENT AND TAXATION.
PART VI.
STATE AND MUNICIPAL DEBT.

PART VII.

PROCEEDINGS BOARD OF TREASURY EXAMINERS AND SINKING-FUND COMMISSIONERS
PART VIII.

MISCELLANBOUS.

REPORT STATE LAND OFFICE.

FINANCIAL AFFAIRS.

There was a balance in the treasury, at the close of the fiscal year ending June 30th, 1878, amounting to the sum of \$312,811.07, after the payment of all sums for which the several funds were liable. This amount, with the tax levy for the current year, will aggregate the sum of \$1,075,654.46.

The amount raised by the tax levy for general revenue purposes (\$485,445.92), together with the proportion due this fund from the balance of last year (\$118,758.57), raises the sum of

\$604,204,49.

The appropriations for the present fiscal year amount to \$395,984.85, which, if deducted from the above sum, will leave a balance in the treasury, at the close of the present year, of \$208,219.64. But it must be borne in mind that the legislative expenses of the next session, together with deficiency and miscellaneous appropriations, estimated at \$75,000, must be paid from this year's levy, thus leaving an estimated net balance in the treasury, June 30, 1879, of \$133,219.64. In my opinion, the revenue tax levy for 1880 and 1881 can be reduced to three mills on the dollar.

INTEREST FUND.

The interest on our State bonds has been paid at maturity, and there was a balance of \$48,810.48 in the interest fund at the close of the year. The levy for this year will raise the additional sum of \$110,959, making a total of \$159,769.45. The annual interest on State indebtedness amounts to \$81,723.50.

SINKING FUND.

During the year the Board of Sinking-Fund Commissioners have purchased for said fund \$4,200 in Kansas State bonds at par, and have purchased \$25,600 in United States four per cent. coupon bonds. Government bonds were purchased because Kansas six per cent. bonds commanded a premium of twelve per centum. For the same reasons, the Commissioners of the

PERMANENT SCHOOL FUND

Invested \$142,000 in United States registered four per cent. bonds. I make this suggestion: that the Legislature, at its next session, reduce the rate of interest on school-land sales to seven per cent. per annum, and extend the time of final payment to twenty years. With a low rate of interest, purchasers would withhold payments of principal, thus affording the State a fair interest with perfect security, and avoiding the trouble and risk incident to investments in bonds.

PART I.

The following statements exhibit the balance in the treasury, December 1, 1876, the amounts received and the amounts disbursed during the seven months ending June 30, 1877:

SUMMARY OF RECEIPTS AND EXPENDITURES for the seven months ending June 30, 1877.

		Receipts and Expenditures.

ENGROSSING AND ENROLLING EXPENSES.

Although connected with the legislative division of the State Government, I will call attention to the expenses connected with the engrossing and enrolling of legislative bills. For the session of 1877, it cost the State the sum of \$2,249 to engross and enroll the House bills, and the sum of \$1,230.60 for a similar service for Senate bills—making a total of \$3,479.60. Anyone familiar with the present method of performing this work, will admit that it is not only a very expensive method, but a very unsatisfactory one. I will suggest that all bills be referred to the Secretary of State, and their engrossment and enrollment become a part of the duties of his office; the work to be done at a given rate per folio, under his direction. This method would insure celerity, accuracy, and a saving of \$2,000 per session.

SCHOOL BOND REGISTER.

In pursuance of the provisions of chapter 172, Session Laws of 1877, a record has been prepared, and a complete register of the bonds and coupons belonging to the permanent school fund has been made; and for the first time since the organization of the State, there is an account in the Auditor's office which shows the number and amount of the permanent school fund bonds in the hands of the State Treasurer. That a certain State Treasurer did not take out good bonds, instead of taking in forged bonds, is somewhat remarkable.

Date.	BOND ACCOUNT SINKING FUND.	Dr.	Or.

The appropriation made for this purpose at the last session was entirely inadequate for the services rendered. This has been the case in former years. This condition of affairs works a great hardship to the sheriffs, who have to advance the money to pay guards' railroad fare, and other expenses, and who often have to wait six to twelve months for their money. An ample appropriation should be made for this purpose.

PATENTS FOR STATE SCHOOL LANDS.

It has been the custom of the county officers to receive money from purchasers of school lands after they were in default in payment of principal or interest in such purchases, and it has been the practice of the State officers to issue patents on such lands upon payment of all amounts due the State. Up to January, 1878, the rights of defaulting purchasers had not been judicially determined. At the January (1878) term of the Supreme Court, in the case of the State of Kansas vs. Wm. H. Emmert, the court substantially decided that if a purchaser of school land fails to pay the interest or principal at the time the same becomes due, such failure works a forfeiture, and the interest of the purchaser instantly and absolutely ceases.

In view of the fact that by the practice of State and county officers hereinbefore mentioned, purchasers have been led to believe that forfeitures would not be enforced except in cases of the abandonment of the land, and the further fact that such forfeitures would be a great hardship on the purchasers, I would suggest that the Legislature pass a relief act granting to purchasers the right to make full and final payment at any time within six months from April 1st, 1879; after which time county officers shall be prohibited from receiving payments, and State officers shall be prohibited from issuing patents to forfeited lands.

FEES ON SALES OF SCHOOL LAND.

The fees paid to county officers and others on account of sales and other matters incident to the sales of State school lands, for the year ending June 30th, 1878, amounted to \$8,365. In my opinion, the law which allows fees to county officers for services in connection with sales of school lands should be abolished. The officers do not get the benefits of these fees, as they are deducted from their quarterly salaries, and thereby the benefits go to the counties. Nearly all the counties have school lands. The pro-

ceeds of the sales go for the benefit of the people of the counties, so that by my suggestion no wrong is committed. As an additional reason, I may say that this fund is made to pay excessive and illegal fees because of the ignorance or carelessness of persons allowing or claiming fees for services rendered.

PART V.

ASSESSMENT AND TAXATION.

INTEREST ON TAX-SALE CERTIFICATES.

A few years ago, and at the time of the passage of the present tax law, money commanded from eighteen to twenty-four per cent. in ordinary business transactions. It required special inducements to cause men to invest in tax-sale certificates, as there were so many causes for which a tax sale could be set aside. The law has worked well so far as the State and municipal revenues are concerned, as is demonstrated in the fact that the State tax levies of the years 1876 and 1877 were more fully paid than at any previous time in the history of the State. But now, when interest is at a lower rate, capital more abundant, and opportunity for safe and profitable investments are fewer, I think the rate of interest on tax sales might be reduced with perfect safety to the State and local revenues, and to the great benefit of tax-payers. I would therefore suggest that the law be so amended as to fix the rate of interest at twenty-five per cent. per annum.

Note.—In the opinion of the Auditor of State, the bonds of Barbour and Harper counties, enumerated in the foregoing schedule, are fraudulent. The counties named had not the requisite population to entitle them to an organization, and they were not legally organized. The "court house" for Harper county, and the "Northern Kansas & Southwestern Railroad" for Barbour county, were never built, and the "county indebtedness" in both counties was created by illegally-constituted officers.

PART VII.

PROCEEDINGS OF BOARDS OF STATE OFFICERS.

EXAMINATIONS OF THE STATE TREASURY.

Examinations of the State treasury were made as provided in section 52, chapter 102, General Statutes of 1868, on the following dates:

December 30th, 1876; January 31st, 1877; February 27th, 1877; March 30th, 1877; April 28th, 1877; May 26th, 1877; June 25th, 1877; July 28th, 1877; August 24th, 1877; September 24th, 1877; October 29th, 1877; November 26th, 1877; December 24th, 1877; January 26th, 1878; February 26th and 27th, 1878; March 26th, 1878; April 29th, 1878; May 16th, 1878; June 25th, 1878.

The reports of the Board of Examiners' are all duly recorded in this office.

OFFICE OF AUDITOR OF STATE, TOPEKA, KANSAS, August 13, 1877.

On the 13th day of August, 1877, as required by chapter 172, Session Laws 1877, I compared the bonds belonging to the permanent school fund of the State of Kansas, with the register of said bonds, as kept in this office, and find that the number and amount of said bonds agree with the Auditor's register.

In testimony whereof, I have hereunto set my hand this 20th day of August, 1877.

P. I. BONEBRAKE,

Auditor of State.

SEMI-ANNUAL EXAMINATIONS OF THE TREASURY BY THE AUDITOR OF STATE.

The following is a statement of the condition of the treasury November 26, 1877.

The following statement of accounts, from the books of this office, shows the charges against the State Treasurer:

	Dr.	Or.
General revenue fund		
Sinking fund	81,438	48
Interest fund		50
Annual school fund	58,443	39
Permanent school fund		18
Insurance fund		62
Library fund	1,700	00
Railroad fund		67
Military fund	•	
University fund		00
Agricultural College tax fund		88
Normal school land fund	1.516	
The following items are presented as assets to balance the		
above accounts, viz.:		
Currency in safes and drawer		\$352,376 85
Revenue orders redeemed		
Insurance orders redeemed		
Agricultural College orders redeemed		
Annual school orders redeemed		
Permanent school orders redeemed.		
Deposited with Donnell, Lawson & Co., New York		
Counterfeit money		
Deficiency Samuel Lappin, ex-Treasurer		
	\$44 6, 155	96 \$446,155 96
		====

The following statement shows the amount of bonds in the treasury, and is the same as charged to the Treasurer upon the Auditor's books:

Permanent school fund — State bonds	100,000	00	
Sinking fund State bonds		-	
University fund — State bonds			9,800 00 1,300 00
Total			\$1,855,268 37

P. I. BONEBRAKE, Auditor of State.

The following is a statement of the condition of the treasury, May 27, 1878.

The following statements show the amount of money in the State treasury, May 27, 1878, and the various funds to which it belongs; also, the assets to balance the accounts, which agree with the several accounts charged to the State Treasurer upon the books of this office:

	Dr.		cr.
General revenue fund	\$128,040	16	
Sinking fund	194	18	
Interest fund		47	
Annual school fund		31	
Permanent school fund		80	

	Dr.	Or.
Insurance fund	\$3, 585 11	
Library fund	2,600 00	
Railroad fund		
Military fund	•	
State University fund		
Agricultural College tax fund		
Normal School land fund		
	.,	
The following items are presented by the Treasurer to counter- balance the above accounts:		
Currency and coin in small safe and drawer	*************	\$15,876 49
Currency in large safe in vault		275,000 00
Annual school fund orders paid	******	4,096 88
Permanent school fund orders paid	*************	11,402 10

Counterfeit money	*************	670 00
Deficiency of Samuel Lappin		880 89
	\$319,238 77	\$319,288 77

P. I. BONEBRAKE, Auditor of State.

PROCEEDINGS OF STATE BOARD SINKING-FUND COMMISSIONERS.

The Board convened, and issued the following order:

AUDITOR'S OFFICE, KANSAS. TOPERA, Dec. 9, 1876.

Treasurer of the State of Kansas: Pay to Donnell, Lawson & Co. or order three hundred seven and $\frac{1}{100}$ dollars, for the sinking fund.

THOS. A. OSBORN, Governor,
P. I. BONEBRAKE, Auditor,
THOS. H. CAVANAUGH, Sec'y of State,

Commissioners.

The above order was issued in payment for bonds Nos. 296, 304 and 305, of \$100 each, and accrued interest; said bonds having been issued to fund the Territorial debt, and dated July 1, 1863, six per cent. interest, payable annually.

AUDITOR'S OFFICE, KANSAS. }
TOPEKA, Dec. 22, 1876.

The Board convened, and purchased Bond No. 322, of the denomination of \$100, issued under act of February 20, 1863, to F. P. Baker, and paid par for same.

The Board issued the following order:

AUDITOR'S OFFICE, KARSAS. TOPEKA, Dec. 22, 1876.

Treasurer of the State of Kansas: Pay to F. P. Baker or order one hundred dollars, for the sinking fund.

T. A. OSBORN, Governor, P. I. BONEBRAKE, Auditor,

THOS. H. CAVANAUGH, Sec'y of State,

AUDITOR'S OFFICE, KANSAS. TOPEKA, April 24, 1877.

The Board convened, and purchased bonds Nos. 308 and 309, of the denomination of one hundred dollars, issued in pursuance of "An act to fund the Territorial debt," approved February 20, 1863. Said bonds bear interest at the rate of six per cent. per annum, and are purchased at ninety-eight cents and accrued interest.

The Board issued the following order:

AUDITOR'S OFFICE, \
TOPEKA, April 24, 1877.

Treasurer of the State of Kansas: Pay to D. L. Lakin or order two hundred and five and $\frac{1}{100}$ dollars, for the sinking fund.

GEO. T. ANTHONY, Governor, P. I. BONEBRAKE, Auditor, Commissioners.

Auditor's Office, Kansas. Topeka, July 2, 1877.

The Board convened. Present: Hon. Thos. H. Cavanaugh, Secretary of State, and P. I. Bonebrake, Auditor of State.

The Commissioners examined and purchased the following bonds: Nos. 16, 17, 18, 19, 20 and 21, of the denomination of five hundred dollars; also Nos. 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169 and 170, of the denomination of one hundred dollars—making a total of \$4,200—issued in pursuance of "An act to fund the Territorial debt," approved February 20, 1863, at par.

The following order was issued:

Auditor's Office, Kansas. \
Topeka, July 2, 1877.

Treasurer of the State of Kansas: Pay to H. G. Niles or order four thousand two hundred dollars, for the sinking fund.

THOS. H. CAVANAUGH, Sec'y of State, P. I. BONEBRAKE, Auditor,

Commissioners

AUDITOR'S OFFICE, KANSAS. 7 TOPEKA, January 28, 1878.

The Board of Sinking-Fund Commissioners of the State of Kansas met in the office of the Governor on Monday, January 28th, 1878, at 10 o'clock A. M. of said day. Present: Geo. T. Anthony, Governor, and P. I. Bonebrake, Auditor of State. Absent: Thos. H. Cavanaugh, Secretary of State. The following proceedings were had.

On motion, the following resolution was adopted:

Resolved, That John Francis, Treasurer of State, be and he is hereby directed to invest twenty-two thousand dollars (\$22,000) of the sinking fund in United States bonds—in that class of bonds designated as "United States four-per-cent. funded loan coupon bonds;" and he is hereby authorized to purchase the coin necessary therefor, as required by the United States Treasury Department.

GEO. T. ANTHONY, Governor, President, P. I. BONEBRAKE, Auditor, Secretary, Commissioners.

AUDITOR'S OFFICE, KANSAS. TOPEKA, February 16, 1878.

The Board convened in the office of the State Auditor, at 10 o'clock A. M., Saturday. Present: Geo. T. Anthony, Governor; T. H. Cavanaugh, Secretary of State, and P. I. Bonebrake, Auditor of State.

Hon. John Francis, Treasurer of State, submitted the following statement, viz.:

SIMEING FUND COMMISSIONERS, To John Francis, State Treasurer, Dr.		
To 22 U. S. coupon bonds, \$1,000 each	\$22,000	00
To interest on same, at 4 per cent., from January 1, 1878, to February 5,		
1878	86	80
To currency paid for \$22,086.80, gold coin purchased in compliance with		
resolution of Commissioners, dated January 28th, 1878, at \$1.021/2	469	85
To express charges paid for transmitting currency	44	00
Total	\$22,600	15

The following order was made:

AUDITOR'S OFFICE, KANSAS.
TOPEKA, February 16, 1878.

Treasurer of the State of Kansas: Pay to Jno. Francis, State Treasurer, or order, twenty-two thousand six hundred and 180 dollars, for the sinking fund.

GEO. T. ANTHONY, Governor,

P. I. Bonebrake, Auditor of State, Thos. H. Cavanaugh, Sec'y of State,

Commissioners.

AUDITOR'S OFFICE, TOPEKA, KANSAS, April 1, 1878.

The Board of Sinking-Fund Commissioners met in the office of the Governor, on Monday, April 1, 1878, at 4 o'clock P. M. of said day. Present: Geo. T. Anthony, Governor; Thos. H. Cavanaugh, Secretary of State, and P. I. Bonebrake, Auditor of State. The following proceedings were had.

On motion, the following resolution was adopted:

Resolved, That John Francis, Treasurer of State, be and he is hereby directed to invest six hundred dollars (\$600) of the sinking fund of the State of Kansas in United States bonds, in that class of bonds designated as "United States four-per-cent. funded loan coupon bonds;" and he is hereby authorized to purchase the coin necessary therefor, as required by the United States Treasury Department.

GEO. T. ANTHONY, GOVERNOR,
THOS. H. CAVANAUGH, Sec'y of State,
P. I. BONEBRAKE, Auditor,
Commissioners.

AUDITOR'S OFFICE, KANSAS, TOPEKA, April 30, 1878.

The Board of Sinking-Fund Commissioners convened in the office of the Auditor of State. Present: Geo. T. Anthony, Governor, and P. I. Bonebrake, Auditor of State.

The following order was made:

Auditor's Office, Kansas. Topeka, April 30, 1878.

Treasurer of the State of Kansas: Pay to John Francis, State Treasurer, six hundred dollars, for the sinking fund.

GEO. T. ANTHONY, Governor, P. I. BONEBBAKE, Auditor, Commissioners.

Office of Auditor of State, Topeka, Kansas, June 29, 1878.

The Board of Commissioners for the investment of the sinking fund convened in the Auditor's office. Present: Geo. T. Anthony, Governor, and P. I. Bonebrake, Auditor of State.

On motion, the following order was made:

AUDITOR'S OFFICE, KANSAS. TOPEKA, June 29, 1878.

Treasurer of the State of Kansas: Pay to John Francis, State Treasurer, three thousand dollars, for the sinking fund.

GEO. T. ANTHONY, Governor, P. I. BONEBRAKE, Auditor,

Commissioners.

CONCLUSION.

In the foregoing pages I have endeavored to give a faithful statement of the doings of this Department for the fiscal term ending June 30, 1878. There have been but few changes suggested, for the reasons stated in the beginning of this report, and for the additional reason that the laws should not be changed except when absolutely necessary. The financial affairs of the State were never in a better condition. Our bonds, coupons and warrants have been paid at maturity; leaving large balances after all payments are made. State and local taxes have been paid better than usual. Local indebtedness is being paid or funded at lower rate of interest, whilst the era of speculation is past, and the mania for bond-voting has about run its course. Some of our claims against the General Government will, without doubt be paid before the Legislature meets, and our military bill will certainly be paid by the next Congress. The population of the State has increased at least two hundred thousand within the last two years, and two marvelous crops have rewarded the husbandman. With judicious appropriations on the part of the Legislature, and an honest administration on the part of the State officers, the State will be better off two years hence than she is to-day.

I desire to acknowledge the assistance rendered me by Messrs. S. S. McFadden and M. Weightman, clerks in this Department. They have been in this office a number of years, and to their experience they add honesty, ability and industry. To every trust reposed in them, to every responsibility imposed upon them, they have proven faithful.

I am, very respectfully,

Your obedient servant,

P. I. BONEBRAKE, Auditor of State.

REPORT

OF THE

REGISTER OF THE STATE LAND OFFICE

FOR THE

NINETEEN MONTHS ENDING JUNE 30, 1878.

REPORT.

OFFICE OF REGISTER OF STATE LAND OFFICE, TOPEKA, KANSAS, August 1, 1878.

To the Governor:

The fiscal period which closed June 30th has been a busy one for this department. At the time of submitting my last report the transfer from the several State officers of the books, records and files which now constitute this office had just been completed, and the work of organizing this department had but just commenced. Since that time complete tract indexes of all State lands and railroad land-grant lands have been made. Complete records have been made of all State lands heretofore sold, and I am glad to be able to say that all desired information in regard to State lands can now be obtained in this office.

The establishment of a Land Department has been a marked success. Under the old method the Government field notes and plats were in the office of the Surveyor General, while the records that relate to State lands were a part in the Governor's office, a part in the office of the Secretary of State, and the balance in the office of the Auditor of State. In point of economy the result has been most satisfactory. From 1867 to 1875 inclusive the aggregate sum of \$2,700 was paid for "making, executing and recording patents," during which time 1,810 patents were issued, costing \$1.50 each. During the nineteen months last past 622 patents were issued, at a cost of less than forty cents each.

STATE SCHOOL LANDS.

In my last report I suggested that an effort be made at once to secure the lands due the State on account of the sixteenth and thirty-sixth sections of land in Indian reservations disposed of by the General Government, urging as a reason therefor, that—

"The State is being rapidly settled, and the public lands from which the State must be reimbursed are being rapidly sold. Each year that this adjustment is delayed causes our selections to be made farther in the interior, where the lands are less valuable."

This suggestion was heartily concurred in by yourself, and (267)

through the exertions of the State officers, the delegation in Congress, and the State agent, we have met with abundant success. Lands to the amount of about 265,000 acres have been set apart for the benefit of the State. The work of making a selection of these lands having been done by a board of State officers, you will make such report to the Legislature as you may think proper.

SALINE LANDS.

As stated in my former report, all but twelve sections of these lands were set apart by the Legislature as an endowment for the State Normal School at Emporia. One quarter-section of this land has been patented. Sometime in the latter part of last year, letters were received making inquiries as to sales of these lands, and payments upon sales said to have been made, which led us to believe that there was something wrong in the management of this trust, and that lands had been sold and money received therefor by the agent which had not been paid into the State treasury. An examination of the books of the agent, and a personal investigation by Hon. J. H. Crichton, showed a startling condition of affairs and a wholesale defalcation by the agent.

The following tabular statement shows the lands sold, amount sold for, and subsequent payments of principal and interest, as far as can be ascertained at this date:

Average price per acre, \$6.94.

Of the proceeds of the sales of the above-described lands, the sum of \$5,683.70 has been paid into the State treasury by J. J. Wright, Treasurer, at the time and in sums as follows:

1,013 65 Total \$5,683 70 Angust 31, 1877. \$2,845 35 1,824 70 December 8, 1877..... June 14, 1878....

Leaving a balance of \$7,586.44 unaccounted for. With the criminal proceedings against E. P. Bancroft, the better security for public funds can be found than a deposit in the State treasury, and no better protection to the I suggest that the law be so amended that the purchase-money of the Normal School, Agricultural College and University lands, shall be paid directly to the State Tressurer. Had this been the law, the Normal School fund defaulting agent, you are familiar; therefore I deem it unnecessary to make further mention of the matter here. would have been nearly \$8,000 better off, and the purchasers would have been secure in their purchases. purchaser can be given than the State Treasurer's receipt.

TABLE showing the total number of acres of school land patented, and the amount received therefor, to June 30, 1878.

Average value per acre, \$4.19.

The law regulating the sale of State lands needs amending in several respects. As it now stands, there are no penalties for default in payments of principal or interest due. The law regulating the sale of some of the State lands has no provisions for

.. 215,217

forfeiture, and in no case are there penalties for failures of State and county officers in exacting the terms of the contracts with purchasers. Nearly five thousand acres of the "internal improvement lands" were sold in the year 1868, since which time no payments of principal or interest have been made. No method of forfeiture is provided, nor are the lands taxable. The State exacts by heavy penalties the payment of revenue for the several State purposes, while the above-named interests, equally important, are neglected.

I close this report by giving proper credit to Mr. H. B. Mitchell, who has been a clerk in this department since its organization. His education and practical experience as a surveyor, coupled with the fact that he helped to survey a large portion of the public lands in western Kansas, eminently qualified him for his duties in this department.

I have the honor to be,

Very respectfully, your obedient servant,

P. I. BONEBRAKE, Register State Land Office.

TREASURER OF STATE.

FIRST

BIENNIAL REPORT.

JUNE 30, 1878.

TOPEKA, KANSAS:
GEO. W. MARTIN, KANSAS PUBLISHING HOUSE.
1878.

Office of Treasurer of State, Topeka, Kansas, July 1, 1878.

To His Excellency GEO. T. ANTHONY, Governor of Kansas:
SIR: In compliance with section 1 of chapter 180, Session
Laws of 1877, I have the honor herewith to submit the
first biennial report of the transactions of this office, cover-

ing the period from December 1, 1876, to June 30, 1878, inclusive.

Very respectfully,

JOHN FRANCIS, State Treasurer.

REPORT.

The financial condition of Kansas, during the period covered by this report, has been of the most healthy character. The public revenues have been well collected, and all liabilities have been promptly met. On the 1st day of January, 1877, fifty-four thousand dollars in the bonds of the State, issued under act of March 2, 1863, matured, and were promptly paid on presentation; thus reducing the bonded debt of the State that amount. A surplus of revenue has accumulated in the treasury from various causes—the principal of which was, no session of the Legislature in 1878; until, at the close of the fiscal year, June 30th, 1878, there remains in the treasury a balance of general revenue amounting to one hundred and seventeen thousand nine hundred and twenty-seven dollars and sixty-eight cents.

The receipts and disbursements of the Treasury, from December 1, 1876, to June 30, 1877, were as follows:

I would respectfully call your attention to the law governing the investment of the funds derived from the sale of the lands belonging to the State Normal School. Section 4 of chapter 179. Session Laws of 1877, provides that the lands shall be sold under the provisions of chapter 189, Session Laws of 1872. Section 4 of said chapter 189 provides that all moneys derived from the sales of land shall be paid into the State Treasury, and that the amount thus received as principal of the fund shall be invested by the Treasurer of State, as provided by law, in the bonds of the State of Kansas, or of the United States. Section 4 of chapter 70. General Statutes of Kansas, provides that all moneys derived from the sale, rent or lease of the lands aforesaid, shall be invested in stocks of the United States, the State of Kansas. or some other safe and reliable stocks, as the Legislature may determine, yielding not less than six per centum per annum upon the par value of said stocks.

Under section 4, chapter 189, Session Laws of 1872, before referred to, the Legislature has determined that said funds shall be invested in bonds of the State of Kansas or of the United This law cannot be complied with, for the reason that State bonds cannot be purchased at any reasonable figure, neither can bonds of the United States be purchased that bear interest at the rate of six per centum per annum. This law should be amended so as to authorize the purchase of securities other than the ones quoted. It should also provide for a board of commissioners to invest the fund, consisting of at least three persons. No one man should be allowed to control this investment. ing the period covered by this report I have used every effort to keep this fund invested and comply with the law. I have purchased State bonds bearing interest at six per cent. amounting to the sum of \$1,600, leaving a balance in the Treasury of \$4,083.70 Had it not been for the clause prohibiting the investment in bonds other than those bearing six per cent. interest, all of this fund would have been invested in United States fourper-cent. consols.

Section 3 of article 16, chapter 122, Session Laws of 1876, provides that the State Treasurer shall report to the State Superintendent, on the 1st day of February and 1st day of August of each year, the amount of money in his hands belonging to the Permanent School Fund, and subject to investment; and on the

1st day of March and 25th day of July of each year, shall report the amount of money in the Treasury belonging to the Annual School Fund subject to disbursement on the semi-annual divi-In making the reports specified in the foregoing section, the Treasurer can only report the amounts then in the Treasury: he having no information of orders drawn on the Treasury and not presented for payment. To obviate the danger of overdrafts on these funds, and to provide a record that could be readily referred to in cases of erasures or alterations, I suggested to the State Superintendent of Public Instruction that all school orders be registered in the office of the Treasurer, and countersigned by the Treasurer in the same manner as warrants drawn by the Auditor of State; to which suggestion he readily consented, and the necessary records have been provided therefor. It is necessary, however, that a law should be passed requiring the State Superintendent of Public Instruction to present to the Treasurer for registration all orders drawn by him on the Treasury, or by the Commissioners for the Investment of the Permanent School Fund, and making it the duty of the Treasurer to register and countersign the same.

The State Permanent School Fund has steadily increased. February 16th, 1878, one hundred and forty thousand dollars in bonds of the United States were purchased for this fund, since which time there has been no great accumulation of currency in the Treasury over and above investments made by the Commissioners. Some of the school-district bonds held by this fund falling due are being funded under chapter 44, Session Laws of 1877. Section 4 of said act should be amended so as to limit the rate of interest to not more than seven per cent., instead of ten per cent., the present limit, for the reason that private investors pay a premium for the best of this class of bonds on account of the present high rate of interest—the Commissioners under the law being only allowed to pay par.

The Commissioners on Revision having kindly heard all suggestions made by State officers, it is unnecessary for me to refer further to defects in laws now in force.

An accurate and complete report of the transactions of this office, together with a full exhibit of the various securities of which the Treasurer is custodian, will be found in the annexed tables.

In addition to the foregoing, the following described bonds are still counted as part of this fund. Legislation is needed authorizing the destruction of those upon which judgment has been rendered. Six thousand one hundred and thirty-six dollars and fifty cents has been collected on such judgment, and paid into the Treasury by Attorney General Davis:

FIRST

BIENNIAL REPORT

OF THE

STATE LIBRARIAN

OF THE

STATE OF KANSAS.

EMBRACING THE PERIOD FROM THE 30TH NOVEMBER, 1876, TO CLOSE OF FISCAL YEAR, JUNE 30TH, 1878.

TOPEKA, KANSAS:
GBO. W. MARTIN, KANSAS PUBLISHING HOUSE.
1878.

To Hon. Geo. T. Anthony, Governor of Kansas:

The Librarian respectfully presents the First Biennial Report of the condition of the State Library, at the close of the fiscal year, June 30th, 1878.

D. DICKINSON, Librarian.

Sept. 1st, 1878.

REPORT.

This, the first Biennial Report of the State Librarian, embraces a period of nineteen months, from the first day of December, 1876, to the 30th day of June, 1878.

The annexed schedules show the business of the Library in detail. The Library is in as good condition as the cramped room it occupies will admit. A rearrangement has to be made every year, in order to get space for books.

The loss of books is slight, three General Statutes and four Session Laws being the total loss—all lost during session of Legislature, and reported as stolen from the legislative halls. There is one book now missing from the miscellaneous department, which it is hoped will be returned. But one book has been certainly lost from that department in eight years, and that through an attaché of the Legislature at the time the law allowed all officers of the Legislature to take books out.

The store-room fitted up in the cellar, for the storage of documents and our Supreme Court Reports, will, it is feared, prove too damp. There is danger of serious loss, not only in valuable documents, but between twenty-five and thirty thousand dollars' worth of Supreme Court Reports are liable to be greatly damaged. Five or six hundred documents per year have to be stored in that cellar-room, to get space in the library-room for our annual exchanges from States and Territories. An average of two volumes of Supreme Court Reports are published annually, adding largely to the value of Reports stored there, and increasing the loss, if the room proves too damp. There should be a perfectly safe and easily accessible place of deposit, soon as possible.

Respectfully submitted.

D. DICKINSON, Librarian.

September 1st, 1878.

A.

POSTAGE, EXPRESS AND FREIGHT ACCOUNT.

Librarian, Dr.

To balance on hand Nov. 30th, 1876		\$47 24
To deficiency appropriation to June 30th, 18		150 00
To appropriation for fiscal year ending 30th	June, 1878	300 00
Total		\$497 24
Postage, freight and expressage-	Or.	
For December, 1876	\$24 25	
For January, 1877	28 15	
For February, 1877		
For March, 1877		
For April, 1877	34 25	
For May, 1877		
For June, 1877	33 05	
For July, 1877	57 70	
For August, 1877		
For September, 1877	20 75	
For October, 1877	50 00	
For November, 1877		
For December, 1877		
For January, 1878	32 35	
For February, 1878	8 75	
For March, 1878		
For April, 1878		
For May, 1878		
For June, 1878		
Total	\$ 551 3 5	\$497 94
	497 24	•
Balance due Librarian	\$54 11	

In endeavoring to economise, the appropriation asked for postage, freight and expressage proved too small. I fear the deficiency for 1878-9 will be greater.

B.

LIBRARY FUND ACCOUNT.

Librarian, Dr.				
To deficiency appropriation to June 30th, 1877		••••	\$4 00	00
To appropriation for fiscal year ending June 30th, 18	78	••••	800	00
Total			\$1,200	00
Or.				
Paid for miscellaneous books, from Dec. 1st, 1876, to				
June 30th, 1878	\$9 83	98		
Paid for law books, from Dec. 1st, 1876, to June 30th,				
1878	503	92		
Total	\$1,487	90	\$1,200	00
	1,200	00		
Balance due Librarian	\$287	90		

In order to complete some valuable sets of books for the miscellaneous department, the Librarian had to overrun the appropriation for the current year, and draw on the appropriation for 1878-9 for balance.

BOOKS RECEIVED FROM DEC. 1st, 1876, to JUNE 30th, 1	L 878 .
Law books purchased	134
Miscellaneous books purchased	424
In exchange for Kansas Reports	
Exchanges from States, Territories, &c	
Donations	33
Whole number received	1,608
Deduct documents turned over to Historical Society	35
	1,573
Whole number in last report	13,001
Whole number now	14,574
A net increase of 1.573 volumes	•

Nearly three-fourths of the books purchased are miscellaneous books, costing twice as much as the law books. When the Librarian took charge of the Library, eight years ago, there was not a half-dozen full sets of law reports, and a very meager assortment of text-books; the completion of the law library was therefore an indispensable necessity. Since it has been completed, or nearly so, more attention has been paid to the miscellaneous library. But one thing is now in the way of the rapid increase—that is, want of room.

The miscellaneous department, though not large, is very valuable, having a good supply of historical and literary works, and the most valuable encyclopedias. Few libraries excel it in books pertaining to the civil and political history of the United States.

BIENNIAL • REPORT

OF THE

COMMISSIONER OF FISHERIES,

OF THE

STATE OF KANSAS,

FOR THE YEARS 1877-8.

TOPEKA, KANSAS:
GEO. W. MARTIN, KANSAS PUBLISHING HOUSE.
1878.

REPORT.

To His Excellency GEO. T. ANTHONY, Governor of Kansas:

Appointed by your excellency as Commissioner of Fisheries, I beg leave to make the following report, in compliance with sec. 2, ch. 117, Session Laws of 1877, for the year ending June 30th, 1878.

The large territory comprising the State of Kansas, larger than all the New England States, with its long streams and numerous branches, gives to the fish culturist a vast field for labor. While I have endeavored to make my investigations as thorough as possible, and to gather such facts as will be of interest and use to the State, the time allowed has been far too short to meet all the requirements and demands made upon the Commissioner.

It must be remembered that, in a branch of industry new to the people, and having the importance of this new enterprise, nothing can be done hastily. It requires time, patience, perseverance and money—with which there is no doubt of ultimate success in stocking our streams with a better variety of fish. As so little is known of the labor and workings of this important branch of farming that is attracting the attention of the civilized world, I deem it not improper to give a brief history in this first report.

Although an experiment to the people of Kansas, it is not an experiment but a reality to the people of the Old World. In China, fish farming has been in practice for over two thousand years. It is no longer an experiment to many of the States in our Union, nearly all of which have laws for protecting and propagating this source of their food supply. Some of them have made large appropriations, erected extensive fish hatcheries, giving employment and support to many, and making fish culture one of the important branches of legislative control;

and in no instance has the enterprise been abandoned, but encouraging reports come from every State. Like "bread cast upon the waters," they have turned loose millions of young fish into their rivers, lakes and ponds, increasing the source of wealth by furnishing cheap, healthy food for the masses of their people, and a revenue to the State; and yet with no people or age has the subject received that measure of attention its importance justifies. Our waters in Kansas are bountifully supplied with food, both vegetable and animal, to sustain life and the growth of millions of fishes, native and migratory. There can be no just reason why our numerous streams may not be made as productive of wealth to our State as the fertile valleys through which they flow. It is estimated by good authority, that every acre of living water is capable of being made far more profitable and productive, and to contribute more to the support of mankind, than an acre of the best land in the world.

Our waters in Kansas, like our plains, are undergoing a change. Twelve years ago the country west of Manhattan was considered by many as fit for nothing but the buffalo and Indian. But how is it to-day? We find for a distance of 250 miles west of Manhattan the finest wheat country in the world—and in other cereal productions equal to any State in the Union. Many of the streams contained little or no water, and but few springs could be found.

But a change, grand and sublime, as if the Ruler of the Universe had said: "Let this barren desert be made the garden of the world; let these streams with poison waters be made pure; let the dry streams be supplied with running, pure water; let living streams come forth from rocks and hills"—and it was done. This may appear strange, but it is nevertheless true, that our land, said to be once sterile, is now productive; in our waters, once said to contain alkali, none is now found; streams once dry now contain running, pure water; and to my own personal knowledge, springs of living water, where there were none to be found before, now exist. These are facts that cannot be contradicted, and are arguments in favor of stocking our streams with a better variety of fish. Our people, when once convinced that the "fish business" is no humbug, will take hold of it with their accustomed persevering energy, which knows no failure.

Let me acknowledge the assistance gratuitously given by the

different railroad companies in the State. They realized the advantages in having the streams stocked with fish. It is an advertisement of our energy that has made for our State a worldwide reputation, and which attracts the intelligent immigrant from all parts of the world. The K. P., A. T. & S. F., and the M. K. & T., have furnished free transportation over their respective roads, whenever application has been made.

FISH CULTURE.

The subject of "fish culture" is very ably presented by Hon. Geo. H. Jerome, Superintendent of the Michigan Fish Commission. It is written in his eloquent style, and is from such a reliable authority, that I will give his production for the benefit of those wishing to know the *modus operandi* of fish farming. The extract is as follows:

"FISH CULTURE.—Fish culture, or fish production, is an industrial art, requiring labor and practice and skill to produce sought-for results. It is as distinctively an art as is glass or iron manufacture, or fruit production, or stock breeding, or farming, requiring certain appliances and adaptations to the obtainment of ends, the same in the one case as the other. Not, perhaps, one of the 'liberal' or 'fine' arts, yet the century may not close ere the adjectives 'liberal' and 'fine' shall not inaptly qualify our rising and cherished art. It has already progressed far enough to have become the subject of innumerable patents and copyrights—confirmation strong that it is no weakling in aspiration and promise.

"Its claim is an augmented food production and supply, by means of which a valuable article of food, almost indispensable to a proper boneand-brain development, may be doubled, trebled, quadrupled. This is fish culture in theory. In scientific practice, it requires a study of waters to know at what point a reformation may begin, and to what just limit it may be carried; a study of the fishes to know their worth, spawning seasons, peculiar habits and necessities; an investigation of the cause of their decrease or increase, as the case may be; a complete knowledge of one and all of those essentials that antedate birth, development, and the reproduction of valuable animal life. Then follows the manual work - the preparation of ponds, races, hatching-houses, supply troughs, hatching-boxes, egg trays, partition screens, egg nippers, pans, dippers, brushes, feathers, etc. The master workman, whatever his trade or occupation, will see to it that his chest of tools is full and in order. Next comes the procurement of the breeding-fish, male and female, to be obtained if possible without injury healthy, vigorous parents always preferred. The fish obtained, the fish culturist, guided by observation and experience, will quite readily detect in the gravid fish those signs which precede and denote the mature spawner. Carefully noticing the premonitory indications, the porcelain or tin pan is brought to the place of operation, containing but very little water, the viscid fluid that accompanies the flow of the ova affording sufficient moisture. Formerly water was used, but is now generally discarded, it being thought to have the effect of drowning the spermatozoa or life principle of the milt. The spawner is then caught, gently seized and held (if small, one person is sufficient, if large, two or more persons are required) in shoblique-perpendicular position, the vent being directly over the pan. If ripe, which means a mature condition of the ova, the eggs will often flow into the vessel by the mere force of gravity or muscular contraction, without any hand pressure or manipulation whatever; but if not so yielding up her spawn, a slight pressure with the thumb and fingers along the abdomen will cause the ova to be extruded. This process, once or twice repeated, in a majority of cases will secure the entire yield.

"The fish is now returned to the water in almost as good condition as when taken from it, for the whole process has not occupied more than from twenty to forty seconds. The male fish, or milter, as he is termed by pisciculturists, is now taken from the tub or trough near at hand, held in a similar position, and the manipulator, by a gentle pressure along the lower portion of the abdomen, will discover, provided the fish is ripe, an extension into the vessel containing the ova, a few drops of a creamy, whitish substance termed milt, spermatozoa, or fertilizing fluid. The fish is returned to the water, no pain or injury having resulted, a very little water is poured into the pan or porcelain vessel, and the contents stirred with a feather or tremuously shaken in a manner to give the ova a rotary motion, and very soon all or nearly all the eggs will have become impregnated, vitalized. The pan is now allowed to stand a few minutes. The eggs meanwhile are undergoing great changes, prior to the introduction of the milt or zoosperms, the eggs in a manner agglutinated and in a fac-Now they have become enlarged, are now translucent; cid condition. each egg, no longer coherent, is an individuality, and by one of those mysterious processes by which Nature works, are become hard to the touch, so that they will roll about like shot on a smooth surface. Here now we have the vivified germ, the embryo fish. In this state they are taken, cleansed in one or two waters, and carefully placed upon a bed of gravel or upon wire-cloth trays, and with a feather evenly distributed over the surface, the object of such spreading being to allow the clear, living water to come continually in contact with all the eggs - well-oxygenized water being as essential to a normal, healthy development of the embryo, as it is material to the life and growth of the fish in its subsequent stages. Now, with pure and perpetually running water, filtered if necessary by one or more flannel screens, with clean tools, clean surroundings and with clean hands, we enter upon the work of incubation, a labor lasting five, ten, twenty, forty, eighty, one hundred and twenty days, or even longer, depending upon species and upon quality and temperature of water. Dead eggs, easily distinguished, whenever discovered are to be at once removed, as they produce a byssus that sends out its clammy, fibrous arms, like Hugo's devil-fish, to destroy every living egg within their reach, and all

sediment and substances of every sort, foreign to the before-named conditions of their health and growth, are to be sedulously guarded against. The eyes first appear, then a faint embryonic structure, and soon after a dim outline of the 'coming' fish may be seen, growing more and more visible each day, until some morning you see the wreck of a habitation floating down the current, and a tiny creation, most unmistakably alive, settled down amid the interstices of the gravelly bed, or meshes of the wire tray, a third, or a half, or perhaps three-fourths of an inch in length. About the most perceivable thing of this new birth, is a bag or sack attached to the belly of the fish. This sack, with the salmo quinnat, is of a rich pinkish color, resembling one of two drops of blood incased in a semitransparent membraneous bag. At birth it is larger than the fish itself, rendering all movements of the new comer exceedingly awkward and clumsy. This is the umbilical vesicle, or yolk sac - Nature's store-house for the supply and sustenance of the fish during its tender infancy. Until this sac is absorbed, the fish will eat nothing, seems to desire nothing but to be 'let alone,' content with the pabulum stored in its little knapsack, from which it daily; hourly draws that nourishment, the provision and pottage of birthright. Day by day the sac becomes smaller, till it can scarcely be perceived with the naked eye; then the fish begins to move about, as if in quest of something to satisfy its hunger. This yolk sac. with the salmon and trout and some other species, lasts from thirty to forty days, with other varieties not so long. During the existence of the umbilical vesicle the fish are known as alevins; afterward, up to certain periods of growth, minnows or fry. The sac being absorbed, the fry should be fed two or three times a day, or oftener, in limited quantities, will do no hurt. Various kinds of food are given-bonny-clabber, the volk of an egg, boiled calf's or beef's heart, boiled hard and grated; liver of all kinds, (except hog's liver,) chopped or grated so fine as to become the consistence of thick blood, mixed with a little sweet cream, is used as food, while the fry is very young. Under proper care and feeding, the fish will come on rapidly, so that in a few days or weeks they will do to be removed from their hatching-troughs and planted in the lakes and rivers, there to grow and to bear testimony that fish culture is neither a myth nor a phantasm, but an ocular, tangible and gastable reality."

Such, in general outline, is fish culture. The limits of this report will not of course permit of the different methods and processes of the art in the treatment of different species, differing as they do in different countries, and even with different establishments in our own country.

FISH-WAYS.

The first and most important principle necessary to the success of fish culture in any State, is to give the fish freedom to go to their natural spawning-grounds, the head-waters of streams. Prevented from doing this by impassable dams, or other obstructions thrown across streams, they become wasteful, and in time will disappear below as well as above the obstruction. It is as natural for fish to ascend the stream to deposit their spawn, as for birds to seek the tree-top in which to rear their young. With these facts before us, founded on close observation of the pisciculturist, the importance of constructing dams which will permit fish to ascend the streams is quite apparent.

A fish-way is but an artificial imitation of the means by which river fish pass up rapids, in their yearly migrations. The fish in their upward course reach the foot of the rapids; here they rest awhile, then they shoot up a slight distance, and again rest behind some rock, where they gather strength to make another leap, and continue in this manner until the fall is passed.

To construct a fish-way, take a long box, long enough to reach to the bottom of the dam at an angle of forty-five degrees, fasten to its place, one end resting on the top of the dam, the other end in the center of the deep water below the dam. Supposing the box to be sixteen feet long, four feet wide, and two feet high: on the inside of the box pieces of plank, called riffles, are fastened transversely about three feet apart; each riffle is about a foot high, and extends about two-thirds of the way across. If the first riffle is fastened to the right side of the box, and at right angle with the side of the box, the next, three feet above and extending about thirty inches across it, and so on alternately until the top is reached, the water entering the top of this box, is diverted from right to left in its course, forming eddies or resting-places for the fish in their upward course.

Illustrating the necessity of fish-ways, we might mention that after the construction of the Lawrence dam, fish above Lawrence became very scarce; but after the dam was washed out, in May, 1877, fish at once became abundant in the Kaw and tributaries above that point.

Upon the proper construction of fish-ways, more than anything else, depends the increase of the fish now occupying our streams, and will materially aid in stocking our waters with a better class of fish. The high waters of 1877 prevented many owners of water power from placing fish-ways in their dams, while others without the necessary faith, and in the absence of any plan adopted by law, have constructed fish-ways, many of which will

be wash-aways. The fact of there being no plan adopted by the Legislature, and the Commissioner not having authority to furnish a plan, and desiring to have a fish-way in reality—not in name—is my excuse for not prosecuting parties making expense and trouble, and in the end doing an injury to the "cherished cause." I decided to wait, with the hope that the Legislature would take an interest in the helping and perfecting the art of fish culture in our great State, the cost of which is very small compared to the benefits arising therefrom.

The decision of the Supreme Court of the United States on the subject of dams and other obstructions in streams and rivers, in the celebrated case of The Holyoke Waterpower Co. v. Lyman, et al., is so brief and clear on this subject that I will here give it. The court says: "Persons owning the whole of the soil constituting the bed and banks of the stream are entitled to the whole use and profits of the water opposite their land, whether the water is used as a power to operate mills and machinery, or as a fishery. subject to the implied condition that they shall so use their own right as not to injure the concomitant right of another riparian owner, and to such regulations as the Legislature of the State may prescribe." * * * And again: "Ownership of the banks and bed of a stream gives the proprietor the exclusive right of fishery opposite his land, as well as the right to use the water to operate the mills; but neither the one nor the other, nor both combined, confer any right to erect obstructions on the river to prevent the free passage of fish up and down the river at their accustomed seasons, as such obstructions would impair and ultimately destroy all such rights owned by other proprietors, both above and below the obstructions on the stream."

The Supreme Court of Massachusetts also uses this language: "All persons who may build a dam for mill purposes in a stream annually frequented by fish, do it under an implied obligation to keep sufficient sluices and fish-ways for the free passage of fish at proper seasons."

Our rivers must be kept free from impassable obstructions, so that our fish can obey nature's gracious law in their increase and multiplication. The absolute equality and independent right of all, rich or poor, whether living up-stream or down-stream, to share in the benefits that will certainly ensue from the unrestrained freedom of the finny tribes that occupy our streams, should be maintained.

The estimated cost of substantially-constructed fish-ways will not average over two hundred dollars each, while the benefits arising from their use are perpetual—not to the few alone, but free to all.

OUR NATIVE VARIETIES.

While it is desirable to introduce into our waters better varieties of fish—shad, salmon and carp—it will not do to neglect the propagation of the varieties already found in our streams, many of which are excellent table fish.

Prof. F. H. Snow, of the State University of Kansas, has furnished the Fourth Agricultural Report (1875) a list of fishes, as found at Lawrence, from which I will mention the names of those considered worthy of our notice as suitable for propagation. In Prof. Snow's list will be found twenty-five different varieties of fish, as observed at Lawrence. I do not doubt but there are many more varieties found in our waters not mentioned in Prof. Snow's list, some of which will be considered in this report. We extract from Prof. Snow's report, as follows:

PERCIDAE.—Perch family.

Labrax chrysops Grd.—Striped Bass; White Perch; Rock Perch. In this species the upper part of the head and body are olivaceous, the sides are silvery, and the lower parts whitish. Common. Its flesh is good eating, and it varies in weight from 2 to 5 lbs.

Lucioperca Americana Cuv.—Pike Perch; Wall-eyed Pike; Jack Pike; Salmon. Distinguished from the other fishes of the family by the greater gape of its mouth, and by the position of the ventral fins and anus. The back is reddish-olive, the sides olivaceous, the under parts yellowish or whitish, with blotches of black or brown upon the back and upper portion of flanks. This fish appears in the river very early in the spring and very late in the fall. Its flesh is very palatable, and its greatest weight about 7 lbs. It has no fine bones in its body, like the common perch. Its food consists of small fish.

Amblophites aeneus Agassiz.—Rock Bass; Goggle-eyed Bass; Black Sunfish. This fish is rare in the main river, but not uncommon in its tributaries. The greatest weight attained is 1½ lbs. Its superiority for table use, in which it compares favorably with the best New England species of this family, would recommend it as a suitable fish for "cultivation." A black-ish spot at the base of each scale, and a very conspicuous jet-black patch near the upper and posterior angle of the gill covers, are characteristics by which this species may be distinguished.

Pomoxys hexacanthus.-White Bass; Six-spined Bass. Similar to the pre-

ceding in form, but larger, ofter reaching the weight of 8 lbs. This species also is rare, not more than three or four individuals being taken in z season by a single fisherman.

Pomotis luna Agassiz.—Western Sunfish; Moon Sunfish. Very common, differing little except in size from its Eastern representative. The largest specimens weigh one-half pound.

ANGUILLIDAE.—Eel family.

Anguilla Bostoniensis LeS.—Common Eel. This was formerly considered as distinct from the Eastern eel, but the two forms are now regarded by the best authorities as identical. This species is occasionally taken with the hook, sometimes of 6 lbs. weight.

SILURIDAE. - Cat-fish family.

Amiurus atrarius DeK.—Common Horned Pout; Bull-head. This is the smallest species is the family; is rarely taken in the river, its natural home being in sluggish streams, "sloughs," and standing pools, called "lakes." It never exceeds three-fourths of a pound in weight.

Amiurus cupreus Gill.—Great Yellow Cat-fish. In form like the Bull-head, but of a coppery-yellow color. The largest specimen weighed 188 lbs.

Ictalurus nigricans Gill.—Black Cat-fish. Maximum weight 45 lbs. Some specimens are uniformly black; others have light spots or blotches on the sides.

Ictalurus furcatus Gill.—Blue Cat-fish; Fork-tailed Catfish. This is to the fishermen the most valuable species in the river, since it is quite abundant, is frequently of very large dimensions, and is always marketable. [Prof. Snow mentions having seen a specimen that weighed 175 lbs. Last May, while at Lawrence, the writer saw one that weighed 173 lbs.—Commissioner.] Tradition is positive, that in the days of 1856 a fish of this species was captured weighing 250 lbs., which required the aid of a steamboat tow-line and a yoke of oxen for its safe deposit on the river bank.

Ictalurus corrulescens Gill.—Channel Cat; Silvery Cat-fish. This very palatable fish is taken of all sizes, from ½ lb. to 15 lbs. It is used by the fishermen as bait for the larger species already mentioned.

Hopladelus limosus Raf.—Yellow or Mud Cat-fish. Very common, and distinguished by a profusion of small bluish spots upon a dingy yellow ground. Its greatest weight is 100 lbs.

CYPRINIDAE.—Sucker family.

Bubalicthys Bubalus Agassiz.—Buffalo Fish. Very abundant; ordinarily weighing from 4 lbs. to 20 lbs.; maximum weight, 40 lbs. This fish, on account of its abundance, is much eaten, though not of the most delicate flavor. It has a very tender mouth, so that it can hardly be taken into the fishing-boat without the aid of a net.

Mozostoma oblongum Agassiz.—Chub Sucker, often called Carp. This species never exceeds one-half pound in weight.

Ptychostomus aureolus Agassiz.—Red Horse. This fish varies from 6 oz.

to 8 lbs. in weight. Several other species occur in this family, among which may be mentioned the White Sucker, the Blue Sucker, (both of which are considered excellent eating,) and the Willback or White fish.

CLUPEIDAE.—Herring family.

Hyodon turgisus LeS.—River Moon-Eyes; Hickory Shad; Missouri Herring; Fresh-water Herring. Color yellowish or whitish, with metallic reflections; body much compressed laterally. This species is common, and is excellent in flavor, but is little eaten on account of the multiplicity of its small bones. Greatest weight, 2 lbs.

Our native fish, many of which are excellent table fish, if propagated and protected by stringent laws will reward the fish culturist in replenishing our depleted streams with fish in which there can be no question as to their adaptability.

BLACK BASS (Grystes nigricans.)

This fish is, in the opinion of your Commissioner, the king of the finny tribes of fresh water—the noblest of them all, the gamiest—all the angler could desire—free biters, and for courage and endurance they have no equal - fighting to the last moment, coming from the water with fire and defiance in their eve. determined to "die game." "It is a well-known fact to those who have studied the habits of fish, that all varieties of bass push out into sloughs during the months of May and June to deposit their spawn. The parent fish guard their nests faithfully, keeping away all intruders until the young brood are hatched, thus insuring in most cases a larger increase than most other kinds." This fish is found quite abundant in Iowa and Missouri streams. In Kansas, there is difference of opinion. My impression is, that they are found in some of our small streams. Prof. Snow, in reply to my inquiry on this subject, says: "I have no evidence of its occurrence in Kansas. The fishermen here call the Black Sunfish (No. 8 of my list) by that name, which no doubt gives rise to the erroneous report."

The following letter from Judge John T. Morton, in answer to an inquiry upon the subject of Black Bass in Kansas, is so interesting that I will take the liberty to give it, as evidence in favor of Black Bass vs. Black Sunfish:

TOPEKA, KAS., June 19, 1878.

Hon. D. B. Long—Dear Sir: In answer to yours of the 13th inst, just received on my return from Jefferson county court, I will say, that you correctly understood me to say that I have caught black bass in the Waksrusa, twelve miles south of Topeka. They are quite plenty in that stream,

and first appeared there about 1868, evidently coming up the Missouri and Kansas, and locating in the clear water. I have the authority of Uncle Joe Irwin, an enthusiastic fisherman of Leavenworth, that they appeared in the Stranger, in Leavenworth county, a year or two before. They do not seem to have reached any tributary of the Kansas above the mouth of the Wakarusa. That they are the genuine "black bass" there is no doubt. They bite only at "live bait," minnows. There are plenty of black bass in the Marais des Cygnes, and even in Dragoon Creek, in Osage county, and I believe also in the Neosho. I think the Lawrence dam will prevent their coming up the Kansas, and indeed they never will stay in the Kansas river. They prefer clear and still water. But they will undoubtedly flourish if put in the Delaware, the Soldier, the Vermillion, and the Blue.

Another fish, the "crappie," has made its appearance within three or four years in the Wakarusa. This fish is very prolific, and is a fine panfish, but rarely exceeds a pound or a pound a half in weight. Its slang name in the West used to be the "Campbellite," because it made its first appearance in the tributaries of the Ohio about the time Alexander Campbell first began to achieve a reputation. It has been moving steadily north since, reaching Quincy, Ill., about 1848, I think. This fish only bites at minnows, and small minnows are the best bait. Last Fourth of July, Col. Holliday and I caught about a dozen fine black bass in the Wakarusa, and about sixty "crappies."

If I can give you any other items in regard to fish, shall be glad to do so; but am more of a hunter than a fisherman, and get but very little time to attend to either department.

In haste, yours truly,

JOHN T. MORTON.

SHAD (Alosa sapidissima.)

The introduction of Shad in Kansas waters, in June, 1877, was the subject of much speculation. The general opinion arrived at was that it would be a failure, on account of the great distance to the sea. Prof. S. F. Baird, United States Fish Commissioner, in his report to Congress, makes this statement:

"The Yang-tze-kiang, in which the shad is most abundant, is the largest river in China, having a length, as estimated, of 3,314 miles, and the shad are said to ascend almost to its source. This is a fact of very great importance, in connection with the enterprise of stocking the Mississippi and its tributaries with shad, since the distance from its mouth to the attainable waters of all the tributaries, excepting the Upper Missouri, is much less than that traversed by shad in China. Indeed, a distance of about 1,500 miles would probably cover the extreme limit which the shad could probably reach.

"It was uncertain whether shad could be multiplied in the waters west of the Alleghanies; but the cost of the experiment was so trifling, compared with the benefits to result from a satisfactory solution of the question, that it was deemed best to make the trial. "I have already referred to the discovery of shad in the Alabama river and I am assured by reliable testimony, that they are found at the present time in other streams in Alabama. I have also the assurance of Dr. Lawrence, of their capture at the Hot Springs of the Ouachita; of Dr. Middleton Goldsmith, at the falls of the Ohio, near Louisville, and of Dr. Turner in the Wabash river, Ind., the Illinois, and in the Neosho river of Kansas.

"Shad in their ascent of the Mississippi river, would have no falls and no current of inconvenient strength to overcome. Although they do not feed in fresh water, the privation of food for several months would be no serious inconvenience, as fish are frequently longer than that without sustenance. Starting as they could, full of fat, the moderate expenditure required for this period of time would still leave enough substance for the ripening of the eggs, and the milt. For these reasons I am entirely satisfied, as are most persons who have given attention to the subject, that shad introduced into the upper waters of the Mississippi may be taken there again in the same vicinity as mature fish, provided of course that they are not destroyed, or intercepted. And, even should the entire range of the Mississippi and its main tributaries be too much for them, the uncertainty diminishes as we reduce the distance from the Gulf, and we may consider success assured in the shorter rivers emptying directly into the Gulf, and in the lower waters of the Mississippi and Missouri, at least from the mouth of the Ohio. One great argument in favor of the attempt to introduce the shad, as well as species of salmon, into the Mississippi and its tributaries, is the general absence of dams, as compared with the waters of the Atlantic coast."

It has been clearly demonstrated that Prof. Baird's predictions in regard to stocking the Mississippi and its tributaries were correct, as a number of fine shad have been captured in the Mississippi, at St. Paul, the past year - no doubt belonging to the 22,000 planted at the falls of St. Anthony in 1872. The turbidity of the water affects them about as little as any species known, though they require fresh, good water, and will not, like the cat-fish and sucker, sustain themselves in stagnant water. They are one of the most noted table fish used in the Eastern States, frequently selling as high as \$1.00 apiece. The habits of the shad are migratory. When planted in a stream when young, they remain for a time, until they grow to be four or five inches in length, when they go to the sea, and remain in salt water until matured, (four or five years,) when they return to the place of birth to deposit their spawn, and again return to the sea, making annual visits to the place of birth. The Arkansas and its tributaries (the Neosho, Fall River and the Walnut) are streams

that can be successfully stocked with shad and salmon, as they are in more direct communication with the Gulf of Mexico than the Kaw and its tributaries, although I do not doubt the success in either case.

CALIFORNIA SALMON (Salmo quinnat.)

This fish is a native of the Pacific States, but is being very largely introduced into the waters of the Atlantic and Mississippi river States. It is acknowledged by fish-culturists to exceed all other species in hardiness, in tenacity of life, and in freedom from tendency to disease. It will endure a very high temperature of water. They are known to exist in low, turbid and sluggish streams.

In the report of the Commissioners of California for the years 1874 and 1875, the following statement is made in reference to the California salmon: "Large numbers pass up the San Joaquin river for the purpose of spawning, in July and August, swimming for 150 miles through the hottest valley in the State, where the temperature of the air at noon is rarely less than 80° Fah., and often as high as 105°, and where the average temperature of the river at the bottom is 79°, and at the surface 80°."

The spawn and young fry require a low and regular temperature of water. They will ascend to the head-waters of streams and deposit their spawn on gravel beds. If the temperature of the water is too warm, the development of the eggs will be too rapid, and cause a premature birth of the embryo.

The United States Fish Commissioner, S. F. Baird, has established a station on the McCloud river, in California, for the purpose of collecting salmon eggs. Hon. Livingston Stone, Deputy U. S. Commissioner, attends to collecting the spawn and milt. The eggs are impregnated, and packed in moss, and shipped in crates surrounded with ice to the different State Commissioners. These eggs are generally shipped early in October. It requires from four to six weeks to hatch them after they are placed in the hatching-boxes. The eggs are about the size of peas, and of a pinkish flesh color. It is generally conceded by fish culturists that our Western waters are peculiarly adapted to this species of fish. The vigorous strength and energy exhibited by the California salmon during its migrations up the Sacramento and Columbia rivers furnish sufficient evidence that they can reach the

head-waters of our Kansas streams from the Gulf of Mexico. In the report of the Commissioners of Iowa, a correspondent writing from Elko, Nev., says: "This stream is one of the many that form the head-waters of the Columbia river, and to this point, eighteen hundred miles from its mouth, the salt-water salmon come in myriads to spawn."

WHAT HAS BEEN DONE TOWARD STOCKING OUR STREAMS.

Immediately after receiving the appointment as Commissioner, I made application to the United States Fish Commissioner, S. F. Baird, for such allowances as Kansas was entitled to receive in the general distributions by the Government. On the 5th of June, 1877, 100,000 young shad arrived in Topeka for distribution. They were shipped in charge of an agent, Mr. Quine, who neglected to give me notice in time to receive them on their arrival. He took the responsibility upon himself to deposit the entire shipment in the Kaw at Topeka, claiming that they were in an unhealthy condition, and would not bear further transporting. I was greatly disappointed, as I had made several promises in distributing them that I was unable to fulfill.

On the 10th of October, 1877, I received from Deputy U. S. Fish Commissioner Livingston Stone a crate containing 100,000 California salmon eggs, which were shipped from Redding, Cal., in a refrigerator car, to Chicago, Ill., and from Chicago to Ellsworth by express. It required nine days to reach me, after shipment. The eggs were in very good condition—not over five per cent. were found dead. I had prepared hatching boxes, using gravel instead of wire screens, and placed the eggs on the gravel beds, after picking out the dead eggs, which were readily discovered by their turning white. The water was permitted to flow through the boxes, covering the eggs to the depth of about three inches. The weather being very warm, the temperature of the water rose to 75°, causing large quantities of the eggs to turn white -making a very tedious job to separate them, which had to be done every day. After working patiently and watching carefully for two weeks, a sudden rise of the river washed the covering of the boxes away, and the eggs had also disappeared. Many no doubt made food for other fish, but I have a hope that others escaped, and will in time return full-grown salmon.

I failed to receive our share of the distribution of shad for

1878, as did Iowa, Missouri and Arkansas, on account of the failure on the part of the United States Commission to collect them. I have the promise of a double portion for 1879.

I have made arrangement with the Commissioner of Iowa, B. F. Shaw, to hatch 100,000 California salmon for distribution in November next. They are to be hatched at the State fish-hatchery, at Anamosa, Iowa.

RECOMMENDATIONS.

The duties of your Commissioner involve a vast amount of correspondence, especially with people who see some violation of the laws for the preservation of fish. I desire to call attention to the fact, that it is the duty of every law-abiding citizen to see that the law is observed, as well as the Commissioner. It is an impossibility for the Commissioner to act as a police, detective and witness. Many devices have been resorted to in order to evade the law. I would therefore recommend that for a period of five years, all fishing with every device whatever be made a violation of law—excepting with hook, line and rod, and with seine and net for the purpose of propagation only.

FISH-WAYS.

I would recommend that a plan be adopted, and the same be lithographed, and copies be furnished to all persons erecting dams, and to owners of dams. The plans furnished should embrace cheapness and durability, and should not interfere with the use of the water for power. Some of the dams require no fish-ways, where they are built on the "rip-rap" style, and have but little perpendicular fall.

FISH HATCHERY.

I would recommend and urge that an appropriation of not less than \$2,000 be made for the purpose of erecting a fish hatchery. The necessity of such a building is apparent to every person who will give the subject any notice.

I would recommend that the Commission be increased to three members, one of whom to be superintendent and to have a fixed salary, and that his whole time be devoted to the fish interest of the State.

I would further recommend an appropriation of \$3,000 for the year 1880, and \$3,000 for the year 1881, to be used by the Commission in paying the necessary expenses in collecting fish, spawn, etc., for our State. These appropriations are very small in comparison with other States. Michigan, in 1875, appropriated \$14,000; Wisconsin appropriated, in 1876, \$10,000 for that year.

KINANCIAL STATEMENT of the Fish Commissioner, embracing the expenditures from April 1, 1877, to June 30, 1878.

1877.	Te amount appropriated	 	*****	\$ 500 0
July	By 20 days' service, at \$3 per day	\$60	00	
-	By mileage for 550 miles, at 10 cents per mile

October	By express and cartage on 100,000 California salmon eggs from Chicago, Ill., to Elisworth, Kas		70	ı
	By telegraphing		85	i
	By telegraphing and postage		50	
	By 5 days' service as Commissioner		00	I
November			•••	
210101111	tion of 100,000 California salmon eggs		50	!
	By making hatching-boxes			}
	By lumber for hatching-boxes		50	
1878.	By laborer 10 days, at \$1.25 per day		50	
February	By 5 days' services as Commissioner	15	00	
	By mileage for 20 miles at 10 cents per mile		00	
	Total expended			
	By balance unexpended	169	45	
	Total	\$500	00	\$300 0

In closing my report, allow me to acknowledge the kindness, the encouragement and the assistance given by the State officers, and by scientific gentlemen in different parts of the State. Whatever opposition I have received, and fault that may have been found, came from those who did not look into the subject, to investigate the cause of the delay, etc.—of the imaginary neglect of duty. With faith, zeal and hope, we commit and commend the future of this great work just begun in our State to the enlightened judgment and sympathy of its friends.

D. B. LONG,
Commissioner of Fisheries for the State of Kansus

TRUSTEES' REPORT.

OFFICE OF THE BOARD OF TRUSTEES,
INSTITUTION FOR THE EDUCATION OF THE BLIND,
WYANDOTTE, KANSAS.

To his Excellency GEO. T. ANTHONY, Governor of Kansas:

SIR: In obedience to the statute, we respectfully submit this, the first biennial report of the Institution for the Education of the Blind.

The condition of the school exhibits a healthful state of progress, and the results attained have richly repaid the State for the expenditure in behalf of this class. Here it is now possible for the State to make an independent citizen out of each blind child, who will thus be enabled to add to its greatness and to its ad. vancement in the arts and sciences, instead of being a clog upon civilization and a tax upon prosperity. Through the knowledge acquired in the literary and industrial departments, each graduate is qualified to successfully grapple with the world in the struggle Conscious of their ability to succeed, they go forth from our portals without any trepidation, and settle down to business on even terms with their more highly-favored neighbors, who enjoy the use of all the senses. This is a glorious triumph for the system, and for the Institution.

Every school board in the State should be required, at each enumeration of children, to report the blind in their respective districts to the county superintendent, who should report the same to the Superintendent of the Institution for the Blind, simultaneously with his report to the State Superintendent of Public Instruction. Upon the receipt of said report, the Superintendent of the Institution should be required to forward blank applications to the parents of such children, with a notification that unless a voluntary application for admission into the school should be made, the provisions of the compulsory-education law will

be enforced. Sound political economy requires that they should be given this training, to the end that they may become contributing members of society, instead of useless consumers of the fruits of the labor of others.

The Industrial Department has been brought up to its present high standard through many difficulties. In 1875, the assets of the department available for reinvestment amounted to about There was no stock on hand. The important question to **\$**100. be settled was, How could it be reorganized, and placed on a selfsupporting basis? The Superintendent conceived the plan of stimulating the pupils by compensating them for their labor. The effect was marvelous. They became interested in the department, interested in their work, and alive to its importance to them. The small capital was invested and reinvested. Some of the older male pupils whom the State had supplied with clothing, now by their industry purchase their own, and it is possible by frugality during their student life to save a sufficient sum to purchase all the necessary tools to ply their vocation after they shall have graduated. Some have already done this. This system encourages industry, induces greater care, and prompts more earnest effort to attain a high degree of efficiency in the craft; at the same time it has been found to largely increase the productive capacity of the student. Two important traits of character are thus fostered and developed: industry and economy.

In addition to broom, brush and hat making, the Superintendent has been directed to give instructions in basket-making, and hereafter to make it one of the trades in this department. It is hoped that this will enlarge the field now open to the pupils of our school.

The Trustees have given careful attention to the different systems of printing in vogue in the publication of scientific and miscellaneous books for the blind, and take pleasure in indorsing what is said by the Superintendent in favor of the New York Point, believing it to be for all purposes superior to the "line letter." We earnestly desire our Senators to secure an amendment to the bill to endow the American Printing House for the Blind, now pending in the United States Senate, that will permit each institution to draw its proportion of books and "tangible" apparatus in whatever style of letter or apparatus the Superintendent thereof may elect.

We concur in the request made by the Superintendent for an appropriation of \$2,500, for the purpose of erecting a hospital building. An imperative necessity requires it. The health of the students, as well as the success of the school, demands that the sick should be separated from those in good health, and removed to a place of quiet. Interruptions have occurred in the regular exercises of the school because of the inability to do this, and doubtless will in the future, unless this appropriation shall be made. The further sum of \$500 should be appropriated to furnish the hospital now asked for.

The estimates for the current expenses of the Institution for the fiscal years ending respectively June 30, 1880, and 1881—\$13,513 and \$13,903—an itemized statement of which will be found in the Superintendent's report, have been carefully made, and cannot be reduced without injury to the school by diminishing the length of the school year. It will appear from the subjoined comparative exhibit of the cost of similar institutions in sister States, that prudence and frugality have prevailed in the administration of the various departments of our Institution. This statement gives the average number of pupils in attendance during the year, and the cost per capita:

	No. pupils.	Obst.	
New York	185	\$885 25	
California	80	861 11	
Wisconsin	76	248 42	
Maryland	56	442 86	
Georgia	54	288 26	
Kentucky	80	816 15	
Pennsylvania	207	483 88	
Indiana	100	822 08	
Ohio	140	262 90	
Kansas	41	225 19	

When remembered that it will cost no more to provide superintendence, instruction, lights, fuel, &c., for an institution with 100 pupils than it does an institution with 41, it will be readily seen that the *per capita* in this institution for the blind falls below all others of like character in the United States.

We have the pleasure to return to the treasury a small amount of the last appropriation, unexpended. We realize the fact that experience is the great factor in the successful management of this and kindred institutions. Development is the natural order, and with the flight of time and sedulous effort come efficiency and success. This is noticeable in every branch, from the Master of Handicraft and the Teachers in the Literary Department, up to the Superintendent. The views of all are enlarged, and their perception of the advantages of some and the disadvantages of other methods, and the needs of their school and pupils, is quickened almost daily by their labors and associations. It is a noble work and a serious one, requiring the exercise of the highest virtues, and those who have dedicated themselves thereto should enlist for life—then they may become literally eyes to them that see not.

We desire to express our great gratification at the substantial advancement which has been made by the pupils of this Institution, to the Superintendent and his faithful coadjutors, the Misses May Miller, Mary Lilly and Ella L. Houser, of the Literary, and to Mr. Jacob Mays, of the Musical Department, and to Mr. S. S. Moore, Master of Handicraft; and we extend our thanks to Mrs. Julia Miller for her unremitting efforts, as Matron, to promote the health, comfort and welfare of all, and to guard the interests of the State.

For a detailed and complete statement of the operations of the Institution, and the financial condition of the Industrial Department, and for a knowledge of the requirements of the Institution, you are respectfully referred to the report of the Superintendent, herewith published. We also transmit herewith the reports of the Physician and Treasurer.

(Signed)

SUPERINTENDENT'S REPORT.

To the Board of Trustees of the Kansas Institution for the Education of the Blind:

GENTLEMEN: It becomes my duty to submit this, our tenth report. Heretofore it has been customary to submit an annual report, but owing to the adoption of amendments to our State laws, our reports will hereafter be biennial, this being the first, showing the workings of the Institution for the past two years.

At the close of the term ending June 7, 1877, it was found necessary, on account of the failing health of Miss C. C. Lilly, to make a change in her department, which was filled by the appointment of Miss May Miller, a former teacher of this Institution, with whose qualifications as a literary teacher you are thoroughly familiar. So uniform has been the work, and so cheerfully entered into by those in charge of the various departments, that further changes have not been found necessary.

NUMBER OF PUPILS IN ATTENDANCE.

STUDIES PURSUED.

In the Literary Department, instruction has been given in the following branches: Reading in Boston Type, reading in New York Point, writing in New York Point, writing with grooved cards, Arithmetic, United States History, Geography, Grammar, Modern History, Spelling, Elocution, Literature, Geology, Entomology, and Algebra.

The advancement made in this department during the past term has no precedent in the history of this Institution; the examination at the close of the term showing a much higher percentage than ever reached before in the various departments. This fact I attribute to the free use of the New York Point Tublet in the class exercise. At the commencement of the last term, we introduced for the first time the use of the New York Point Tablet; thus enabling the pupils to sketch in full or outline the subject-matter given by the teacher, in place of depending entirely on the memory. By its use, under the direction of the teacher, the pupil prepares a synopsis of each lesson, which, if preserved, becomes a valuable text-book for future reference. This trial has been so successful the past term, that it will be enlarged upon in the future, and adopted in every branch of study where it is

practicable. In the past, we have used in classes' the embossed or line letter, (better known as "Boston Type,") with such poor results that we shall entirely discard it in the future, and use in its place the "New York Point" letter. Our reason for doing so is, the embossed letter is one the pupil has no power to form or change; the great similarity of the letters renders it extremely difficult for pupils to learn. Admitting that they can learn to read it after months and perhaps years of patient toil, they cannot communicate a thought to each other, when separated, as they have no power to form a letter. It is as desirable for the blind as for those who see, to have a system which they can write and afterwards read, for correspondence and class work. This is indispensable. The New York Point meets this needthe raised letter entirely fails. The New York Point is far more easily learned, being more tangible than the raised letter. Nine out of ten pupils who have learned to read the raised letter readily, as soon as they commence to learn a trade, where the palms of the fingers become a little hardened, can scarcely read a letter; while those who attempt to read it and learn a trade at the same time, find it impossible to learn to read the raised letter, while all can learn to read the New York Point easily while learning a trade.

By the publication of books for the use of the blind in raised letters exclusively, a large class of intelligent and industrious blind persons receive no benefit. The raised letter can generally be read by those whose condition or occupation in life does not impair their delicacy of touch. But for the sake of a large majority of the blind who work with their hands, and to whom the system of raised letters is wholly useless, we trust if the appropriation now pending be made by Congress to endow a printing house for the blind with a subsidy of two hundred and fifty thousand dollars, as asked for by the Association of Superintendents at their biennial session in Philadelphia, August, 1876, shall become a law, it may be so amended before passing the Senate that it will benefit every blind person, as well as every blind institution in the land. The law should compel those having the publishing house for the blind in charge, to expend at least one-half of such appropriation for printing books in New York Point letter.

While doubtless I shall be severely criticised by our friends of some of the institutions of the older States, for opposing this scheme, I feel it a duty I owe to those under my charge to recommend a remedy for this evil. I had hoped to see some of the older and larger institutions interpose an objection to what appears to be a growing monopoly. Our necessities demand that we should take some action in the matter, as we are compelled to manufacture our own text-books in the New York Point system at a heavy expense, in order to avail ourselves of the advantages they offer, as the publishing house for the blind does not find it to its advantage to manufacture them.

To illustrate the utility of the New York Point letter, a pupil of this Institution may take his tablet, and print a letter to one not in the least familiar with the system, and by simply inclosing the following alphabet, it can be readily deciphered by the one receiving it:

abcdefghijklmnopqrstuvwxyz

INDUSTRIAL EDUCATION.

As I devoted considerable space in the eighth and ninth annual reports, showing the advantages to be derived by the blind from an industrial education, and recognizing the fact that it is looked upon by the Trustees of this Institution as one of the permanent branches of education—receiving, as it does, your careful attention—it will hardly be necessary for me to refer to it, further than to detail its workings, and the difficulties under which we have been compelled to labor. Up to the present time, this department has received no direct aid from the State. When I assumed control of this Institution, in 1875, my predecessor left at my disposal, in stock and bills receivable, net assets to the amount of \$199.65, nearly one-half of which amount was needed for repairs and purchase of machinery, leaving about one hundred dollars for the purchase of stock with which to operate the department the ensuing year.

Owing to the market supply being nearly equal to the demand in this particular branch of industry, at certain seasons, it is necessary for us to store the bulk of our manufactured stock until the summer months, when the demand nearly always exceeds the supply. During this time the boys must be paid for their labor, the material of which the brooms and brushes are made must be paid for—and all must be done without a bank account. In order to do this, I have found it necessary to become personally responsible, at times, to the amount of from three to five hundred dollars, until the manufactured stock could be sold, and the proceeds collected, to liquidate the indebtedness of the department.

Notwithstanding all these embarrassments, we have been able to keep the industrial department in a healthy condition, as a glance at the following exhibit of assets will show:

ASSETS.		
Brooms on hand	. \$562	00
Brushes on hand	59	61
Raw material on hand	. 45	00
Handles, wire, twine, etc., on hand	78	72
Bills receivable		35
Tools and machinery		70
Total	. \$1,179	38
Bills payableLIABILITIES.	. \$363	43
Leaving assets over liabilities.	\$ 815	95

We find the net proceeds from the Industrial Department to be eight hundred and fifteen dollars and ninety-five cents. During this time six boys have finished their trades and left the Institution—three with the term ending June 7, 1877, and three with the term ending June 7, 1878. It is particularly gratifying to me, to be able to report to you that two of those who finished last year are employed for themselves, and are doing well; one of whom, W. K. Hubbert, is located at San Francisco, Cal.; the other, W. A. Plowman, is at Leavenworth, Kansas. The latter informs me that he is earning from \$10 to \$12 per week. of those who finished the year just closed, by their economy and industry, have been able to save enough from the money paid for their labor in this department, to purchase for themselves a complete set of tools for broom-making, at a cost of \$47 each, and have located as follows: one at James's Crossing, Jackson county; the other at Kansas City, Kansas, Wyandotte county. From the energy and good habits displayed while in attendance at this Institution, I am confident that they will succeed in providing for themselves the comforts of life. Their places in the department will be filled by new beginners the coming term.

The experiment of hat-braiding, for the girls, is only in its

infancy; many difficulties have had to be overcome. The past term they made a trifle over two hundred hats, for which we readily found a sale. As soon as we can braid and press a hat uniformly in shape, which we are fast accomplishing, we shall have fully settled the perplexing question, "What shall we do for the benefit of the girls?" Some of them can finish a hat in five hours, and with another term's practice, will do it in much less time.

THE MUSICAL EDUCATION OF THE BLIND.

This department has received its share of attention. Since our last report, it has been under the immediate supervision of Prof. Jacob Mays, whose untiring efforts have placed it in a position to benefit those who seek its advantages. have been popularly associated with music from remote ages. It was so even prior to the dawn of history, "as is proven by recent discoveries in Egypt, for the figure of a blind man with a musical instrument, carved in stone, may be seen in one of the subterranean temples." From what has already been accomplished. I am of the opinion that the blind can excel, and in fact become expert, in vocal and instrumental music, as performers and musicians, if they can fully overcome the technical difficulties which so often render them unfit to perform even the most simple written music for the piano. In order to do this, the young beginner must be encouraged as well as taught in this particular branch of study. Often a word of encouragement from older and more advanced pupils is of immense benefit. I remember of one instance where a pupil had labored hard for several days to learn the scale, and had been rewarded with success, to become completely discouraged, and finally to discontinue the study of music, through an unguarded remark of an advanced pupil. The selection of pupils for musical instruction is a responsible duty, which should be exercised with marked care. success of the pupil will largely depend upon the course which the instructor or musical director shall mark out for him. Although the blind pupil may possess all the natural taste for music that his seeing brother does, yet he is placed at an extreme disadvantage unless nature has especially endowed him. Nothing but the closest application and exercise of that cardinal virtue. patience, will cause him to excel in this branch of instruction.

While there are so few avenues of industry open to the blind,

we feel it incumbent upon us to watch closely for and encourage every indication of natural talent. I am well aware that this subject has received the most careful and earnest attention of superintendents of the most of our institutions, still I am led to believe that in many cases the efficiency of the musical departments of some of our institutions is greatly impaired by reason of trying to accomplish too much in organizing orchestral, string and other bands of music, for profit and amusement. We have strenuously guarded against falling into this error, fully believing that we could render the greatest amount of good to the largest number of pupils by giving instruction only in those branches upon which they must chiefly depend for their support in after-life.

MORE ROOM WANTED.

The rapid growth and increase in the population of our young and prosperous State, brings, as a natural result, a relative increase of pupils to be provided for by this Institution. In all probability, before the close of the next fiscal year, we shall be called upon to furnish room for at least sixty-five pupils, who will have claims upon this Institution for an education. From a careful inquiry, I find that on March 15th, 1878, there were in the State, forty-three blind children of school age, not in attendance at this school. Our utmost capacity is not more than fifty, and in order to accommodate this number, they must be equally divided as to sex.

Although I believe you came to the conclusion at your last meeting not to call upon the Legislature for an appropriation for building purposes, yet I think it imperative that we should erect a building, at an expense of \$2,500; the lower part to be used for hospital purposes, with a basement where food can be cooked for the invalids when required; the third story to be used as a dormitory, when necessity requires its use. With our present conveniences for the sick, if a pupil is prostrated with any nervous complaint, the exercises in the musical department must be suspended entirely or in part for days, on account of the nervousness of the sick pupil. This inconvenience has been seriously felt, especially during 1877, in which case the musical department was suspended entirely for one or two weeks on several occasions. Added to this difficulty, situated as we are, contiguous to large cities and the railroad center of the West, the pupils, as they go

to and from the Institution, are often exposed to contagious diseases; consequently, an airy, well-heated and ventilated building should be furnished to the sick, where they can be entirely separated from the other pupils, and where they may receive the proper medical attendance, and thus not subject others of the household to inconvenience or danger.

THE PROBLEM OF THE EDUCATION OF THE BLIND.

I desire to refer briefly to the peculiarly complex and comprehensive problem involved in the education of the blind. The general tendency of the age, in matters educational, is to the division of labor schools for special training, and to multiply year by year. The very babe has his school. Home training and influence are no longer sufficient for him. He is put into the little democracy of the kindergarten, conducted by cultured and trained teachers, while he is yet an infant. Thence he goes on through primary, intermediate, grammar and high school—through college, and, lastly, the professional school, before he is considered an educated man. In the home, Sunday school, and the church he receives the discipline which fits him for the social, moral and spiritual duties of life.

This Institution is the only school the blind child has in the State. There is no kindergarten for him, no graded schools near his home, where he can be taught at home, getting the better part of his education in the charmed home circle. For the blind young man or woman we have no colleges, no industrial, no normal schools; no opportunities for school training in any profession or industry, except such as we can give them here. number of blind is relatively so small, that it will be many years before they can be separated into graded schools, and taught something like the same method used with other children. day is coming—I think I see the signs of its rising now - when the blind children of our State will have a whole beautiful village dedicated to the wants of their education. It will consist of cottage homes, all well warmed, lighted and ventilated. these homes the children will be gathered in family groups, each family under the care and direction of a wise school-mother. On one side of the village green will be placed the kindergarten, with all the apparatus which a second wiser Fröbel will invent for its furnishment; primary, intermediate and grammar-school houses, each with its ample play-grounds and workshops, each occupying separate blocks; and, lastly, the high-school house will rear its towers. In it the blind pupil of that favored day will be either fitted to enter the great national university for the blind, which will then be in successful operation, or be prepared by suitable discipline to enter at once upon the practical duties of life. But the "good time coming" is not yet here. while, our school has to do all the work from kindergarten to high school and conservatory of music; has to be the home. Bible school, workshop and society—a little world, in short, to our own pupils. It is not pretended that at this Institution. weak as it is, all is done for the pupils that ought to be done. Three things we aim to accomplish: 1st. To thoroughly ground all our graduates in the elements of an English common-school education, and to give them a fair knowledge of history. literature, and the constitution and government of our country. 2d. We aim to prepare every one who goes out from our school into life to earn his own living. Of this, the industrial branch of our school course, I have spoken in this and former reports. and it will not be necessary for me to repeat what I then said. 3d. We aim, lastly, to so form the social habits and the moral and spiritual characters of our pupils, that they may exhibit the graces of good breeding in their social intercourse, always to be animated by the spirit of good citizenship, and always to live with reference to eternity. The social training and the moral culture imparted is mainly by the home character of the school. Our constant aim has been, and will be, to secure to our pupils all the advantages of a refined, intelligent and Christian home. The moral and spiritual instruction given is not dogmatic in character, but familiar. A home feature is given to the school by the very necessities of the case.

Many of the pupils are mere children in age and development. They appeal with peculiar and resistless power to the parental elements of character in Superintendent, Matron and teachers. Their child-wants are not to be denied. The teacher soon finds her heart, as well as her thoughts, going out to meet the wants of her pupils. The Matron and teacher take the mother's place, as far as it is possible for them to do so. By evolution and growth, the mere school becomes a family school, not by mere figure of speech, but of a truth. This home character of the

school, while it is vitally important to the pupils, makes the duties of the teachers and officers peculiarly exhausting. Our teachers know no respite from care, from the beginning to the ending of the school year. Although their duties are so exacting, each has cheerfully done all to make the Institution a home of earnest industry, contentment and purity—a nursery of strong and righteous character.

TERMS OF ADMISSION, ETC.

- 1. All blind persons residing in the State of Kansas, between the ages of ten and twenty-one years, who are not incapacitated by physical, mental or moral infirmity for useful instruction, shall be considered eligible as pupils of the Institution; but no one whose age does not come within the limits above prescribed shall be received or retained in the Institution, except in peculiar cases, and then only by action of the Board of Trustees.
- 2. The Superintendent shall have authority to admit applicants who come within the prescribed rules, but shall refer all other cases to the Board.
- 3. Pupils may be suspended and returned to their homes by the Superintendent, when, in his judgment, it is necessary to maintain discipline or promote the health of the school; but his action in all cases of suspension must be reported to the Board, for final adjustment, at their next meeting.
- 4. All regular pupils shall be required to be in attendance at the Institution at the commencement of each session, and to remain until the close of the same, unless prevented by sickness or some other exigency, which, in the judgment of the Superintendent, shall be deemed a sufficient cause for a leave of absence.

SUGGESTIONS TO PARENTS.

Application for admission should be addressed to the Superintendent of the Kansas Institution for the Blind, Wyandotte-Kansas. Parents and guardians must provide their children with good and suitable clothing to last them for nine months, which should be marked in plain and legible hand, in order to prevent loss. They should also provide them with sufficient money to defray traveling expenses to and from the Institution.

All boxes or packages sent to pupils by express, or as freight, should be directed in care of the Institution for the Blind, with

charges prepaid. When writing to pupils, if directed in care of Kansas Institution for Education of the Blind, it will insure a speedy delivery.

REPAIRS.

From the allowance made by the Legislature at its last session, we have been able to make some very necessary repairs—that of painting the exposed wood and tin work of the main building, laying of some new walks, rebuilding the barn, etc. Still there are many repairs which demand our immediate attention: among which are the substituting of a new cooking range in the place of the old stove, which has become useless; also, a new furnace for heating the house, the old one having become broken. There is danger connected with its use another winter. There should be a new out-house erected before another term commences. Our repair fund is hardly sufficient to admit of these much-needed improvements.

THANKS TO OUR RAILROADS.

The pupils, through me, wish to return thanks to the various railroad companies and their gentlemanly superintendents, for passes so generously furnished by them during the past terms, for, without their timely aid, some at least would have been obliged to stay away from school.

The Superintendent of the Missouri, Kansas & Texas R. R.

CONCLUSION.

Gentlemen, before closing this report, let me take this opportunity to thank you for the kind and watchful care you have seen fit to bestow upon this Institution in the past. Its growth and prosperity, in a great measure, depend upon your aid and wise counsel; and, in connection with the teachers of the various departments, you have shown your zeal by your work. May we

continue to assist each other in the future as in the past, that the Institution may fully carry forward its beneficent work of ameliorating the condition of the pupils intrusted to its care.

Respectfully submitted.

GEO. H. MILLER, Superintendent. WYANDOTTE, KANSAS, June 30, 1878.

ANALYSIS OF ACCOUNTS

Of the Institution, commencing with the close of the preceding fiscal year 1876, and closing with the fiscal year ending June 30, 1877, and June 30, 1878, for which amounts vouchers are on file in this office to correspond.

PHYSICIAN'S REPORT.

To the Honorable Board of Trustees of the Kansas Institution for the Education of the Blind:

GENTLEMEN: I have the honor to submit the following report, as the medical officer for the years 1877 and 1878.

At the opening of the session before the last, a number of the pupils returned, suffering more or less from malarial influences. This, however, by vigilant attention, was, in a great measure, overcome. During the winter of 1876-77 an epidemic of measles broke out among the pupils, attacking all those who were unprotected. We had not less than sixteen prostrated at one time, a number of them with quite serious complications. Subsequently, after convalescence, four of the larger pupils were attacked with pneumonia, so severely as to cause serious apprehensions for several days. In one case, indeed, the convalescence was protracted until the end of the session, and her return at the next session was considered quite doubtful. She did return, however, thoroughly recovered, looking better than she had for several years.

Prof. Mays, your music teacher, suffered during this session from an exceedingly painful attack of suppuration of the eyeball. It will, therefore, be seen that the studies and work of this session were seriously interrupted.

As an offset to the calamities of the last term, it affords me pleasure to report that a few words will record the condition of things during the last session. The pupils, at the opening of the last session, with perhaps a few exceptions, returned looking better than they had ever done before at the opening of the school since my connection with the Institution, which indeed has been since its foundation. During the term, what sickness we had to contend with, principally mild intermittents, yielded readily to treatment, though we had a few cases of pneumonia, but one, however, proving at all serious.

We were exceedingly fortunate, both last year and this, in

having no scarlatina in the Institution, although it prevailed somewhat in the immediate neighborhood. During its greatest prevalence we quarantined our pupils as thoroughly as possible, to which cause, and the exceedingly thorough sanitary regulations of your worthy and efficient Superintendent, I attribute in great part our fortunate exemption, so far, from this scourge.

Respectfully submitted. FRED. SPECK, M. D. WYANDOTTE, KANSAS, June 30, 1878.

TRUSTEES' REPORT.

To his Excellency GEO. T. ANTHONY, Governor of Kaneas:

SIR: We have the honor to submit this, the First Biennial Report of the Kansas Institution for the Education of the Deaf and Dumb, covering a period commencing December 1st, 1876, and ending June 30th, 1878.

A synopsis of State legislation changing the name of the Institution, providing for biennial instead of annual reports, and changing the fiscal year of the State, will be found in the report of the Superintendent, submitted herewith.

If the legislation referred to, which clothes this Institution with its proper designation as a school, shall result in destroying in the public mind the idea that it is a hospital or an alms-house, there will be greater hope, not only for its increased efficiency in the future, but also of its receiving that fostering care from the State which it so justly merits.

Kansas is proud of her educational system, and her munificent endowments for the support of common schools, and yet it cannot be successfully denied, that the provision made by the State for the education of its deaf-mute population has not been sufficient to accomplish what ought to be accomplished in this direction.

The deaf mute is entitled to a share in the free-school system as fully as his hearing brothers and sisters. The State, finding it neither economical nor convenient to educate him, as it does them, in the nearest public school, sends him to a special institution adapted to his necessities, but he is not therefore to be considered a charity pupil; he simply receives what the State owes to him, and the obligation to provide a system of instruction suited to his necessities is as sacred and binding as the obligation to foster and support the common school.

The methods adopted for imparting instruction to the deaf mute are yet undergoing the test of experience. Many of the ablest minds who have made the study of these methods a specialty, differ as to their respective value, and in a majority of schools more than one method is practiced. These systems of instruction require trained teachers, whose services are valuable in proportion to their attainments and experience, and necessarily rate higher than the services of teachers engaged in common schools.

This Institution bears favorable comparison for progress with those of other States. The amounts appropriated for its support, although somewhat meager in comparison with its needs, have been prudently expended, and cheering results have been obtained. The Superintendent, Major T. C. Bowles, is a man whose soul is in his work; and although he has been prostrated for months with severe physical affliction, from which he is slowly recovering, his active mind has superintended the work, which has been executed by faithful assistants.

We desire in this connection to express our appreciation of the admirable management of the Matron, Mary E. Bowles, in the discharge of the various duties imposed upon her. The patient energy and determination which have characterized her efforts to protect the interests of the Institution during the protracted illness of her husband, justly entitle her to this public recognition of her services.

The accompanying report of the Superintendent sets forth in detail the condition of the Institution, its work and its needs, and the statistical tables presented are valuable for reference and comparison.

Aside from a deficient water supply, the location of the Institution is well adapted to its successful management; and after a careful examination of the plan to secure an adequate supply of water, to which reference is made in the report, we are convinced that it is practicable, and can be carried out with a moderate expenditure of money.

We fully concur in the representations made in the report, in regard to additional buildings. The Institution is crowded and cramped for room, and the heavy influx of immigration into the State, bringing its inevitable ratio of deaf and dumb, will press hard upon its resources. But while we deem it to be our duty to urge speedy appropriations to complete the buildings needed for this school, in order that the State may meet its obligation to this class of our population, and the best results as to the health and comfort of the pupils, and their education be secured, it is

also our duty to here represent, that in the matter of legislative appropriations, if the resources of the State are not sufficient to fulfill all of its obligations to the benevolent institutions, the paramount duty of making immediate provision for the necessities of our insane population should take precedence.

In view of this fact, we omit from our estimates of needed appropriations any estimate for new buildings, but trust that a spirit of inquiry into the needs of the Institution, and a recognition of the fact that it has been too long neglected, will prompt the legislature to appropriate the sum needed for additional buildings, as per the estimate submitted by the Superintendent, if within the bounds of financial possibility to do so.

A wise policy demands that the industrial department of the school be carefully fostered, so that while the mind of the deaf mute is being trained to meet the responsibilities of life, his hands may also be trained to skilled labor, and his education be thereby made to bear a practical relation to his necessities. In support of this policy, and at the request of the Superintendent, we authorized the construction of a cabinet shop, and the purchase of tools for the same, and we include in our estimates the sum needed for salary of foreman.

The following unexpended balances of appropriations made for the fiscal year ending June 30, 1878, have been covered into the State treasury, viz.:

,		
Care and maintenance	\$68	13
Furniture and bedding	82	89
Clothing for indigent pupils	181	88
Text-books, library, etc		49
Feed for stock	89	31
Repairs, shops, etc		44
Material for shops	11	67
Total	8000	~

The amounts needed for the support of the Institution for the fiscal years ending on June 30th, 1880 and 1881, are set forth in the accompanying itemized estimates. These estimates are based upon the maximum capacity of the Institution, which will be exhausted during the present year. We respectfully request that the appropriations be made in an aggregate sum, in order that future embarrassments in administering the financial affairs of the Institution may be avoided. A strict compliance with the restrictions of an itemized appropriation law will often defeat the very spirit of the appropriation.

ESTIMATES FOR SUPPORT.

Por what purpose.	1880.	1881.
Care and maintenance	\$6,500 00	26,500 00
Fuel and lights	1,400 00	1,400 00

Salary of teacher grammar class	500 00	500 00
Salary of teacher first intermediate class	500 00	500 00
Salary of teacher primary class	880 00	350 60
Salary of teacher articulation		450 00
Salary of teacher needle-work	250 00	250 00
Salary of foreman printing office	850 00	250 00
Salary of foreman shoe shop	450 00	450 90
Salary of foreman cabinet shop	500 00	800 00
Salary of clerk	500 00	500 00
Salary of supervisor	200 00	200 90
Salary of supervisoress	200 00	200 00
Salary of housekeeper	250 00	250 00
Salary of engineer	500 00	500 60
Selary of cook	800 00	200 00
Salary of farmer	200 00	800 00
Salary of two laundresses	800 00	300 00
Salary of three domestics	450 00	450 00
Contingent fund	500 00	500 00
Total	\$22,250 00	821,850 90

Recognizing the fact that the pressing wants of our insane population would be a considerable tax upon the resources of the State, we have fully realized the necessity of administering the affairs of this Institution with the utmost economy consistent with its present interests.

To this end, steps have been taken to make available all the present resources for the accommodation of pupils. The old building has been repaired, and by a judicious application of paper and paint, several of the rooms have been made pleasant and agreeable. We have included in our estimates for 1880 the sum of \$400 for additional repairs upon this building.

The report of the Physician, and the report of the Treasurer covering the financial affairs of the Institution, are submitted herewith.

Respectfully submitted.

EDWIN KNOWLES, President, A. T. SHARPE, Treasurer, C. E. FAULKNER, Secretary, J. L. WEVER, T. T. TAYLOR, Trustees.

OLATHE, KANSAS, June 30, 1878.

TREASURER'S REPORT.

To the Honorable Board of Trustees of the Kansas Institution for the Education of the Deaf and Dumb:

GENTLEMEN: I have the honor to present herewith my report as Treasurer of this Institution, from March 1, 1878, together with reports for the year and three months previous, as exhibited by the books of my predecessor in office.

FROM DECEMBER 1, 1876, TO JULY 1, 1877. RECKIPTS.

A. T. SHARPE, Treasurer.

OLATHE, June 30, 1878.

SUPERINTENDENT'S REPORT.

To the Trustees: The apparent tardiness of this report, the changed title, other changes in terms on the title page and elsewhere, and the manifest lack of correct information among the patrons of the school and others in regard to the present organization of the Trustees, require a brief synopsis of

RECENT STATE LEGISLATION.

- 1. By the act of the Legislature, approved March 4, 1876, the Institution for the Blind, the Asylums for the Insane and the Institution for the Deaf and Dumb; were placed under the direction and control of a single Board of Trustees, consisting of five persons, none of whom must reside in any of the counties where said public institutions, or any of them, are situated, and the removal of a trustee into any of said counties vacates his office per se.
- 2. By the act of March 6, 1877, the name of this institution was changed from the "Kansas Asylum for the Deaf and Dumb," to the "Kansas Institution for the Education of the Deaf and Dumb." By the same act the official title of the chief resident officer of the Institution was changed from Principal to Superintendent.
- 3. By the act approved February 15, 1877, the commencement of the "fiscal year" was changed from the first day of December to the first day of July in each year. By the same act the official reports of the officers of the public institutions are required to be made biennially instead of annually, as heretofore; which reports shall be delivered into the hands of the Governor on or before the first day of September preceding the regular sessions of the Legislature.
- 4. The ratification by the people, at the general election in November, 1875, of the amendments to the constitution, estab
 (13)

lishing biennial sessions of the Legislature, changes the form of our appropriations from a one-year's to a two-years' support.

The foregoing summary of the provisions of late laws will explain the new terms used, and, I trust, be a sufficient answer to the curious as well as the honest inquirer.

ATTENDANCE OF PUPILS.

My last report, the eleventh annual, closed with the 30th day of November, 1876. The present report embraces the period from that date until the 30th day of June, 1878, extending through nineteen months, and is denominated the "First Biennial." At the date of my last report, there were on the rolls of this Institution, 81 pupils, consisting of 39 males and 42 females. Since that time there have been admitted to the Institution 28 more, viz., 12 males and 16 females—making a total enrollment during the nineteen months of—

Males	51
Females	58
Total	109

CATALOGUE OF PUPILS.

Annexed is a series of tables which present the names of all the pupils who have received instruction at this Institution from its organization to the present time, with other interesting and important data, which will be of value to all persons interested in the welfare of the deaf and dumb.

The first presented is a catalogue of pupils. It will be observed that this is presented in substantially the same form used in my last annual report. This is done for two reasons: the first and principal one is, to secure it printed and bound in a proper manner in the published report. The former table was printed on a single long sheet, one end stitched into the body of the report, the sheet then folded after the fashion of a pocket map or chart. The table is an important one, and should be printed and bound in a convenient and permanent form. The other reason is, that the succeeding tables may be verified by this.

CATALOGUE OF PUPILS.

State of Missouri	
•	
Total	181

Of the seventy organized counties of the State, only forty-three have been represented.

It is a little surprising, and needs explanation, that counties so long organized and so populous as the counties of Lyon, Davis, Riley, and others, should never have had a single pupil at this Institution.

NATIONALITY AND NATIVITY.

The nationality of the pupils, so far as we have been able to ascertain, is as follows:

ertain, is as follows.	
Americans	
Canadians	
Irish	
Swedes	. 8
The places of their nativity are as follows:	
Arkansas	. 2
Canada	
District of Columbia.	
Illineis	
Indiana	
Iowa	
Ireland	
Kapses	
Kentucky	. 6
Michigan	
Missouri	. 27
Maine	. 1
Nebraeka	. 2
North Carolina	. 2
Ohio	. 10
Pennsylvania	. 2
Sweden	. 8
Tennessee	
Wisconsin	
Vermont	
Unknown	. 16
NUMBER ENBOLLED YEARLY.	
These pupils were admitted to the Institution as follow	R:
At the first session, in 1865	
At the second session, in 1866.	
At the third session, in 1867	
At the fourth session, in 1868.	
At the fifth session, in 1869	
At the sixth session, in 1870	
At the seventh session, in 1871	
At the eighth session, in 1872	
At the ninth session, in 1878	
At the tenth session, in 1874	
At the eleventh session, in 1875	
	17

NUMBER OF DEAF MUTES IN EACH FAMILY.

At the thirteenth session, in 1877

The pupils admitted represent one hundred and sixty-nine families, of which —

Four families contained four mutes each.

Seven families contained three mutes each.

Twelve families contained two mutes each.

One hundred and forty-six families contained one mute each.

DATE AND CAUSES OF DEAFNESS.

The age at which deafness occurred after birth, as furnished by the parents, is as follows:

Under one year of age	18
Between one and two years	
Between two and three years	
Between three and four years	
Between four and five years	
Between five and six years	
Between six and seven years	
Between seven and eight years	
Between eight and nine years	
Between nine and ten years	
Between eleven and twelve years	
Between twelve and thirteen years	
Between sixteen and seventeen years	
Unknown	

The causes of their deafness, assigned by their parents, were as follows:

Congenital	58
Sickness, undefined	11
Brain fever	9
Spotted fever	. 9
Fever, undefined	. 8
Scarlet fever	. 7
Cerebro-spinal meningitis	. 6
Typhoid fever	
By a fall	4
Gathering in the head	4
Spinal fever	. 8
Measles	8
Inflammation of brain	. 8
Excessive use of quinine	
Congestive chills	9
Diphtheria	2
Pneumonia	2
Accidental injury	2
Cold	2

Inflammation of throat	. 1
Tumors in the head	. 1
Teething	1
Causes unknown or unassigned	25

DEAF-MUTE RELATIVES, AND CONSANGUINEOUS MARRIAGES.

The deaf-mute relationship of these pupils, as far as ascertained, is as follows:

Seven pupils have one brother deaf and dumb.

Six pupils have two brothers deaf and dumb.

Five pupils have one brother and one sister deaf and dumb.

Four pupils have two sisters deaf and dumb.

Four pupils have one sister deaf and dumb.

Three pupils have three sisters deaf and dumb.

Two pupils have one sister, one uncle and one aunt deaf and dumb.

Two pupils have one sister and two brothers deaf and dumb.

One pupil has one brother and one uncle deaf and dumb.

One pupil has one brother and two sisters deaf and dumb.

One pupil has father, mother, two sisters and two uncles deaf and dumb.

One pupil has father, mother, one aunt and three cousins deaf and dumb.

One pupil has father, mother, brother, sister and two uncles deaf and dumb.

Fourteen of these children are the offspring of parents who were related before marriage, as follows:

Four are the children of first cousins.

Two are the children of second cousins.

Eight are the children of third cousins.

The production of the foregoing tables has involved no small degree of labor and research. The imperfection of the early records of the Institution, and the reluctance of some parents to be catechized on some important facts relating to their children and their marital associations, render such tables necessarily imperfect. But they are as reliable as they can be made out of the resources available, and are believed to be as reliable as such tables generally are. They are now presented to the public for the first time in the history of this Institution. Henceforth, their reproduction, or the preparation of similar tables for incoming pupils, under the system of records now kept, will be comparatively easy.

CAUSES, PREVENTION AND CURE OF DEAFNESS.

In my last report (the Eleventh Annual) I acted upon the theory that reports of the Institution for the Deaf and Dumb should not be merely local in their application, but, in addition to the presentation of local accomplishments and necessities, should present, as far as practicable, information pertinent to the education, training, care and treatment of the deaf and dumb. There is a dearth of this kind of literature in the land. The public generally are wholly ignorant of these matters. Hence the necessity of furnishing all the information possible in the public reports. I have seen no reason to change my course in this respect, but am rather confirmed in its wisdom, and shall continue to pursue it.

The Junction City *Union*, one of the able weekly journals of the State, closed a friendly criticism upon our last report in the following language:

"There seems to be one thing lacking in the report of the Principal which will probably be supplied when he becomes more thoroughly acquainted with the Institution and its inmates, and that is, information based on causes given, that shall lead to a prevention of the afflictions. Also, an inquiry as to the possibility of cure. These things seem to be entirely ignored by the management in the report for 1876. The inmates appear to be received as incurable, and for any effort to the contrary that appears, will be kept so."

The instructors of the deaf and dumb classify the causes of deafness under two general heads, viz.: Congenital Deafness, embracing those who are born deaf, and Adventitious Deafness, embracing those who have lost their hearing after birth, by disease, accident or other causes. The causes of congenital deafness cannot always be ascertained with certainty, but the following are quite well settled as the three leading causes, viz.:

- 1. Blood relationship of parents.
- 2. Intermarriage of congenital mutes.
- 3. Scrofulous ancestry.

The causes of adventitious deafness are numerous, as one would suppose from the thirty-three causes assigned in the cases of ninety-eight pupils of this Institution, but the principal causes may be summarized as follows: Falls, frights, blows, great noises, sudden noises, skill of physicians, contagious or infectious discases, and fevers of all kinds. One of these causes perhaps needs a word of explanation—"the skill of physicians." This may

strike many as a singular cause, but a moment's thought will settle any doubt that may arise as to its pertinency. Skillful physicians find in the treatment of diseases that they may save life at the expense of one or more of the senses. In the treatment of small-pox, to save life it has been necessary to sacrifice sight; so in zymotic diseases and fevers, especially scarlet fever, the paramount duty of the physician is to save life, but it is often at the expense of the hearing. Of the causes assigned, much the most common is fever in its various forms.

Now in regard to the cure of deafness: The Union did well to raise this question. There is a manifest lack of information on this subject, which is even shared by some of the parents of the deaf and dumb. A gentleman brought a son to this Institution not long ago for no other purpose than to have him cured of his deafness. Many entertain the impression that this is an Institution for the treatment and cure of deafness, as well as a school for those deprived of the faculty of hearing.

We can inform the Union, and all laboring under similar impressions, that the treatment of deafness has never, in a single instance, been formally undertaken by any school for the education of the deaf and dumb since the organization of the first public school under the auspices of the Elector of Saxony, one hundred years ago. The reason is, it has long been well settled by the medical profession that deafness which is so profound as to cause dumbness, is incurable. As the celebrated French physician, Itard, expressed it sixty years ago: "The ear is dead, and medical means have no effect upon the dead." While empirics and pretenders often make the fond anxiety of the parents of the deaf a source of profit, respectable physicians have long ago ceased to prey upon the credulity and affection of devoted parents, or to excite hopes of relief, or restoration of hearing, when they know that there are no grounds for hope. Much attention has been devoted to this subject by able physicians in different parts of the world. Among those I may mention the names of the distinguished Sir Astley Cooper and Mr. Cleland, of England; Drs. Itard, Meniere and Delean, of France; Hendrisky and Guyot, of Holland; Hymly, of Germany; and Wilde and Morell, of this country. These gentlemen made the subject of diseases of the ear, more or less, a special study; some of them (Itard for one) made it a life study and work. Every experiment and test known to science was thoroughly tried, and their unanimous verdict is, that while partial or very recent deafness may, in a few instances, be modified or slightly alleviated, total deafness is beyond the reach of human aid. Nothing short of a divine miracle can restore it.

This then disposes of the question of cure, leaving us the only alternative, prevention, as a lessener of the calamity of deaf-dumbness. Congenital deafness can be partly prevented by prohibiting consanguinous marriages, and the intermarriage of congenital mutes, and avoiding the causes which produce scrofulous results.

In regard to adventitious deafness, there will probably continue to be about the usual number of cases—the results of falls, frights, blows, great and sudden noises, and such causes. But deafness produced by sickness, especially by fevers, the most prolific source, it is believed can be materially lessened by more careful nursing. The statistics of Great Britain show that adventitious deafness has been gradually diminishing in that country during the last thirty years. This improvement is attributed to the improvements introduced there in that period in nursing the sick. Mr. B. St. J. Ackers, in a lecture delivered on the 12th of October, 1876, before the Gloucester Literary and Scientific Institution, in England, after alluding in detail to the results of improved nursing in its relation to deafness, says:

"Cannot this improvement be increased? I believe it can, and greatly so, too. The general use of the speculum and lamp in all cases of severe fever, not after the patient has got about again, but during the height and progress of the disease, would do much, it is believed, not only to save the hearing but even the lives of many so attacked. There is the closest affinity between the tympanum, or drum of the ear, and the brain. Diseases of the ear will often cause brain mischief and death; what more likely, then, than that timely, judicious and skillful incision of the membrana tympani in certain cases would afford vent to the poison unable to pass down the Eustachian tube, as is often the case in fever, and so frequently save hearing, and life also in many instances? I believe that in numbers of cases deafness might be thus averted, and in many more by yet better nursing."

APPROPRIATIONS.

In these days of financial and commercial lethargy, while many of the avenues of industry are closed to thousands of willing hands, and while the professional loafer and mendicant, under the title of "tramp," in roaming thousands, has become a hateful, veritable reality in this boasted land of plenty and free homes, we approach a topic looking toward a possible depletion of the public finances with "fear and trembling." But as a faithful exponent of the wants and necessities of a great public charity, it is my duty to lay before the public the simple facts, at least, bearing upon the necessary capacity and appointments of an institution adequate to the requirements of the deaf and dumb of the State.

A very common sentiment prevails that we have been unsecessarily lavish in contributions to the public institutions of the State. Many public-spirited and generous-hearted citizens maintain that we have exceeded the bounds of prudent statesmanship; that we have been extravagant, and have not maintained that equipoise which business sagacity suggests between our public outlays and developing resources. This is a sentiment which I will not essay to controvert in its application to some of our public enterprises. Our State has, in the short period which has elapsed since the close of the great civil war, sprung up from a hundred thousand to three-quarters of a million people.

In the unavoidable chaos and pell-mell of society, which is the natural result of such a sudden congregation of humanity, of all shades and with varied tastes, strangers to each other and to the wants of their new home, it is not surprising if, under such circumstances, many public mistakes should have been made. A very common tendency of such a state of society is to overdo some public enterprises, and overlook others equally meritorious and deserving of patronage. Such undoubtedly has been the case with our rapidly-developing State. A more settled state of society will, in a few years, equalize these public contributions; and when this is accomplished, our State will take rank with the oldest and richest States in its generous provisions for the public weal in all its varied phases.

In the haphazard which has unavoidably characterized some of the State's public benefactions, the Deaf and Dumb Institution has failed to receive its full share of recognition. It is one of the public charities which in the general "scramble" was overlooked or ignored as less deserving than some others. Hence, notwithstanding that the time is inopportune, the financial out-

look inauspicious, and public generosity timid and cautious, I am obliged at this time to call public attention to the short-comings of the State toward its deaf-mute population.

In order that we may see ourselves as others see us, in as short a time as possible, and at the least personal inconvenience, I have, after considerable research among institution reports, deaf-and-dumb annals, and a correspondence with all the heads of State institutions in the United States, produced the table on page 30, for the purpose of presenting, in a condensed and concise form, a comparative exhibit of what each State has done and is doing for its deaf and dumb, in the following particulars:

- 1. Total sum expended.
- 2. Annual cost for support.
- S. Average pay of teachers.
- 4. Extent of provisions made.
- 5. Number unprovided for.

The foregoing table is not free from criticism in some respects, although in the main it will be found reliable. The delay, and in a few cases failure, of parties to answer letters of inquiry, will explain most inaccuracies. In such cases deficient parts of the table had to be made up from such sources of information as were at my disposal, or left blank.

A careful study of this table presents a variety of interesting facts. Some of the States of acknowledged liberality, the inhabitants of which are noted for their generous impulses and marked enterprise and public spirit, will be found sadly deficient toward their deaf and dumb; while other States, classed as illiberal, fogy, conservative, etc., the inhabitants of which are indifferent or inimical to popular education, will be found far in advance of their more pretentious sister commonwealths.

In the general appropriation for the deaf and dumb, Ohio heads the list, \$1,600 per capita; lowest in this scale is Georgia, \$125 per capita; and next lowest, we are scrry to say, is Kansas, \$175 per capita.

In the cost for yearly support, Kansas expends \$179 per capita, to California's \$631 per capita. Kansas is the only State wherein the annual cost is less than \$200 per capita.

In the average pay to teachers, Michigan is the lowest, \$575; and California is the highest, \$1,860. In this scale Kansas is number four, counting from the lowest; her average is \$667.

Louisiana, Michigan, Texas, Minnesota, Maryland, Nebraska and West Virginia have provided school accommodations for all the deaf and dumb of school age within their borders. Iowa (partly caused by fire) and Georgia are most deficient. Kansas has one hundred pupils out in the cold. Other comparisons and contrasts will doubtless suggest themselves to the interested and curious.

In the foregoing exhibit it will be observed that the status of Kansas is in every respect too far below the average. I confess to no small degree of mortification at the discovery of this fact. Before the preparation of the above table, I did not realize that our State had dropped so far to the rear in the progressive march. The State pride of every enterprising citizen must be humiliated at the sorry figure we present in the exhibit made.

INSUFFICIENT YEARLY SUPPORT.

The annual cost for maintenance, viewed in one light, may be regarded as a mark of great economy; but viewed in its proper light, our stinted allowance is a source of no little distress, inconvenience and hardship in our household. Two years ago, when requested by one of the Trustees to prepare for the use of the Governor a statement showing the annual cost of this Institution as compared with others, I requested that the statement be withheld from the public. It exhibited in our State, (of which I am not a little proud,) a degree of niggardliness altogether foreign to its character. An annual allowance which forbids the employment of the necessary domestic help and outdoor labor to keep the buildings and grounds and the persons of pupils in a healthy state of renovation, is doubtful economy. Of the means of subsistence, we have an ample supply of good character and in fair variety, but we do need and should have by all means the following additional help, viz.: One assistant matron or housekeeper, two domestics for chamber work, one farmer or gardener, two supervisors (one male and one female), one engineer, one teacher of articulation. I know of no institution of the size of this one which is so straitened for help.

By reference to the table, it will be observed that Georgia, our next best friend in that exhibit, is the next lowest to Kansas in her yearly expenses, viz., \$200 per capita. I think we should have a yearly allowance of at least that sum for current expenses. Having so long been accustomed to pull through on a per capita varying from \$160 to \$180, I think an advance of \$20 to a pupil will secure us the additional help so much needed.

Our aggregate legislative appropriation last year was \$16,150. This was subdivided into a dozen or more funds, which seemed a waste of printer's ink and paper. It was no doubt a wise precaution in the incipiency of the public institutions to carefully guard the appropriations, but since these have become thoroughly established, and their yearly wants well settled, such specifications seem unnecessary verbiage, and often necessitate a useless and constrained conformation of accounts to make them available. Otherwise the institutions would have to close their doors a month or two in each year for want of available funds.

In subdividing the yearly allowance into a dozen or more spo-

cific funds, the calculation never can be made correctly. The estimates in some cases will be too high, in others too low. A strict construction of the law would prevent the use of a surplus in one fund to supply a deficiency in another, and yet such evidently is not the spirit of the appropriation laws. To provide against contingencies that might arise, in consequence of these unmeaning specifications, I would suggest that the appropriation be embodied in a single sum for current yearly expenses. For this Institution, the calculation will be a safe one to multiply the number of pupils by two hundred dollars. We ask only a reasonable support, avoiding all extravagance and superfluities.

ADDITIONAL BUILDINGS.

The deaf-mute population of the State is ascertained from two sources of information—the census returns and reports collected at the State institutions. Our table estimate of the number in this State is abundantly sustained by the records cited. The unprecedented influx of population to the State during the current year will undoubtedly add at least fifty more to our estimate. The present buildings will barely accommodate, by judicious packing, one hundred pupils, and no more. By the beginning of another school year it may be safely premised that there will be one hundred and fifty more to provide for. Shall it be done? Cannot the State, even in these unpropitious times, raise its standard from \$175 per capita to about \$400 per capita? This, it will be observed, is a very low rate compared with a large majority of States.

The custom which has prevailed in Kansas in the commencement of the construction of the public institutions is unfortunate. The practice has been first to erect an extreme wing, L, or some other remote branch of the main structure. This practice is apparent economy, but when properly investigated will be found to be penny-wise and pound-foolish. Provision must be made in these collateral buildings for heating, lighting, ventilating, a water supply, and sewerage; arrangements must be made for cooking, dining and washing, and rooms provided for school, chapel, and other incidental exercises. These accommodations must necessarily be temporary, and the money expended on them wasted. True economy directs that there be first provided complete plans and specifications of the buildings or system of build-

ings wanted, and that the first building erected should be the administrative or operative building, whether this be located in the center of the group or elsewhere. Beginning in this way, there need be no temporary accommodations, and consequent waste of means, but every dollar expended and part constructed will be of permanent utility.

While the mistakes of the past cannot be rectified, it is not too late to begin to hedge against similar extravagances in the future construction of public buildings. I therefore respectfully recommend that provision be made for the erection of a central building, and an intervening wing connecting the present building with the central structure. This will involve an appropriation of \$60,000.

INCREASED SALARY OF TEACHERS.

The efficiency, thoroughness and usefulness of the educational department depend upon the qualifications, experience and capabilities of the teachers. Apt teachers, of ripe experience and scholarship, cannot be retained nor obtained at the salaries which are now being paid. To insure the success of this department, I respectfully request a generous increase in the appropriation for the pay of teachers.

Special attention is called to the serious default in the last appropriation for the pay of the teachers of the Industrial Department. The nominal sum of \$600 was appropriated for the salaries of three teachers. If the same rates had been paid as are paid by other institutions, this sum would not have paid the salary of either the foreman of the shoe shop or printing office. I hope such an oversight will not occur again, but that these teachers may be awarded such salaries as their valuable services warrant.

A WATER SUPPLY.

A serious obstacle to the efficient administration of the Institution is a scarcity of water. Since I assumed the control, I have caused the cistern capacity to be increased from 500 barrels to 1,500 barrels; still, the necessity of hauling water frequently from a well on the premises, one-fourth of a mile distant from the buildings, has not been obviated. Experiments in well-digging, blasting, and boring on this high prairie, with an unbroken rock bed at a depth of eight feet from the surface, has not proved a success, and I am not disposed to encourage further experiments

in that line. After a careful and exhaustive consideration of this question, I am of the opinion that there is but one way to provide at this place an unfailing adequate water supply, and that is, by providing a suitable and sufficient receptacle for husbanding surface water. There are two points within eighty rods of the Institution which afford eligible sites for such a dam, either of them commanding an ample area of surface drainage for an inexhaustible water supply. The practicability of collecting surface water here has been clearly demonstrated in what is known as the "Ice Pond," near the depot of the Mo. Riv., Ft. S. & G. R. R., caused by a simple "fill" in the construction of the railroad. Scientific experiments have established as a fact, that deposits of surface water may be kept pure and palatable in two ways: one is by depositing in the water at stated intervals certain simple chemicals; the other is, to maintain the water at a uniform depth of twelve feet and over. With such a reservoir, provided with a suitable steam engine, pump, water pipes, distributing reservoir, etc., the "worry" about water would soon pass into history.

The city of Jacksonville, Illinois, and the State institutions for the deaf and dumb, the blind, and the insane, located there, are supplied wholly by surface water. The Board of State Commissioners of Public Charities of that State, in their third biennial report, say:

"In our first biennial report, presented to the Governor in the month of December, 1870, we made certain statements as to the then existing deficiency in the water supply for the public institutions at Jacksonville, which gave natural but undesigned offense to the citizens of that town. It affords us great gratification to be able to state that, in our judgment, the lack formerly complained of no longer exists. The city has constructed a system of water works, by damming a ravine about a mile east of the insane hospital, and catching the surface drainage and the overflow after a rain or a melting snow. The engineer employed was Mr. E. S. Chesbrough, of Chicago, who, after personal inspection of the locality, and much careful study, furnished a plan and specifications, which have fully realized the expectations of the originators of the scheme. The present capacity of the impounding reservoir is fifty million gallons. Its capacity can be doubled, when necessary, with little additional expense. The dam is eighteen feet high, and in no part of the reservoir does the water stand less than twelve feet deep. That depth insures pure water at all seasons of the year; as it is claimed, and we believe it to be a fact, that water stored in a depth of not less than twelve feet will not stagnate or become impure. To effect this depth, an excavation was made to the extent of ninety-three thousand

cubic yards. After closing the gate in the weir, the reservoir filled in four weeks, and since that time—during nearly one year's operation of the works—at no time has the water been more than two feet below the point of overflow. From the impounding reservoir the water is conveyed, through iron pipes, by the action of a powerful steam pump, to a second or distributing reservoir, on College Hill, immediately south of the institution for the deaf and dumb. The capacity of the distributing reservoir is two-and-a-half million gallons. Its elevation is ninety feet above the public square, and this head is found to be sufficient to throw water, without the intervention of an engine, from the fire-plugs at the curbstone, over any house in the city, save a few in the immediate neighborhood of the reservoir. * * *

"The success of this experiment, attempted so far as we are aware for the first time upon a large scale, is a legitimate source of congratulation, not only to the people of Jacksonville, but of the State of Illinois, and of the entire Northwest, who have seen with dismay the gradual drying-up of streams, ponds and springs within the past fifty years, and have experienced the inconveniences everywhere arising from the want of an abundant supply of pure and healthy water."

Let it be borne in mind, that in the year 1870 the State of Illinois had invested in the city of Jacksonville, in public buildings and grounds, over two millions of dollars; yet so grave a deprivation was a lack of water esteemed, that the Commissioners did not hesitate to recommend the abandonment and virtual loss to the State of all this property.

The expense of providing a sufficient dam at one of the points above referred to, at this place, would be quite insignificant. At this point and in its vicinity are numerous springs, which could be utilized to improve the character of the water store, as well as to insure its permanency beyond a question. I am quite confident that the water husbanded in the vicinity of these springs, by the means proposed, will be superior in quality to any water attainable from any running stream, and will therefore justify any trifling extra expense involved in its storage.

ЕРНРНАТНА.

"32. And they bring unto him one that was deaf, and had an impediment in his speech; and they beseech him to put his hand upon him.

"33. And he took him aside from the multitude, and put his fingers into his ears, and he spit, and touched his tongue:

"34. And looking up to heaven, he sighed, and saith unto him, Ephphatha, that is, Be opened.

"35. And straightway his ears were opened, and the string of his tongue was loosed, and he spake plain."—Mark vii., 32-35.

At the date of the above miracle, and for many centuries later,

dumbness, as well as deafness, was considered answerable only to miraculous power.

"And the string of his tongue was loosed," plainly indicates the prevailing sentiment at the beginning of the Christian era. Then, and for full fifteen centuries afterward, it was the universal opinion that dumbness was the result of a paralysis of the organs of speech. But as the human race began to emerge from the long, dark night which so sadly retarded and beclouded the intellect and reasoning faculties during the period known as the "dark ages," a rational opinion began to take the place of a superstitious dogma, and it is now a well-established fact among the enlightened of both hemispheres, that the organs of speech in a very large majority of the deaf and dumb are entirely perfect. In a few rare cases they may be found impaired or wholly paralyzed; but in the few cases of persons afflicted with impaired or paralytic vocal organs, it rarely happens that they are likewise deaf. The only case of total dumbness alone ever connected with this Institution, was the case of a young lady who was utterly incapable of uttering a sound, but whose faculty of hearing was perfect. The organs of vocality, primitively, are as perfect in the deaf and dumb as they are in the cases of the most eloquent public orator or voluble spinster in the country. The power of intelligent utterance is simply latent, and when these silent organs are reached through the proper avenues and set into intelligent action, the dumb will "speak plain" without the interposition of miraculous power.

It will be observed that I am approaching a subject which occupied a large share of my former report, viz., the subject of articulation. It is unnecessary for me now to dwell upon this subject at length. The facts presented in my former report, and the result of my feeble and imperfect efforts in that department of instruction, I think are conclusive to all who have given any consideration to the subject, that the dumb, or some of them, may be taught to talk. In my former report I reserved my opinion as to the comparative merits of the two systems of teaching, by signs or by articulation, presenting in extenso the opinions of others. I am still unable to decide between the merits of the two systems, owing to the very imperfect and unsatisfactory test I have been able to give to the articulation method. The subject, when presented, was so entirely novel to

the Trustees that they were not sufficiently impressed with its importance to second my application for an appropriation for a special teacher of this method; but precedent to a positive committal to what might be only a visionary measure, they desired that I would personally test the practicability of the system. This I have done, not sufficiently to satisfy me that it is the preferable method, but to establish conclusively to myself, and I hope to the Trustees, that no school for the deaf and dumb is fully organized until the means and facilities for teaching articulation are supplied. There are in this Institution several pupils whom it seems almost criminal to teach by the medium of signs alone. In behalf of these and many others, I renew my appeal for a teacher of articulation, entertaining a lively hope that all doubts of its pertinency are fully dispelled.

THE INDUSTRIAL DEPARTMENT.

The wisdom of the Legislature in providing the means for the organization of this department, is fully vindicated.

To provide for our deaf-mute population the means of free education, free board, free lodging, free washing, free mending, free text-books, free medical attendance, and, when necessary, free clothes and free transportation to and from school, should relieve our State from a charge of stinted benevolence; but when it has superadded to all these gratuities, a free trade, its public benevolence is certainly complete beyond the power of cavil.

The pupils who now complete a full course of instruction at this Institution, may go forth into the world, not only fitted for society by education and general information, utilized by a ready use of the pen and pencil, but able to encounter the sterner realities of life, and hew out for themselves a livelihood and a fortune. Their knowledge of handicraft, acquired here, should render them measurably independent of relatives and friends, and relieve the public of any further expense for their support. That they will be self-supporting is evidenced by the deep interest they manifest, and the rapid progress they make in acquiring The remarkable proficiency of the pupils of the Industrial Department, in all its branches, is one of the cheering Everything connected with the features of the Institution. Department is encouraging, and has more than met the expectations of its most sanguine advocates and friends. One of the

happiest reflections associated with the addition of a trade to the usual course of study is, that it provides pupils with the means of obtaining a livelihood; and this extra boon will be supplied, at no very remote period, without any increased cost to the State, for the yearly support of the Institution. The shops, when thoroughly organized and equipped, will not only be self-sustaining, but productive of a small revenue to the State. This is the experience of older institutions. Why may it not be of ours?

We present below a financial exhibit of the three branches of industry pursued at this Institution, since the organization of the trades department.

FIRST-SHOEMAKING-CHARLES H. HYER, FOREMAN.

EXPENDITURES.		
For tools and stock	\$998	80
For salary of foreman	402	00
Total	\$1,400	80
RECKIPTS.		
For manufactured stock and repairs, cash	\$847	60
Outstanding accounts, good	48	28
Outstanding accounts, doubtful	41	20
Manufactured stock, valued at	215	00
Total	\$1,152	08

It will be observed that if this branch had ready sale for all its manufactured stock, and realized the cash on all its sales, it would have nearly paid its way.

SECOND-PRINTING-EDWARD WINTHROP BOWLES, FOREMAN.

1	expenditures.			
For press and materials		\$64 3	85	
Total cost of paper		102	05	
		842	33	
Total		\$1,087	78	
Cash on subscription	RECEIPTS.	\$47	ro.	

The printing office, with its present meager variety of type and materials, is only fitted for printing our little paper and teaching the pupils plain type-setting. It is hoped that at an early day this office will be supplied with such an assortment of type and job materials as will enable the foreman to instruct his class in all the various branches of printing. When these facilities are provided, the receipts of that office will be more respectable, and when its facilities are so enlarged so as to enable it to print our own Institution reports, and other similar public work, the receipts will then begin to rival or excel the expenditures.

THIRD-SEWING-MISS TILLIE SARCHET, TEACHER.

EXPENDITURES.	\$55	
For sewing machine		
For cloths and other stock	640	97
For salary of teacher		00
Total	\$1,004	06
RECEIPTS.		
From pupils, cash	\$24	. 86
Outstanding accounts	29	76
Manufactured stock on hand	387	95
Total	\$443	57

This branch may approximate self-support when it is relieved from the gratuitous task, or can realize pay for, the *interminable* mending which constitutes about half the labor of the class.

In conclusion on this subject, I would respectfully recommend the organization of another branch of industry at this Institution, viz., cabinet-making. The establishment of this branch may be made self-sustaining from the start; and for the incoming year, before a special appropriation is made in its behalf, other specific appropriations need not be encroached upon, nor the usual expenditures abridged, to support this valuable addition to the trades-learning department. By supplying this addition, we will be able to meet a want which has been felt since the inauguration of trades in the Institution, viz., affording the boys, to a limited extent, an opportunity to acquire the trades of their choice. Many have commenced the shoemaking or printing trades reluctantly, because there were no others authorized — their preference being to learn a trade involving working in wood.

Woodcraft is a favorite occupation with boys. By the adoption of this trade, we will be able to satisfy the wishes of pupils to a great extent, and I think can annually abridge the recurring costs for repairs and furniture.

INDIFFERENCE—TARDINESS—ABSENTEEISM.

The State has literally undertaken the paternity of its deafmute population of school age. It offers to board, clothe, educate, and furnish them pocket-money. It proposes virtually to relieve their parents of the trouble and expense of their care and maintenance during nearly half their minority. It seems, therefore, wholly incredible that there should be any persons so insensible to the wants of defective offspring, not to say indifferent to their own material interests, as to neglect to avail themselves to the fullest extent of the rare benefits guaranteed by the State's generous hospitality. But it is a lamentable fact that there are in this community, as in every other, many such examples of human stupidity. The friends of deaf-mute education have two causes of complaint. One is indifference of the parents of the deaf and dumb about sending their unfortunate children to school at all, and the other is their failure to send them to school promptly and regularly after they have been admitted. These are grave evils, and to discover the proper remedy will elicit careful thought and study. The subject of compulsory education has for several years received the attention of the State. municipal and district officials connected with the public school system of the country. If there are any schools wherein this measure would seem justifiable, these are certainly the State schools for the deaf and dumb. The extraordinary provisions made for the education of this class, the imperative necessity of an education to fit them for human intercourse, and the inhumanity of withholding it, are circumstances which would divest such a law of all its alleged undemocratic features. The first of the above-named evils we are in no condition to remedy now. I have before stated that there are as many legitimate pupils out of school as in, and there are as many in as can be accommodated. Hence, all moral and legal enforcements will have to be held in reserve against those not already enrolled as pupils, until more accommodations are provided. means may now, and certainly should, be adopted to enforce the prompt and regular attendance of such as we can accommodate.

The first day of the yearly term is the second Wednesday of September. Usually, about one-half of the pupils arrive on that day. The remainder will arrive, a part every month, until the close of the year, before the yearly complement is fairly enrolled. At Christmas, a dozen or more are sent for to spend the holidays at home. These remain at home from one to four weeks; and, occasionally, one or two have failed to return during the balance of the session. Each session shows an absence of about twenty, who were present at the previous session, and are still entitled to further school privileges. If the cause of this absence is inquired into, in nineteen cases of the twenty the reason assigned will be hard times, failure of crops, loss of stock, or some such Providential deprivation of the means to supply a

clothing outfit and pay traveling expenses. The annoyance of these irregularities to officers and teachers, and the lasting injury to pupils, must be apparent to everybody. How shall we prevent them? I hope the day is not remote when every qualified mute in the State will be provided with suitable school accommodations, and when it may be in the power of the Trustees and officers, by the force of precept or otherwise, to enforce a general, prompt and regular attendance. I have little hope of any decided diminution in the irregularities complained of, during the continuance of our present limited accommodations.

IN GENERAL.

Overlooking the chief executive officer resident in the Institution, the people of the State have cause of congratulation that this important agency in the betterment of defective humanity is in such faithful hands. The ill-health of the writer during much of the past year has materially interfered with his supervising duties. A part of the time the administration has consisted mainly in a firm faith in the honor and fidelity of teachers, associate officers and employés. That this confidence has not in a single instance been misplaced, has been a source of no little happiness and consolation to the Superintendent during his long, weary months of suffering and pain; while at the same time it speaks volumes for these faithful public servants, and is a rebuke to the accustomed charge of "shirk" and "sinecure" preferred against those in the public service.

The progress made by the pupils in every department of study and industry has been highly encouraging, and will compare favorably with the results of any preceding year. The teachers, literary and industrial, need seek no higher compliment to their faithful labors than the accomplishments of their pupils.

The continued good health of pupils, and all connected with the Institution, again reasserts the avowed healthiness of this locality. During the months of January and February, 1877, we were visited by a measles epidemic. Forty-eight pupils were smitten with this disease, making a clean sweep of all on the rolls who had never been so afflicted. Fortunately there were no deaths. With this exception, no diseases of a serious or permanent character have appeared among us.

PERSONAL.

Since the last annual meeting of the Board, the hand of affliction has been laid heavily upon me. For many years I have been a sufferer from the effects of extreme exposure and privation, endured during four and a half years' service in the army.

In November last, my sufferings reached a stage which called for active and decisive measures to save life. By the courtesy of the Board, I went to St. Louis, Mo., and placed myself under the medical care of Drs. Hodgen and Mudd, the most eminent surgeons of that city, or in the West. After a careful examination of my case, they decided to subject me to a surgical operation for stone in the bladder. This operation they performed on the 29th day of November. And, now, when I look back to that critical period, and recall my intervening sufferings, I feelingly realize that only by the interposition of Omnipotent mercy am I able to make this recital to-day.

My recovery has been slow, but, I think, permanent; and I look forward with eager hope to that joyous day, when in the mercy of God, I may, with renewed strength, enter upon the thorough discharge of the duties of my accidental vocation with all the enthusiasm I have long unexpectedly felt, but have, during much of the time, lacked the physical strength to fully execute.

In conclusion, I desire to impress upon the Board, with all the emphasis I can command, my very great personal obligations to them, collectively and individually. For their uniform courtesy, their many kindnesses, and especially their great kindness, consideration and indulgence during my long sickness, words are impotent to express my heartfelt gratitude.

Hoping, in all the earnestness of a grateful heart, that your courtesies, gentlemen, may never prove to be pearls cast to swine, and invoking upon you God's choicest blessings,

I am, very respectfully,

Your obedient servant,

THEO. C. BOWLES, Superintendent.

KANSAS INSTITUTION FOR THE EDUCATION OF THE DEAF AND DUMB, OLATHE, June 30, 1878.

REPORT OF THE PHYSICIAN.

To the Board of Trustees of the Institution for the Deaf and Dumb at Olathe, Kansas:

Gentlemen: It is not only with pleasure, but with gratitude to the Giver of all Good, that I am able to note the fact that there have been no deaths in this Institution during the partial biennium just closed. This makes nearly six years the Institution has been under my medical care; and although we have occasionally been visited by severe attacks of sickness, and also an epidemic of measles in the months of January and February of last year, during which time there were forty-eight cases of well-marked rubeola, followed in quite a number of instances by pneumonia simplex and typhus pneumonia, yet the lives of all have been spared during the whole period of my medical attendance.

In the first half of the term just closed, we had a few cases of chills and fever. These cases, almost without exception, were contracted when the pupils were at home, during vacation. However, these recurrences of ague were nearly all of mild form, and gave way readily to treatment.

During the last quarter of the present school term the health, of all the pupils has been very good, considering the crowded condition of the Institution.

Respectfully submitted. C. G. McKINLEY, M. D.,

Attending Physician.

June 30, 1878.

APPENDIX.

# RULES

FOR THE GOVERNMENT OF THE KANSAS DEAF AND DUMB INSTITUTION.

## RESIDENT OFFICERS.

There shall be elected, by the Board of Trustees, at their quarterly meeting in June of each year, as follows: A Superintendent and Matron, teachers for the literary department, and instructors for the industrial departments.

#### SUPERINTENDENT.

The Superintendent shall be the chief executive officer of the Institution. He shall recommend all subordinate officers and teachers to the Board of Trustees for appointment, and fill all vacancies that may occur between the meetings of the Board, subject to the approval of the Trustees at their next meeting.

He shall assign to all subordinate officers, teachers and employes their specific duties, and direct them in the performance of the same.

He shall prescribe the course and methods of instruction in the several departments; the time to be devoted by the teachers and pupils to the different studies, occupations and exercises, the books, apparatus and other appliances to be used; the system of discipline to be used in governing the pupils, and everything of a like nature in the management of the Institution.

It shall be his duty to make frequent visits to the various classrooms during the hours of instruction, and to the shops and workrooms during the hours of labor; to keep himself thoroughly informed in reference to the development and progress of the pupils, and to make such suggestions to the officers, teachers and employés as the best interest of the Institution may demand.

He shall make or direct all authorized purchases of supplies, of whatever kind, for the use of the Institution, unless otherwise ordered by the Board of Trustees, and certify to the correctness of all bills before submitting them to be audited by the Board.

He shall charge himself with all the property belonging to the

Institution, and see that it is kept in good order and repair; and shall charge himself with all the supplies which shall be received, and shall account for the same to the Board at each quarterly meeting.

He shall keep an inventory of all the furniture and household goods of the Institution, and an account of the additions thereto and alterations made therein from time to time, in a book to be laid before the Board whenever required.

He shall report to the Board such things as may be wanting, and shall take care that articles of every description in his charge, when worn out or rendered unfit for use, are returned into the store and accounted for.

He shall keep his account books and vouchers always in his office, ready for inspection at any time by the Board, and shall keep correct and methodical accounts of all purchases and expenditures; and he shall also keep clear, methodical and exact accounts of all expenditures during every month, in a book provided for this purpose, showing at the termination of each quarter the outlay for every article used, and the aggregate for all, and exhibit the same to the Board at each quarterly meeting, and at the annual meeting make a consolidated report of the same.

He shall take a receipt for all payments for supplies or labor that shall exceed the sum of one dollar.

He shall, at each quarterly meeting of the Board, exhibit, as much in detail as possible, an estimate of the supplies required before the next ensuing meeting.

He shall take an account of the clothing of all the pupils when they enter and leave the Institution, and shall keep an account of clothing and other supplies issued to indigent pupils, and present a roll thereof, receipted by the pupils to whom issues have been made, to the Board at each quarterly meeting.

'He shall keep a register of all the pupils received into the Institution, embracing their names and ages, the names, relationship before marriage, if any, and residence of their parents or guardian; the cause and degree of their disability, the date of admission and discharge, and the attainments of each at their admission and discharge; and such other information as may be deemed valuable to the Institution.

# POLICE - DISCIPLINE.

He shall, through the chiefs of sections or departments, enforce the usual sanitary regulations in regard to bathing, combing, changing of apparel, and exercise; shall see that the pupils are properly clothed; that they indulge in no injurious practices; that their dormitories and bedding are clean, comfortable, and not overcrowded; and in case of sickness, that they have prompt medical treatment.

He shall keep the sexes separate, except in the presence of the officers and teachers, for purposes of instruction or recreation; and shall, immediately after the retiring hour, see that the pupils are in their rooms, and that the doors of their dormitories are securely fastened.

All persons connected with the Institution, excepting those actually engaged in the discharge of their duties as servants, or pupils charged with household duties, will procure permission before entering the kitchen or basement, except at meal time.

All teachers and pupils are required to be present at chapel service every morning and evening, and also at Sunday service, unless excused by the Superintendent.

The lending of wearing apparel by the pupils to each other, without permission being first procured, is strictly forbidden.

All subordinate officers and teachers shall be subject to the advice and direction of the Superintendent in the discharge of their respective obligations; and it shall be their duty to consult him in a frank, courteous and unreserved manner, in all that pertains to their respective departments.

Each officer and teacher shall be responsible for the conduct of the pupils while under their particular charge, and it shall be their duty to aid the Superintendent in preserving order; and they shall report any infraction of the rules or disorderly conduct to him at the first opportunity.

All persons boarding in the Institution will be required to be in their rooms at the hour for retiring, and at the hour specified by the Superintendent, promptly extinguish their lights.

Pupils boarding at the Institution are required to procure a leave-of-absence from the Superintendent, or officer in charge, before going beyond the grounds or into the gardens of the Institution.

# RULES FOR THE ADMISSION OF PUPILS.

I. Applicants should not be under ten nor over twenty-one years of age. Children possessing weak constitutions, or who have failed to attain the ordinary growth and vigor of mind and body, should not be brought to the Institution under twelve years of age.

II. The annual session commences on the second Wednesday of September, and continues till the second Wednesday in June. The proper time for admitting pupils is at the opening of the session, and punctuality is so important that none will be received, except in extraordinary cases, who do not come at or about that time.

III. The length of the course of instruction is six years. At the end of six years, the Superintendent may select such pupils as he may consider would be particularly benefited by continuing longer at school; and if approved by the Board of Trustees, they shall be permitted to remain two additional years. In cases of extreme orphanage, the Board of Trustees may have discretionary power to extend the time to such a period as in their judgment they may think proper.

IV. All the scholars will be required to labor a portion of each day—the girls in performing the lighter kinds of housework, and various kinds of needle-work, as plain sewing, ornamental works, dresmaking or millinery, etc.; and the boys at various trades, the necessary work about the Institution, and the cultivation of the farm and garden.

V. Pupils from Kansas are admitted to all the privileges of the Institution free of charge, being provided with board, washing, fuel, lights, tuition, books, and everything necessary, except clothing and traveling expenses.

VI. Each pupil should come with sufficient clothing to last one year, or with money to procure it. He should also have a good trunk, with a good lock and key, and large enough to contain all his clothing; each article of which should be distinctly marked with his name.

VII. In addition to the above outfit, a small sum of money should be deposited with the Superintendent, to meet incidental expenses—repairs of shoes, postage, etc.—any part of which remaining on hand at the close of the session shall be returned.

VIII. Except in cases of sickness, all pupils are expected to

remain at the Institution from the commencement to the close of each session, at which time parents or friends should be prepared to take them home to spend the vacation.

The Superintendent shall have authority to admit applicants who come within the prescribed rules, but shall refer all other cases to the Board.

Pupils may be suspended and returned to their homes by the Superintendent, when in his judgment it is necessary to maintain discipline or promote the health of the Institution; but his action in all cases of suspension must be reported to the Board for final adjustment, at their next meeting.

# VISITORS.

Persons bringing pupils to the Institution, or visiting them or their teachers while there, cannot be provided with board and lodging in the Institution during their stay.

# QUESTIONS TO BE ANSWERED IN THE CASE OF EACH PUPIL.

All persons desirous of sending pupils to this Institution, before doing so will please answer the following questions, viz.:

- 1. What is the full name of the pupil proposed?
- 2. What is the date and place of his or her birth? (Give day, month, year, and town, county, State or country.)
- 3. What is his or her post-office address? (Give town, county and State.
- 4. What are the full names of his or her parents, and what is their post-office address? (If either parent is dead, state which one; if both are dead, so state.)
- 5. If both parents are dead, what are the full names and postoffice address of his or her legal guardian, relatives, or other person on whom he or she is dependent for support?
- 6. What are the full names of his or her brothers and sisters? (Give in the order of their birth.)
  - 7. Was he or she born deaf?
- 8. If not born deaf, give the date and cause of deafness. (Be particular in this answer.)
  - 9. Is his or her deafness total, or only partial?
- 10. What medical treatment has he or she received for deafness, and what has been the effect?
  - 11. Is his or her deafness now deemed incurable?
- 12. What other members of his or her immediate family, or family connections, are deaf? (Give names in full and residence, with date and cause of deafness.)
- 13. What is his or her mental capacity? (Whether bright and active or dull and inert.)
  - 14. Has he or she any bodily infirmity? (If so, describe it.)
- 15. Has he or she had any of the following diseases, viz.: Small-pox, scarlet fever, measles, mumps, or whooping-cough?
  - 16. Has he or she been vaccinated?
  - 17. What are his or her peculiar habits?

- 18. Were his or her parents related before their marriage? If so, in what degree?
- 19. What are his or her pecuniary circumstances? (Whether indigent, easy or affluent.)
- 20. What other deaf-mute institutions has he or she attended, if any, and to what extent?

# TRUSTEES' REPORT.

OFFICE OF BOARD OF TRUSTEES KANSAS STATE INSANE ASYLUM, OSAWATOMIE, KANSAS, August 23, 1878.

To His Excellency GEO. T. ANTHONY, Governor of Kansas:

SIR: In obedience to law, we respectfully submit the report of the condition of the Kansas State Insane Asylum for the biennial period ending June 30th, 1878.

On the 1st day of April, 1877, Messrs. E. Knowles and J. L. Wever, M.D., were duly qualified as members of the Board of Trustees, vice J. P. Bauserman and W. B. Slosson, whose official term expired on that day. The Board reorganized by the election of Thos. T. Taylor, President; J. H. Smith, Secretary; and J. T. Lanter, Treasurer. Hon. E. Knowles was elected Commissioner of the Topeka Insane Asylum, vice Bauserman.

On the 4th day of April, 1878, Messrs. C. E. Faulkner and A. T. Sharpe were duly qualified as members of the Board, vice J. H. Smith and J. T. Lanter, whose official term had expired on the 1st day of April. The Board reorganized by electing Hon. E. Knowles, President; C. E. Faulkner, Secretary; and A. T. Sharpe, Treasurer. Hon. J. L. Wever was elected Commissioner of the Topeka Insane Asylum, vice J. H. Smith.

There have been in the history of this, as in each of the other charitable institutions of the State, three eras. The first began with the enactment of the law creating the institution and the organization of the first board of trustees, May 13th, 1865, and continued until March 31st, 1873, during which period the board of trustees was composed of three members, who received "as compensation three dollars per day, for each day necessarily employed, to be paid out of the State treasury."

The second era began with the enactment of the law of 1873, which provided for the appointment of three boards of six trustees each, "not more than two of whom shall be appointed from one county," under which a part of each board was appointed

from the counties in which the respective institutions are located. In addition to per diem as above, it was provided that they should receive "mileage at the rate of ten cents per mile for actual distance traveled by the most practicable and direct route." This continued in force until March 31st, 1876.

The third began with April 1st, 1876, under the law enacted March 4th, 1876. The object of this law was to prevent jeal-ousies and rivalries, or combinations between the respective institutions, and to elevate them to the position of State institutions, as well as to give a uniform direction to their management. Under this law the Board of Trustees was reduced to five members, none of whom could be appointed from the county in which either of the institutions is located.

It has been the object of the Board now intrusted with the management of these institutions, to consider the demands of each from the standpoint of impartial citizens, whose duty it is to promote the efficiency of all, so that the benefactions of the State may be extended to every unfortunate possible, at the minimum cost; and it affords us much gratification to add that the conclusion expressed by the Board in their report for the fiscal year ending November 30th, 1876, and confirmed by your Excellency in your message of January, 1877, that the present system is more economical than that which preceded it, has been fully sustained by all subsequent experience.

On the 1st of March, 1877, Dr. A. H. Knapp unconditionally resigned the position of Superintendent, and Dr. T. Bailey West was appointed to fill the vacancy pro tempore. It was determined to be of the highest importance to secure a physician as Superintendent who had made the study of insanity a life-work. Consequently, the Board opened a correspondence with the most distinguished specialists in this department of the profession in the United States. After a prolonged effort, it was ascertained to be impossible to secure the service of an acceptable person in this manner. An objection was made to the salary in the beginning of almost every correspondence, it being urged that it was inadequate to the service and responsibility, and smaller than the salary paid to first assistants in first-class institutions. Finally the Board was compelled to abandon this method, and to detail one of their number, Dr. J. L. Wever, to visit certain parties and select an officer. Dr. A. P. Tenney, who had filled the position

of assistant physician at the Boston Lunatic Asylum, Mass., two years, and the office of first assistant physician at the Jackson-ville Insane Asylum, Ill., five years, and who was recommended in very strong terms by his late superiors and associate officers, was selected as Superintendent. He accepted, and entered upon the discharge of the duties of his office in October, 1877.

The Trustees desire to express their thanks to T. B. West, M. D., for his noble response to their request for his services in their hour of need, and for the able and efficient manner in which he discharged the duties of the office to which he had been so unexpectedly called, during the interregnum.

The Legislature of 1877 having provided for the employment of an assistant physician at the beginning of the fiscal year, Dr. C. A. Hayes was elected to that position, and accepted the same. Before entering upon duty, he spent some time in an Eastern asylum.

From the opening of the Asylum to the public, in 1866, to the close of the year ending June 30th, 1878, 735 persons have been received and treated, of whom 230 still remain. The increase in insanity has kept pace with our population, and now finds the State unable to provide accommodations for the whole insane population. We invite your attention to the report of the Superintendent, in which the impolicy of this practice is made apparent.

At the close of November, 1876, the number of patients remaining in the Asylum was 155. Whole number of applications since that date to the end of the last fiscal year, 332; number admitted, 205—leaving 127 to languish in the jails, poor-houses and private families of our State. To provide for the insane convicts, under the law, as well as to make room for recent cases, it was ordered by the Trustees that the chronic insane be discharged as fast as necessary to make room for the admission of the classes designated; consequently the number of rejected cases has been reinforced by the number of chronic cases, thirty-seven, discharged under said order. This makes, at the present time, 164 unfortunates known to our records, who are denied and excluded from the benefactions of the State-Calculation and argument, to show the necessity for increased accommodations for the insane, would be a work of supereroga-

tion. It exists now—to-day! Humanity cries aloud in their behalf!

In view of this, we respectfully recommend that the following appropriations be made for the extension of the State Insane Asylum, at Osawatomie:

Building west wing, as per plan	\$61,823
Building connecting corridor	5,060
Building fan tower and ducts	1,895
Building chapel, laying floors, and inclosing same	2,627
Building boiler house, laundry, shops, bakery, and completing unfinished part	
of present building	86,180
Plastering in present incomplete building	2,400
Completing present kitchen department and dormitories	2,800
Additional sewerage	1,500
Tanks, and plumbing new wards	8,800
Steam fixtures	8,500
One 12-horse-power engine and shafting, for shops and laundry	950
Fixtures for additional ventilators, setting face and arranging corridors	1,200
Changing and enlarging old east wing	9,500
Additional heating	2,500
Additional plumbing	1,500
Enlarging gas works, and additional pipe in buildings	1,900
Completing basement and corridors of present central building	1,000
Fixtures and machinery for laundry	1,800
Barn and shelter for stock	8,000
Total	\$149,285

These estimates have been carefully made, and should not be reduced. We respectfully recommend that the amount asked for be appropriated in an aggregate sum, to construct and improve the buildings named, in order to save the necessity of transferring the excess from any item to supply a possible deficiency in any other item. It is due to the Board, who will be charged with the appropriation, that this shall be done that they may not at any time be placed in the position of violators of the law for misappropriating or diverting public money from one fund or purpose to another—that the object of the law may not be defeated.

It affords us pleasure to be able to return, or to permit to be covered back into the treasury, the undrawn balance of the appropriation for the year ending June 30th, 1878, as follows:

Care and maintenance	\$8,206	62
Patients' clothing		
Books, newspapers and postage	71	22
Returning patients home		97
Bedding, furniture and furnishing		12
Wages of employés		54
Total unexpended	25,277	96

This surplus was accumulated in part by the reduction in the cost of subsistence, etc., and in part from the fact that the number of inmates, attendants, etc., upon which the estimate was based, have not been received and maintained at the Asylum during the year.

It is impossible for us, this year, to give the cost of care and maintenance per capita, as we have been compelled to include many items not properly belonging to this head under it, and to transfer from the excess therein to supply the deficiency in the appropriation for fuel, etc. We are aware that this is a violation of the letter of the law making the appropriation, and a technical misappropriation; but we believe it is in accordance with its true spirit, and it presented itself as the least of two evils, viz.: To pledge the credit of the State, which the law forbade, and purchase fuel on long time, or to make a transfer of funds and buy for cash. We make this plain statement, that the Legislature may see the necessity of appropriating the full amount of the estimates submitted by the Board, or of adding a proviso to the law authorizing them to transfer an excess from one fund to supply a deficiency in another.

Although the Steward, under the system of accounts which prevailed prior to March last, has been repeatedly complimented by legislative committees, it was deemed wise, on account of his greatly increased responsibility, inasmuch as there were no absolute checks therein to prevent loss from any cause, to change the entire method, which was done at an expense, in books of account and blanks, of \$243.25. The duties devolving upon the Steward's clerk, under the present regulations, are considerably increased, and the old clerk, who was not skilled therein, was discharged. and a new one was appointed, who is paid a monthly salary of \$20 in excess of the appropriation, out of the unexpended balance in the hands of the Treasurer, as will be seen by reference to his report. This change was made after a full consultation with your Excellency, and with your knowledge and agreement. Thus far it has worked admirably. Under it the subsistence stores and other property are issued on requisition daily to the housekeeper and other parties chargeable therewith, and reported by the Steward to the clerk, who immediately credits the Steward with the amount issued, and charges the same to the party to whom the issue is made, who is responsible for the loss or destruction thereof, unless the loss shall be shown to have occurred without fault or negligence, or unless they have been properly expended. The daily receipts and issues are tabulated, and show the officers the exact stock on hand at the close of each morning. No property worn out or destroyed is dropped from the property account until condemned by a board of survey, appointed by the superintendent quarterly.

The unexpended balance to which reference has been made, was derived from the surplus remaining in the hands of the Treasurer of the Board, from collections made from counties and from patients under the law prior to March 11th, 1874, from private patients subsequent to that date, until the statute which went into effect March 14th, 1877, from the savings accumulated by the institution, and from the sales of boxes, barrels, hogs, etc. Under the law creating the institution, the Treasurer of the Board was the custodian of these moneys, which the same statute provided should "be expended under the direction of said Board of Trustees." Heretofore, when money was received from such sources, it was designated as "current expense fund." from which, when buildings or improvements were in progress, it was transferred to the "building fund," and was expended in adding to our hospital accommodations, etc., as will be seen by reference to former reports of the Board. This has constantly supplied a fund out of which to defray expenses for advertising for proposals, for architect, and other miscellaneous expenses, such as those mentioned in the Treasurer's report under the title "unexpended balance," without drawing on the appropriation to maintain the wards of the State. Since the 1st of March last, it has been designated as an "unexpended balance."

We heartily indorse the remarks made by the Superintendent as to insane convicts, and respectfully recommend the repeal of section 7, chapter 101, of the laws of 1869. If, however, it shall be deemed unwise to repeal this law, we most earnestly urge that the law be amended so as to require an inquest of sanity to be held, and the same proceedings to be had as are now required to secure the admission of other patients, that all may be placed upon an equal footing. We further recommend, in this event, that the sum of \$10,000 be appropriated for the erection of a

cottage and court, in which the insane criminals may be treated apart from other patients, and securely kept, during their necessary residence at the Asylum.

It would also be found wise to appropriate a sum sufficient to erect one or more comfortable cheap cottages on the Asylum grounds, where all the chronic insane now confined in jails may be domiciled and treated. This would add to the comfort of this most unfortunate class, and would give them the benefit of skillful treatment, which might occasionally restore one to society. It would also reduce the expense of their care and maintenance at least one-third. This would enable the State to set apart the more expensive hospital buildings for the treatment of the recent cases who require separate rooms, etc.

The Board has adopted the following rule in regard to collections from pay patients:

"The Steward shall make out, each quarter, the accounts of all private patients, in duplicate. He shall make an abstract of said, accounts, showing name of patient, period charged for, and amount due; and the name and post-office address of the guardian or person responsible for the payment of said account. He shall mail said abstract to the Secretary, and deliver the duplicate accounts to the Treasurer, for collection. The Treasurer shall, upon the receipt of said accounts, immediately demand payment of the same; and upon payment of any account being made, he shall give duplicate receipts for the money paid. The guardian or person paying any account shall, immediately upon paying the same, forward the duplicate receipt to the Secretary of the Board of Trustees, at Osawatomie, Kansas."

A careful estimate for the fiscal year ending June 30, 1880, shows that a small increase on the preceding year in the amount of the appropriation will be required to insure the successful administration of the affairs of the Asylum. The Finance Committee of the Board and the Steward have made a careful estimate of the sum necessary, and have fixed the same at \$71,655; and should the wing for which an appropriation is asked be completed at the time contemplated, the increase in the number of patients, and the corresponding increase in the number of employés of the Asylum, will require \$100,935 for the fiscal year ending June 30, 1881—otherwise it should remain the same as for 1880. The following is an itemized statement of the appropriation required, viz.:

ON WHAT ACCOUNT.	1880.	1881.
Care and maintenance	\$26,850 00	\$38,500 0
Patiente' clothing	4,885 00	6,385 0
Material for manufacturing gas lights and fuel	5.000 00	6,000 0
Repair of wards, plumbing, and ordinary repairs	8,000 00	1,590 0
Books, papers, postage and stationery	1,000 00	800 0
Returning patients home	400 00	600 0
Farm, garden and barn	700 00	700 0
Bedding, furniture and furnishing	2,000 00	7.500 0
Salary of Superintendent	2,000 00	2.000 0
Salary of Assistant Superintendent	1,200 00	1,800 0
Salary of Assistant Superintendent		1,200 0
Salary of Steward	900 00	900 0
Salary of Dispensary Clerk	600 00	600 6
Salary of Book-keeper		900 0
Balary of Steward's Clerk		360 0
Balary of Housekeeper	860 00	360 0
Relary of Chanlein		200 0
Salary of Chaplain	960 00	980 0
Salary of Assistant Engineer	480 00	480 0
Salary of Night Fireman	860 00	360 0
Salary of Baker		600 0
Salary of Assistant Baker		360 6
Balary of two Ward Supervisors	840 00	840 0
Salary of two Night Watchmen	720 00	720 0
Salary of two Night Watermen	7, 200 00	12,960 0
Salary of two outside attendants in 1880 (three in 1881)	600 00	900 0
Salary of Chief Cook		600 0
Salary of Calef Cook		480 0
Salary of Assistant Cook	200 00	360 0
Salary of Second Assistant Cook	860 00	360 0
Salary of Gardener	360 00	
Salary of Farmer	240 00	240 6
Salary of Teamster	240 00	240 0
Salary of two Carpenters and Painters	720 00	720 9
Salary of two Seamstresses (three in 1881)	500 00	750 €
Salary of Tailor	420 00	429 0
Balary of Plasterer	360 00	366 (
Salary of Roustabout (two in 1881)	800 00	600 0
Salary of two Housemaids	400 00	400 0
Salary of two Chambermaids		384 0
Salary of six Laundresses	1,586 00	1,536 0
Salary of one Laundryman	300 00	300 €
Contingent fund	1,000 00	1,000 €
Total amount of appropriations	\$71,655 00	\$100,985

Your attention is respectfully directed to the report of the Superintendent. We indorse its suggestions, and commend them to your favorable consideration.

We also transmit the report of the Steward, which exhibits in detail the transactions of the institution for the period embraced in this report. It is full and explicit in its statement.

For a statement of the financial operations of the Asylum, you are respectfully referred to the report of the Treasurer of the Board, which is herewith transmitted.

The report of the Chaplain is also respectfully forwarded, for your consideration.

Herewith we also transmit the report of the Commissioners of the Topeka Insane Asylum. It will be seen from this, that the said asylum is about ready to be placed in the hands of the Trustees. It therefore becomes our duty to call attention to a necessary work, in order to make it serviceable to the State. When furnished, it will provide one hundred beds for patients. It should be furnished at the earliest possible moment, that the number who are monthly drifting into the ranks of the chronic insane, from lack of treatment, may be diminished without delay. Tables Nos. 2 and 3, attached to the Superintendent's report, show the diverse effects of promptness and tardiness in the treatment of our insane population, and warrant us in urging that the utmost dispatch should be used in preparing the Asylum for the reception of patients. The following is an estimate of the furniture, supplies, etc., required to place the institution in running order:

ON WHAT ACCOUNT.	1879.		1880.	1881.
Furniture and bedding	\$10,000			
Material for manufacturing gas	200		\$800 00	\$800 0
Gas apparatus	2,500			
Medicines, liquors and instruments	800		500 00	500 0
Care and maintenance	8,294		18,175 00	18,175 0
Patients' clothing			2,000 00	2,000 0
Fuel	800		8,500 00	8,500 0
Repair of wards	50	00	250 00	250 0
Books, papers, postage and stationery	150	00	500 00	500 0
Returning patients homeFarm, garden and barn	***************************************	• • • • • • • • • • • • • • • • • • • •	100 00	100 0
Farm, garden and barn	75	00	200 00	200 0

Farming implements			***************************************	
Total amount of appropriations	\$22,268	75 -	\$88,624 00	\$88,624 0

We feel it incumbent upon us to again call attention to the question of fire-escapes. Each ward has two stairways leading therefrom; but it is not improbable that, should a fire occur in either asylum, egress through the stairways might be cut off, as they are all within the buildings. This would doubtless occasion considerable loss of life. To provide a further means of escape, we earnestly recommend an appropriation to construct iron or stone fire-proof towers on the outside of the buildings, into which doors shall open outward from each ward.

It is also our duty to call attention to the number of insane now confined in the jails. From March 10, 1877, to April 1, 1878, the State paid to the respective counties, in which "destitute insane" were confined, \$15,000; an average of \$1,185 per month. This discloses the fact that up to that date 78 destitute insane persons, almost fifty per cent. of the number known to our records as outside of the asylums, had been maintained weekly in the jails and poor-houses of our counties. During the fiscal year ending June 30, 1879, this number will be increased about 250, the number who will become insane during the year; making a total of 644 as the insane population of the State for the year.

The State Insane Asylum already shelters 230, of whom 90 will be discharged, by restoration to health and by death, during The Topeka Asylum will furnish beds for 100 more, which will leave 224 outside of our Asylum, about 122 of whom will doubtless belong to the "destitute insane," and will have to be provided for by the counties at the expense of the State. The increase during the fiscal year ending June 30, 1880, will be about 266; which, added to the number unprovided for by the State, 224, gives 490 as the total insane population which will then be excluded from the asylums. The completion of the west wing of the State Asylum, for which an appropriation is herein asked, will add two hundred beds to our hospital capacity, and the vacancies made by cures and deaths in our present hospitals during the year will make room for 132 additional patients, which will leave 158 unprovided for, fifty per cent. of whom will have to be maintained at the expense of the State. For the fiscal year ending June 30, 1881, the increase will be 275; the number unprovided for, 158: total, 433. The cures will be increased by reason of the improved classification, etc., which will then have been made, and, with the number of deaths, would leave 238 vacant beds, which will still exclude 195 from the asylums, fifty per cent. of whom will doubtless be destitute. Therefore we respectfully ask that the following sums be appropriated: For the year ending June 30, 1879, \$22,204; for the fiscal year ending June 30, 1880, \$14,366; for the fiscal year ending June 30, 1881, \$17,715.96—to pay for the maintenance of the "destitute insane," by the respective counties, under the law of 1876.

Respectfully submitted.

(Signed)

E. KNOWLES.

# COMMISSIONERS' REPORT.

To the Board of Trustees of State Charitable Institutions of the State of Kansas:

GENTLEMEN: The undersigned, Board of Commissioners for the building of the Insane Asylum at Topeka, Kansas, beg leave to submit the following report:

On the 3d of April, 1877, Edwin Knowles having been elected by your body as one of this Board of Commissioners, and having duly qualified as such, the Board proceeded to organize by the election of Edwin Knowles as President, and J. H. Smith as Secretary; and on the 4th day of April, 1878, your body having elected J. L. Wever a member of this Board, in place of J. H. Smith, whose term of office had expired, and he having duly qualified as such, the Board was reorganized by the election of Edwin Knowles as President, and Thos. T. Taylor as Secretary. After the organization in April, 1877, the Board employed E.T. Carr as architect and superintendent of construction for the building of the Topeka Insane Asylum, at a salary of \$150 per month from April 20, 1877, subject to a proper reduction during the winter, if work should stop—he to make all necessary drawings and working plans for the buildings, and be at all times present in person or by competent assistant during the progress of the work.

Under the direction of the Board, the Superintendent advertised for proposals for completing the two-story cottage, cross-section and connections, and building a three-story cottage, according to the plans and specifications on file. On the 9th day of May, 1877, bids received in response to such advertisement were opened, and contracts awarded as follows:

To Rosine & Langstrom, for stone and brick work for completing	
the two-story cottage and cross-section, and connections	\$3,420
To same parties, for stone and brick work, and excavations in	
building three-story cottage and cross-section	20,495
(14)	

On the 16th day of August, 1877, proposals having been previously advertised for, the Board opened the bids for steam heating and plumbing, and awarded contracts as follows: To Woodman & Warner, for steam heating, using two tubular boilers and Gould's radiators, for \$8,500; to the same parties, for plumbing, \$1,989. The plumbing contract did not include gas fitting, that being done in the two-story cottage by private contract, made by the Superintendent with Blake & Halm, at a cost of \$133.35; and in the three-story cottage, under a contract awarded upon the opening of bids, February 5th, 1878, to Smith & Hale, at 10 cents per foot, and costing \$203.60.

Proposals were also advertised for, for grading, laying sewerage pipes, temporary engine house and laundry rooms, and for two cisterns, of 1,200 barrels capacity each. Upon the opening of bids received in response to such advertisements, at the several times named therein, contracts were awarded as follows: On January 4th, 1878, to Michael Treha, for grading, \$900; on the same day, to Wm. Tweeddale, for laying sewerage pipes, at prices as follows: 12-inch, \$1 per foot; 9-inch, 90 cents per foot; 8-inch, 60 cents per foot; and 6-inch, 50 cents per foot — which made the total cost of such sewerage pipes, when laid, \$1,070.29.

On February 5th, a contract was awarded to Wm. H. Griffith, for temporary engine house and laundry rooms, for \$960, and on June 14th, to C. J. Rosine & Co., two cisterns of 1,200 barrels capacity each, for \$1,385.

The work under these several contracts has progressed favorably, and, with the exception of the cisterns, is nearly completed, and is expected to be entirely so by October 1st, 1878. The contractors for the main part of the work are capable, honorable and faithful men. The work has been carefully supervised by the Superintendent, and the buildings, when completed, cannot fail to satisfy the State in quality and price. Owing to the strong competition among bidders, the Board was enabled to let the several contracts at extremely low figures, and at the same time to the most faithful and competent men.

# Up to July 1st, 1878, the disbursements have been as follows:

ON WHAT ACCOUNT.	AMOUNT.	TOTAL
On account of two-story cottage and cross-section and connection:		
E. T. Carr, Superintendent	\$800 00	
I. A. McGonigle, contract	9,181 15	
Rosine & Langstrom, contract	3,592 80	\$13,573
On account of three-story cottage and cross-section:		410,010
E. T. Carr, Superintendent	\$150 00	
Rosine & Langstrom, contract	20,822 20	
. A. McGonigle, contract	13,512 13	
Ay of Commissioners	507 50 9 00	I
On account of fence:		84,500
, M. Harvey	\$121 75	•

Blake & Halm, gas pipe	67 12	
Advertisements		2,244
On account of temporary engine house:	****	
Villiam H. Griffith	\$960 00	960
On account of steam heating:		!
Woodman & Warner	\$7,763 16 800 00	
E. T. Carr, Superintendent		8,068
On account of severs:	4. 454 44	Ì
William Tweeddale, contract	\$1,070 29 109 20	!
· ·		1,179
On account of grading:	\$868 50	
Michael Treha, contract	18 00	
E. T. Carr, Superintendent	150 00	
		1,096
Total disbursements		\$61,680
Leaving the following balances on hand July:		
For two-story cottage	\$2	26 05 39 17
For plumbing	8.7	99 17 55 58
For temporary engine house		iõ <b>öö</b>
For heating apparatus	1,9	36 84
For tanks and water works	8,00	00 00
For sewers	1,85	20 51
For grading	17	53 50 78 25
<u>-</u>	\$14,81	0.85
There will be due contractors, on completion		
c.c will be the contractors, on combine	и от соп	wace,
Follows:		95
follows:		34 72
follows:	4.12	
follows:  Rosine & Langstrom	4,1	2 84
follows:  Rosine & Langstrom	1,89	92 84 81 50
follows:  Resine & Langstrom	1,89	2 84
Collows:  Rosine & Langstrom	1,89	92 84 81 50 85 00

Which will leave a balance on hand, after paying contractors, of \$6,874.84.

There is still unprovided for, under any contract, the laying of water pipes, water supply, engine for water power, and house for same, some additional sewerage, grading and plumbing, additional fencing, extra work done by contractors, and pay of Superintendent and Commissioners until the buildings are completed. A portion of this work is now in progress, and the Superintendent has been directed to make contracts for all of it. This will take the larger amount of the above-named balance on hand; but the Board will be able to complete the work designed by the Legislature without creating a deficiency, and with an unexpended balance left over.

The Board have continued J. M. Harvey in charge of the Asylum farm and grounds since their last report, finding him a valuable tenant, who looks closely to the interests of the State in all matters under his charge.

(Signed)

E. KNOWLES.
J. L. WEVER.
THOS. T. TAYLOR.

# SUPERINTENDENT'S REPORT.

# Trustees Kansas State Insane Asylum:

Gentlemen: I herewith present you the thirteenth report of this institution, and, according to the recent change of law, the first biennial report, covering a period of one year and seven months, from November 30th, 1876, to June 30th, 1878. At the first-mentioned date, one hundred and fifty-five patients were reported in the Asylum—eighty-four males, seventy-one females. Two hundred and five—one hundred and twenty males, eighty-five females—have been admitted since, making the whole number under treatment during the time mentioned, three hundred and sixty. Fifty-nine have been discharged restored, twenty improved, seventeen unimproved; three eloped; one was not insane; thirty have died;—leaving our present number two hundred and thirty.

The duration of insanity before admission, in two hundred and five cases, is given in Table No. 2. According to history given, eighty-one had been insane over two years, thirty-two between one and two years; making more than one-half the admissions chronic in character. By referring to the last report, it will be seen that forty of the seventy-five admissions had been insane over two years.

August 1st, 1877, we had one hundred and thirty-two patients the duration of whose insanity was over one year. At this time the order of your Board went into effect, that during the present crowded condition of the Asylum no more chronic cases be admitted. The Superintendent was also authorized to discharge chronic cases, to make room for more recent ones. In carrying out this provision, it has been the purpose to admit those for whom most could be done, and to send away those least likely to be benefited by remaining. All applications for admission (18)

Digitized by Google

since August 1st, for cases with insanity under one year's duration, have been granted, as also some violent and dangerous cases of longer duration.

The number discharged recovered is not comparatively large. The many chronic cases in the Asylum at the beginning of the period will account for this. By referring to table No. 3, you will observe that the number of recoveries is largest from those whose duration was shortest before admission. Thirty of the fiftynine recovered were insane less than six months before admission: nine between six and twelve months. Fifty-three of the recovered resided less than one year in the Asylum. It has been found, in regard to some of the cases in the table, where the duration is longest, that the term in the verdict, "dating from first symptoms," was applied to the time of a first attack, from which the patient had recovered; so that the correct duration is uncertain. That given is made up from the history as we find it. The earlier treatment in the Asylum is applied, the more probable is recovery—a law of results which should be more thoroughly understood and acted upon by friends who wait so anxiously to see if the object of their care will not recover at home.

Nineteen of the cases discharged improved were chronic, but some were so well as to take part in affairs at home, and be as much comfort as care. The unimproved were harmless and usually quiet—some in advanced dementia.

Two of the eloped were convict patients. One had been very insane, and was nearly recovered. The other had been but a short time in the Asylum, and had shown but little insanity. Both exhibited remarkable skill in their escape. They were traced into the thick forest southeast of the institution, since which time no tidings have been received respecting either of them

By table No. 6, showing causes of death, it will be seen that nearly one-third, or eight, of the number who died were epileptics of long standing, and seemed worn out with their disease. Ten died from exhaustion; four in acute mania, soon after admission; six from long-continued violent mania. The suicide was a chronic paroxysmal case, who had manifested no previous sign of self-destruction. Two died by violence at the hands of a fellow-patient—a convict under sentence, who had

been in the Asylum some months, and had exhibited no sign of violence; had always slept in the room with others. A noisy and excitable man, but one much reduced physically, was put in the room with him at night; was quieted by medicine, as had been usual. The night-watch, missing his noise near daylight, visited his room, and found him dead in his bed. No mark was found to indicate violence, and his death was attributed to natural causes. Three mornings later another man was found dead, with the same companion (the convict), but this time there was no mistaking the cause: finger-marks about the throat and face fixed suspicion at once, and confession was readily made by the Penitentiary patient, that he had "quieted" both men. A full investigation by coroner's jury established the facts in the case.

The escape of two convicts, and the double homicide committed by another, may suggest the question whether the law compelling the admission of the convict insane to the Asylum shall not be changed, and apartments provided for them in connection with the place of their sentence. Nothing is further from the design of this institution than to make it a prison. To give all possible freedom, and remove appearance of restraint, is desirable. Most frequently the insane prisoner is one under long sentence, and his possible escape is a temptation to feign insanity; or, however insane he may be, if he has mind enough, or recovers sufficiently to realize his possible or probable return to prison, he will watch opportunity, or make it, to escape.

It will be observed that the number of patients remaining in the Asylum at this date is seventy-five more than was reported November 30th, 1876. This is the number provided for by the new rooms in the wing extension to wards one and three, in the occupation of the old officers' quarters, and in the old chapel story. Our whole number, two hundred and thirty, is also the same upon which estimates were made for maintenance.

Let it be seen how this number is accommodated: We have eight wards, so divided as to give eighty single rooms and four-teen associate dormitories. These latter contain seventy beds, which gives, with the eighty single rooms, a capacity for one hundred and fifty patients. But forty-seven of the single rooms contain two beds each: so one hundred and ninety-seven insane are provided for. Our most disturbed male ward has but eight single rooms, and a room sixteen by eighteen, which contains five

beds, yet of necessity accommodates thirty-one patients. A ward in the same wing, of the same size, contains thirty-four patients. The ward made in the old chapel story has, aside from the attendants' room, but three sleeping rooms, which are literally filled by thirteen beds. Twelve patients sleep in the day-hall, in cots. The two wards of the center building are the least crowded, on account of having no single rooms, the smallest room in either containing four beds. All female patients from our whole number, whose habits make them suitable, are placed in one of these wards. The difficulty experienced at times in selecting patients from the more violent wards, who may be safely and agreeably associated, can be imagined.

The evils and dangers likely to result from thus associating so many patients readily suggest themselves. There is an advantage in having an associate room in each ward, where patients who prefer company, the suicidal, and those given to solitary indulgences, may room together; but the larger number are more comfortable and safe if given a single room. The sleepless, talkative, noisy, or sick patient, is no small annoyance to others in a room. The loss of sleep from such disturbance has often seriously retarded convalescence; while the newly-arrived or timid suffer from apprehension and fear, not knowing what impulse may seize their restless companions. Then, among so many, some are more or less dangerous. There are those given to sudden paroxysms of violence, as also the quiet, cool, but treacherous man, who makes no demonstration until it comes with fatal effect.

The difficulty of furnishing good air, particularly in the wards where patients are uncleanly in their habits, scarcely need be mentioned.

Notwithstanding the increased capacity of the Asylum, and the fact that we have, to-day, in our wards, two hundred and thirty patients, the knock at our doors and demand for admission is quite as loud and no less peremptory than ever. Three hundred and thirty-two applications for admission have been received—one hundred and thirty-seven in excess of the admissions. During the months of March, April, May and June, of this year, ninety formal applications were received. Admissions at the same rate would fill an asylum equal to this in one year. Applications have increased as the year has advanced. All new room

was occupied by the first of March of last year. The average number of applications for the succeeding four months was sixteen and one-half per month. For the same four months of 1878, the average per month was twenty-two and one-half—an increase of six per month in the year. The same rate of increase would give us three hundred and six applications by June 30. 1879, and six hundred and eighty-four applications for the two years. It is safe to predict that, with the present and prospective increase in population, the number will be over seven hundred in the next two years—divided it may be between the two asylums. So that, with increased room in this institution for one hundred and thirty more patients, and one hundred in the Topeka Asylum, a very large number, including the chronic cases, in the State will still beg for asylum care. It becomes painfully evident that even with a liberal appropriation for more room in connection with this institution, by the Legislature, this winter, we cannot be nearer caring for all the insane in the State in two years than we are to-day. It is clear that a strong effort will be required to keep pace with the absolute necessities of the case.

It is well known that the per cent. of recoveries in cases of insanity grow less as the period of the disease is lengthened before coming under hospital treatment; so we know that many of the insane for whom admission to this institution has been frequently sought in the years that are past, are now hopelessly lost to the world of reason. It was therefore a wise movement on the part of your Board, to open the way for the admission of recent cases. and a matter of congratulation that the newly-stricken family may look with hope of relief to this Asylum when the light of the home is darkened, the mind of a wife and mother, a husband. a son or daughter, hid as it were in the grave, yet present in fearful form. But while relief is given by the admission of all recent cases, it is only the silver lining of a dark cloud. It is painful in the extreme to send away the chronic case, although harmless and quiet, to meet the fearful possibilities incident to alms-house, jail, or pen of logs; for experience has shown, that however simple and easily cared for he may be, the very term lunatic or crazy, applied to any person in a neighborhood, creates a sense of fear that is warrant for any amount of precaution in the way of restraint. Where every motion is construed as one of possible violence, restraint is demanded, and this by close confinement. The person known and trusted to walk at will about the grounds of the Asylum, will not be tolerated to wander to the jeopardy of women and children. Closely confined, filthy, kept like a beast, a shocking blot of humanity, his varied fancies unwisely met, he grows worse and worse. Death may be hurried, but while he lives the effect of such a character, so kept, upon a community is debasing, and to the friends, if any live loyal to his name, humiliating. Therefore it is hard to send away the chronic insane, and it can be done only with the hope of saving the mind of another.

Enlightened public opinion has done away with many abuses to which the unfortunate class who have lost their reason were subject. Some of the counties of the State have made liberal and comfortable provision for the insane which they are obliged to care for.

It is believed by some to be a mutual advantage to mingle the chronic and recent cases of insanity, and it is also a settled policy in many of the States to provide asylum accommodation for all their insane. Kansas has nobly undertaken to care for all who are refused admission to the Asylum, having appropriated three dollars and fifty cents per week for their support in the counties where they reside. If asylum room were furnished, a less outlay per week would give more comfortable and far safer care than is possible in most cases in the counties.

It has been said by a writer of broad fame and ability, that "the peril of the present hour is bondage to uneducated and be-wildered opinion." But this State abounds in men of independent thought and clear ideas. We are therefore confident that in presenting the condition of the insane, and calling attention to their needs, this people will sustain all efforts honestly made for an object which appeals to every humane sensibility.

It would seem that the first step toward answering the cry for room, should be the erection of the west wing of this institution. This would give accommodation for one hundred and thirty additional patients; and if the basement story should in part be occupied as a ward, as it very well could be, twenty more, or one hundred and fifty additional patients, could be admitted. Relief to our present crowded wards could be given. We should have an opportunity for a better classification, and a more complete

separation of the sexes, than is now possible. Male and female wards in the same wing, where the windows of one section are exposed to the view of another, is a very serious objection to our present circumstances, as it is a strong reason for the construction of another wing. The additional number of patients could be as well cared for, with but little increase in the number of officers and employés, save additional attendants for the new wards. The same kitchen, laundry and bakery, and help in the same, required for our present necessities, would answer for the new wing. Our heating capacity is already sufficient for the additional room required; so that, with less comparative outlay for building, and less in maintenance, according to the number provided for, economy fayors this construction.

Our present boiler-house was erected three years ago—a rough shed, intended for only one season. It is now, in time of storm, an incomplete protection, and will not at all answer its purpose longer than this year.

The laundry, situated as it is in the basement under three wards, is only by the greatest care preserved from condemnation as a nuisance, on account of the natural tendency of steam and bad odors to rise through open doors, windows and flues. It is deficient in room, inconvenient, and has no place for the mechanical appliances so desirable to economize labor.

Our bakery has been a cause of considerable anxiety, situated as it is under the wards. The danger of fire from this source has often been called to your notice. The danger also from the paint shop and carpenters' shop, in our ward basement, is alarming when the horror of fire is thought of. The machine shop, and store-rooms for the same, also occupy this basement.

A separate building, large enough to conveniently arrange the foregoing departments, should be provided at once. It is a matter of prudence and precaution against dangerous elements that would meet the approval of every true business man. The building for this purpose, as planned heretofore, somewhat diminished in size, would be ample for the increased demand of the new west wing.

Some changes may be made in the arrangement of rooms in the extension of the east wing, by which more single rooms can be afforded, and the space better economized. The wing cannot be considered in permanent condition until these changes are made.

The corridors connecting the central building with the kitchen building, the basement, and considerable of the second story of the present rear building, are in an unfinished state. It is hoped that the Legislature will see fit to make an appropriation for completing the work on these buildings.

For the profit of our farm, as well as for the well-being of the stock, proper inclosures or sheds should be furnished. A good stock barn, with room for horses and cows, is greatly needed. A warm shelter saves much in feed during cold storms. In this the State should show as much wisdom as any private citizen.

Close confinement, as in cells of jails or prison, has often resulted in the development of insanity. The confinement of the insane in a room or ward of an asylum, without change, is not favorable to the recovery of their minds or the health of their bodies. In this institution, the more quiet patients are taken out to walk, or into the adjoining groves, for air and exercise. As many go out as it is thought possible to control. Surrounded as we are by inviting ravines and thick timber, it is not to be wondered at that many attempt to escape. The outlay of time and strength of man and beast, as well as money paid for patients' return, would be saved by suitable inclosures, where all the patients may be taken for air and exercise. There are always some of our number so much disturbed as to prevent their going out, who could be safely taken into an inclosed court. We need two such inclosures, one for each sex, of at least an acre in extent, so divided as to separate the most violent from the quiet and harmless.

How to divert, find occupation and amusement for the inmates of an insane asylum, is a subject to which the mind of a faithful attendant may ever turn. The naturally active child more often becomes fretful and unmanageable from want of something to do or somewhere to go, than from any other cause. What wonder, then, that the restless and excitable maniac, confined alone in his room, tears bed and clothes into shreds. Furnish him something to make into strings, and he will be more quiet until the work is done. He cannot sleep, and he must work. So, the less violent, left to his fancies, or the melancholy to his broodings, will grow worse, if the mind is not diverted from the unnatural way. All

persons have peculiarities, movements and expressions, so long their own that no purpose or education can fully overcome or change them. Habits are more readily changed in the child. So the fancies or delusions, the peculiarities which mark the insane, grow more firmly fixed as time goes on; hence the necessity of leading the mind to new thoughts and occupations. The mind may be so exalted or depressed, so numbed or shattered, that it is not apparently susceptible to ordinary impressions; but, in the right time and way, persevering effort will produce good results in many cases. Some look anxiously for a way of escape from the overhanging cloud or the troublesome phantom. They need papers, pictures, books, walks, rides, games, flowers and pets; they should have work with needle, crochet-hook, and the ordinary occupations of house, farm and shop—anything to occupy the mind, applied wisely, and not to weary.

The variety of means for drawing the attention of patients, and giving employment, cannot be too large. The number of papers subscribed for, and books purchased, should be larger than heretofore. In the way of music, we have almost nothing for our wards. Some of our patients are accustomed to the use of the piano; and were we supplied with that instrument, many otherwise troubled hours would be pleasantly passed. I would suggest that an appropriation be asked for two pianos.

The power in plants and flowers to divert and bring up pleasant thoughts is not always appreciated. The few which adorn our grounds are watched with delight by patients who seem interested in almost nothing else. Money expended in the cultivation and preservation of flowers is well spent. As many patients are employed about the domestic concerns of the institution as can be trusted or conveniently watched and directed. Others are engaged in out-door work. By frequent changes -- a few patients going out in the morning and others in the afternoona large number have some part in the labors of the garden or about the grounds. During the last spring considerable time was devoted to improving the grounds about the Asylumgrading, sodding, planting trees and shrubs, making beds for flowers, and new drives for front and rear entrances. Many so employed take a decided interest in the changes and improvements. By the employment of outside attendants, they may be engaged in this and other outside work to better advantage.

Our garden has produced an abundant supply of vegetables throughout the season. Considerable addition has been made to our small fruit by setting out new plants. Some timber has been cleared in the rich bottom lands, and our farm otherwise improved.

A very substantial improvement has been made in our system of records and accounts. A complete new set of books has been opened. H. P. Lytle, an expert book-keeper, was secured as clerk, and has proved every way efficient and reliable.

Situated as we are at a distance from any large town, we are obliged to depend upon home talent for evening entertainments. We are fortunate in having with us resources of considerable strength, which, with the willing mind uniformly manifested by the employés, have enabled us to afford some variety of amusement. We are under special obligation to our band, whose self-denying efforts have given us all so much pleasure. Through the liberality of Major Bowles, Superintendent of the Deaf and Dumb Asylum, we have been favored with the magic lantern and views of that institution, by the use of which we have had several very pleasant evenings.

Mr. John S. Pierson, of New York, who has at times before given liberally to this institution, has sent us recently a collection of bright and attractive chromos.

Mrs. J. Snyder, lately of Paola, made a valuable contribution to our library.

It has been a matter of great satisfaction to the officers that the employés of the institution have so generally given cordial and faithful service. Many of them have kept their places from last year.

Capt. Reuben Smith, for the past five years the faithful Steward, still continues a highly-respected officer.

Mrs. E. J. Boone entered upon the duties of Matron in August, 1877, and her services grow in value.

Dr. C. A. Hayes has been the Assistant Physician just one year. He is interested in his charge, and devotes himself faithfully to it. The labors and care of an assistant physician are great, when over two hundred patients are to be looked after. When he has to perform the duties of druggist, his appropriate work is hindered. The employment of some one for the special duties of apothecary is very much needed.

We rejoice in the prosperity which has so far attended this Asylum, that so many of the most unfortunate class who ask aid of the State can be provided for. This institution is growing up as one of the children of the State. Unspoiled by flattery, for a time more neglected than petted; its conduct has been properly investigated, and it has been properly chastized. Like the State itself, it has gone through a border war, until, strengthened by contest, it has come, year by year, into larger work. Unseen from the railway, and distant from any business center, few in the State know the growth and importance of this It stands on a high elevation, commanding a view institution. rarely equaled for beauty. It is pointed out as an object of pride for many miles around. Appropriations for the maintenance of this institution have been liberal, showing that the people of the State have at heart the interest and comfort of their mentally-stricken citizens.

May wise and generous counsel prevail in all that is done hereafter for the insane of this great and growing State.

Respectfully,

A. P. TENNEY.

### CHAPLAIN'S REPORT.

To the Board of Trustees of the Kansas State Insane Asylum:

GENTLEMEN: I herewith submit a report as Chaplain of the Asylum.

The time embraced in this report covers a term of one year and seven months—from December 1st, 1876, to June 30th, 1878. During this time religious services have been regularly held in the chapel of the Asylum, at 2 o'clock P.M., on the Sabbath.

The average attendance at these services, for the first seven months reported, was 49; and for the year closing June 30th, 1878, was 57.

The patients attending have usually been quiet and attentive, and some seemed to enjoy the services much. The aim has been to present gospel truths, adapted to their situation and circumstances, in as plain and simple a manner as possible.

During the last year, especially under the administration of the present Superintendent, Dr. Tenney, there has been much improvement in the singing and music of the choir. This has added interest to the services.

Religious reading in the form of papers, though to a very limited extent, has been procured by the Chaplain and furnished the Superintendent for the use of the patients.

S. L. ADAIR, Chaplain.

OSAWATOMIE, 1878.

## REPORT OF THE TREASURER.

### To the Hon. Board of Trustees Kansas State Insane Asylum:

GENTLEMEN: I herewith present a report of the financial operations of this Asylum from December 1st, 1876, to July 1st, 1877, and from July 1st, 1877, to March 31st, 1878, as shown by the books of the late Treasurer, Mr. J. T. Lanter; also, my report from March to July 1st, 1878.
